ANDRES FELIPE PAVA CANO

City: Bogotá
Celphone: +57 3235037324
Email: pavacanofelipe@outlook.com
URL: [Andres Felipe Pava | LinkedIn]

PROFESIONAL OBJECTIVE

Senior Data Analyst with extensive experience in data analysis, business intelligence, and process automation. I specialize in leveraging large datasets to derive actionable insights, optimize processes, and drive business strategy. With a strong foundation in machine learning, statistical modeling, and data visualization, I am transitioning to Data Science roles where I can apply my analytical skills to solve complex problems and create impactful models.

PROFESSIONAL EXPERIENCE

Ninth Floor Technologies – Contractor
Data Analyst *04.2023– Actual*

Responsabilities:

- Analyzed large volumes of data to track KPIs and create detailed reports for business performance assessment.

- Developed and implemented automated reporting systems, streamlining data processing workflows.

- Conducted customer segmentation and lead analysis to help optimize marketing strategies.

Achievements:

- Reduced report generation time by 70% through process automation.

- Increased sales team efficiency with data-driven recommendations, leading to a 10% increase in conversions.

- Provided strategic insights that led to the optimization of customer targeting and lead management strategies.

Business Analyst
Hunter Douglas de Colombia *01.2022-04.2023*
Responsibilities:
- Collected, analyzed, and created dashboards to assess datasets and develop strategies for process optimization and automation.
- Designed and analyzed KPIs to track sales performance and ensure operational goals were met.
- Built interactive dashboards using Tableau for data visualization and reporting to support strategic decision-making.

Achievements:
- Created 3 interactive dashboards from scratch within 2 months, improving visibility into sales performance.
- Automated over 10 operational tasks using Visual Basic, reducing processing time from 6 hours to 2 minutes.
Cleaned and analyzed databases, recovering $5,000 in lost revenue due to data inconsistencies.

EDUCATION

MIT PROFESSIONAL EDUCATION
MIT Applied Data Science, Machine Learning, Deep Learning, Time Series Analysis 07.2024 – 11.2024

STRUCTURALIA
Master's Degree in Big Data and Business Analytics 10.2022 – 10.2023

UPB (Universidad Pontificia Bolivariana)
Ingeniería Aeronáutica Medellín 01.2016 - 08.2021

BNC Colombo Americano
English Armenia -Quindio 01.2015 - 12.2015

SKILLS

Programming Languages: Python (pandas, scikit-learn, XGBoost), SQL, VBA, Power Query, DAX
Data Analysis & Machine Learning: EDA, Classification, Regression, Random Forest, Logistic Regression, Decision Trees, XGBoost, Time Series Analysis, NLP, Neural Networks, CNNs
Tools & Technologies: Tableau, Power BI, Excel, Git, Jupyter, Hadoop, Spark
Data Visualization & Reporting: Power BI, Tableau, Matplotlib, Seaborn
Automation & Optimization: Automated workflows using VBA, Visual Basic, Power Query, DAX

PORTFOLIO PROJECTS

Note: These are academic projects and not part of professional work experience

Loan Default Prediction

Description: Developed a classification model to predict which clients are likely to default on their loans. This model helps banks make more informed, data-driven loan approval decisions.
Tools/Technologies: Python, scikit-learn, XGBoost, pandas, matplotlib
Key Insights & Impact: Improved default prediction accuracy by 95%, reduced false positives by 20%, and helped optimize resource allocation in the bank's approval process.
Link: https://drive.google.com/file/d/1_8lbnr3MIhbqeuhBwtyalYchysPW2QTV/view?usp=drive_link

Lead Conversion Prediction for ExtraaLearn

Description: Built a machine learning model to predict lead conversion for an EdTech startup, enabling the business to prioritize high-value leads..
Tools/Technologies: Python, scikit-learn, XGBoost, pandas
Key Insights & Impact: The model helped increase conversion rates by 15%, allowing for more effective resource allocation and better decision-making.

EDA Food Hub Analysis

Description: Explaratory data analysis to analyze the data to get a fair idea about the demand of different restaurants which will help them in enhancing their customer experience .
Tools/Technologies: Python, scikit-learn, pandas, matplotlib
Key Insights & Impact: Understanding the deliverytime per weekdays, net revenue generated and the top cuisine in terms of revenue generation.
