---

## Professional Summary

Analytical and detail-oriented professional with a strong foundation in mathematics, computer science, and problem-solving. Skilled in Python programming, data structures, and algorithmic thinking, with hands-on experience building and analyzing software solutions. Adept at interpreting quantitative information and delivering insights to support decision-making. Committed to applying mathematical and technical skills to data-driven environments.

## Technical Skills

**Programming Languages:** Python (Proficient), JavaScript (Proficient), Java (Familiar), Matlab (Familiar), C/C++ (Familiar), C# (Familiar), Arduino (Familiar)

**Software & Tools:** Git (Proficient), Command Line/Bash (Proficient), Arduino (Familiar), Excel (Familiar with formulas and basic data manipulation),

**Core competencies:** Data Interpretation, Quantitative Analysis, Problem Solving, Data Structures & Algorithms

## Training/Education

**Per Scholas**, *Software Engineering Bootcamp*

- Completed intensive 15-week program emphasizing full-stack development and technical problem-solving.
- Applied mathematical and algorithmic thinking to software projects.

**Texas Tech University** *Bachelor's in Mathematics,* Minor: Computer Science|3.56

- Relevant Coursework: Data Structures, Algorithms, Linear Algebra, Statistical methods, Numerical Analysis, Mathematical Statistics

## Professional Experience

**Prompt Engineer/Reviewer** | **Outlier.ai** | Remote | June 2024 - Present

- Reviewed AI-generated outputs, applying logical analysis to identify errors and suggest refinements.
- Supported the enhancement of AI performance through critical evaluation and iterative feedback.

**Math Tutor** | Paper.Co| Remote | December 2021- May 2024

- Tutored students in mathematics, building skills in data interpretation, problem breakdown, and clear communication of complex quantitative concepts.
- Developed strategies to explain abstract mathematical ideas in real-world contexts.
