EDUCATION

Master of Science in Computer Science, Syracuse University | Syracuse, NY **Aug 2023 - May 2025**
Relevant Coursework: Artificial Intelligence | Database Management System | Object Oriented Design | Design and Analysis of Algorithm | IoT | Computer Architecture | Operating Systems ***GPA: 3.54/4.00***

Bachelor of Engineering in Computer Science, University of Mumbai | Navi Mumbai, India **Aug 2019 - Jun 2023**
Relevant Coursework: Machine Learning | Data warehouse & Data mining | Quantitative Analysis | Block Chain | Software Engineering | Big Data (Hadoop) | Natural Language Processing ***GPA: 3.74/4.00***

WORK EXPERIENCE

Johnson Controls – IT Intern | Milwaukee, WI, USA **May 2024 - Aug 2024**

- Developed real-time data pipelines and **Power BI dashboards**, supporting insights for PMO and leadership teams.
- Utilized **Snowflake** and **SQL** to extract, transform, and load large datasets into cloud-based reporting platforms.
- Designed Python scripts to automate credential systems (1Password) and perform data ingestion and transformation tasks.
- Collaborated across departments to gather business requirements and transform them into technical deliverables.

iConsult, Albany Health Management – Software Developer | Syracuse, NY, USA **Mar 2024 - May 2024**

- Built a scalable health analytics platform integrating GARMIN wearable data and symptom logs.
- Built Python-based data pipelines (NumPy, Pandas) to deliver real-time patient insights, cutting decision **latency by 25%.**
- Created backend services for data processing, segmentation, and anomaly detection.

Xangars – Data Analyst Intern | Navi Mumbai, India **Mar 2023 - May 2023**

- Cleaned and modeled large datasets; implemented optimized SQL queries to increase data **retrieval speed by 30%.**
- Created and deployed custom dashboards in **Power BI,** surfacing key metrics for marketing and business operations
- Gained hands-on experience in manual and automated testing, identifying bugs, and assisting with test automation.

PROJECTS & PUBLICATIONS

Fake Job Posting Detection (NLP-based) **Jan 2025 – May 2025**

- Developed an end-to-end NLP system using BERT embeddings to detect fake job posts, achieving 91% accuracy
- Handled class imbalance with SMOTE, boosting recall on fraudulent listings by 18%
- Processed and analyzed 17K+ job postings using advanced preprocessing (lemmatization, TF-IDF)

Lush Green **Aug 2022 - May 2023**

- Developed a user-friendly web application for predicting the best suitable crop according to the soil contents.
- Implemented **Convolutional Neural Networks (CNN) and Deep Reinforcement Learning (DRL)** for identifying pests and applied ML algorithms such as **Random Forest and Support Vector Machines** for pest classification.

Drug Bioactivity Prediction **Dec 2021 - Mar 2022**

- A machine learning project which predicts how effective the drug is upon target by calculating IC50 value.
- Leveraged a wide range of Python libraries, **pandas, Scikit-learn**, Jupyter for data preprocessing and model development.
- Applied cross-validation and model evaluation techniques to ensure reliability, generalization of predictive.

Student Result Administration System using RPA. **Apr 2021 - Nov 2021**

- Built a web application to automate the extraction and analysis of student results, reducing administrative workload.
- Integrated **Robotic Process Automation using Ui Path** to extract student's grades and information from PDF files.
- Published a paper titled "Student Result Administration System Using RPA" in IJREAM Journal, 2022.

TECHNICAL SKILLS

- **Programming Languages & Concepts:** C++, Python, HTML/CSS, JavaScript, React, SQL, NoSQL, Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs, SDLC
- **ML Frameworks & Algorithms:** PyTorch, TensorFlow, Scikit-Learn, Linear & Logistic Regression, Decision Trees, Random Forest, SVM, KNN, Naive Bayes, K-Means Clustering
- **Software & Tools:** Azure Data Studio, Google Cloud Platform, UIPath (RPA), Power BI, Snowflake, Jira, Confluence, Git, SSMS, Android Studio, Daptiv, Microsoft Excel (VLOOKUP, Pivot Tables), PowerPoint, Agile (Scrum & Kanban), Microsoft SQL Server, Linux, Windows, Ubuntu

CERTIFICATIONS & ACHIEVEMENTS

- **Winner of ByteCamp 2022 Hackathon –** A 24-hour long hackathon conducted by SIES GST
- **Courses:** 30 Days of Google Cloud, Automate Tasks and processes with Jira, Jira Scrum Project
- **Volunteer:** Rewriting The Code, Hunger Force Task, Hunger Task Farm & Fish Hatchery.
