Professional Summary

- Data Scientist with around 4 years of experience building machine learning models, predictive analytics solutions, and scalable data pipelines across healthcare and financial domains.
- Strong expertise in Python, SQL, and machine learning algorithms including Logistic Regression, Random Forest, XGBoost, and clustering techniques.
- Proven ability to deliver business impact through data-driven decision-making, improving customer retention, operational efficiency, and revenue growth.
- Hands-on experience with feature engineering, model evaluation (AUC, accuracy, RMSE), and hyperparameter tuning.
- Experienced in designing end-to-end ML pipelines including data ingestion, preprocessing, modeling, validation, and deployment.
- Strong background in statistical analysis, hypothesis testing, and A/B experimentation frameworks.
- Experience working with large-scale structured datasets (1M+ records) ensuring data quality, validation, and governance.
- Proficient in building dashboards and data visualizations using Power BI and Tableau to communicate insights.
- Experience with AWS cloud services (S3, Glue, Lambda) for scalable data processing and analytics workflows.

Technical Skills

Programming & Libraries: Python, R, Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, Matplotlib, Seaborn
Machine Learning: Regression, Random Forest, XGBoost, Clustering, Feature Engineering
Deep Learning: CNN, Computer Vision
Natural Language Processing: NLP, LLMs, Prompt Engineering, Generative AI (GenAI)
Data Analysis & Statistics: Hypothesis Testing, Regression Analysis, Data Validation
Visualization: Power BI, Tableau, Excel
Cloud: AWS (S3, Glue, Lambda)
Data Engineering: ETL/ELT Pipelines, Data Modeling
Databases: MySQL, PostgreSQL, Oracle
Version Control: Git, GitHub

Professional Experience

CVS Health / Aetna (USA) Jan 2025 – Present
Data Scientist Cincinnati, OH

- Developed machine learning models (Logistic Regression, Random Forest, XGBoost) on 2M+ healthcare records to predict member churn, improving retention targeting by 18%.
- Engineered 30+ features from claims and utilization datasets, improving model precision and reducing false positives by 22%.
- Built scalable ETL pipelines using Python and SQL processing 500K+ daily records, improving data availability and reducing processing time by 35%.
- Performed statistical analysis and hypothesis testing to identify cost drivers, enabling a 12% reduction in operational expenses.
- Designed dashboards tracking 15+ KPIs including utilization, cost, and model performance metrics for business stakeholders.

- Implemented A/B testing frameworks to evaluate intervention strategies and measure business impact.
- Automated reporting workflows reducing manual effort by 40% and improving data accuracy.
- Improved model performance through cross-validation and hyperparameter tuning, increasing accuracy by 10%.
- Optimized data pipelines reducing latency by 30% and improving system reliability.

HDFC Bank Jul 2023 – Jul 2024
Data Scientist Hyd , India

- Developed customer segmentation and risk models using clustering and classification techniques on 1M+ financial records.
- Built and optimized SQL pipelines for large-scale transaction data, reducing reporting latency by 40%.
- Applied statistical analysis to identify behavioral patterns, improving cross-sell conversion rates by 12%.
- Designed dashboards and KPI reports supporting data-driven decision-making across business units.
- Improved query performance and data models, reducing execution time by 35%.
- Engineered features for predictive models improving stability and accuracy.
- Delivered insights to stakeholders supporting strategic planning and operational improvements.
- Collaborated with cross-functional teams including analytics, risk, and product teams.

L&T Pvt Ltd Oct 2021 – Jun 2023
Data Analyst Hyd , India

- Analyzed large datasets (500K+ records) to identify trends, improving operational efficiency by 15%.
- Built dashboards and reports enabling faster business decision-making.
- Developed SQL queries and Python scripts for data extraction, transformation, and analysis.
- Defined KPIs and metrics improving reporting accuracy across teams.
- Performed data validation and cleaning reducing inconsistencies by 20%.
- Supported forecasting models improving planning accuracy.
- Automated reporting workflows saving 8+ hours weekly.

Projects

Healthcare Churn Prediction Model

- Built predictive models using Random Forest and XGBoost achieving AUC score of 0.87.
- Engineered features improving model accuracy by 15%.
- Delivered insights improving customer retention strategies.

Early Onset Detection of Alzheimer's Disease

- Developed a CNN-based diagnostic system for early Alzheimer's detection from MRI scans.
- Applied preprocessing and dimensionality reduction techniques to improve model generalization.
- Achieved high classification accuracy using open-source medical imaging datasets.

Education

University of Cincinnati Aug 2024 – Apr 2026
Master of Engineering in Computer Science

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Power BI Data Analyst
