SUMMARY

- Healthcare Data Analyst with 5+ years of experience applying advanced data analysis and visualization techniques to derive actionable insights and support decision-making in healthcare environments.
- Proficiency in SDLC, Agile, and Waterfall methodologies, ensuring efficient project execution and collaboration.
- Expertise in programming languages like Python, R, SQL, and SAS, using tools such as NumPy, Pandas, Matplotlib, SciPy, and Seaborn for data manipulation, statistical analysis, and visualization.
- Skilled in creating actionable dashboards and reports using Tableau, Power BI, and Excel to support data-driven decision-making.
- Well-versed in data management, including data cleaning, integration, ETL processes, and data warehousing, with hands-on experience working with databases like MySQL, SQL Server, PostgreSQL, and MongoDB.
- In-depth knowledge of healthcare data standards (HL7), EHR systems, and HIPAA compliance, ensuring data accuracy and security in healthcare analytics projects.

SKILLS

- **Methodologies:** SDLC, Agile, Waterfall
- **Programming Languages:** Python, R, SQL, SAS, MATLAB
- **IDEs:** Visual Studio Code, PyCharm
- **Data Analysis Packages:** NumPy, Pandas, Matplotlib, SciPy, Seaborn, ggplot2
- **Data Visualization Tools:** Tableau, Power BI, Advanced Excel
- **Databases:** MySQL, SQL Server, PostgreSQL
- **Data Management:** Data Cleaning, Data Integration, Data Warehousing, ETL Processes
- **Clinical Coding Systems:** LOINC, CPT, CVX, ICD-10, SNOMED CT, HL7v2, CCDA
- **Healthcare Knowledge:** Healthcare Terminology, HIPAA Compliance, Electronic Health Records (EHR), Healthcare Data Standards (HL7), Clinical Documentation Improvement (CDI).

EXPERIENCE

United Healthcare Group, USA | Data Analyst **Aug 2022 - Present**

- Conducted comprehensive data analysis using Python and SQL to identify trends and generate actionable insights, enhancing patient care and operational efficiency.
- Employed NumPy and Pandas for data cleaning and manipulation, ensuring data integrity and accuracy for reporting and analysis.
- Analyzed Electronic Health Records (EHR) data, achieving 95% compliance with healthcare data standards (HL7) and significantly improving data accuracy across multiple departments.
- Utilized SAS for advanced statistical analysis to enhance predictive modeling and created interactive Tableau dashboards, improving reporting efficiency and enabling stakeholders to monitor key performance indicators (KPIs).
- Managed data integration processes across MySQL, SQL Server, and PostgreSQL, ensuring seamless data flow and accessibility for cross-functional teams.
- Evaluated and enhanced current data model as per the requirements.
- Created new EC2 instance in AWS, allocated volumes, and provided provisioning using IAM.
- Analyzed patient data utilizing clinical coding systems such as LOINC, CPT, and ICD-10 to ensure accurate documentation and compliance with healthcare regulations, enhancing data integrity and reporting accuracy.
- Cooperated with healthcare professionals to understand healthcare terminology and maintain HIPAA compliance, safeguarding sensitive patient information while analyzing data.
- Data modeling for different healthcare domains in the staging layer.
- Developed and reviewed Tableau scorecards, dashboards using stack bars, bar graphs, scatter plots, geographical maps, and Gantt charts using show-me functionality.
- Converted charts into Crosstabs for further data analysis in MS Excel. Responsible for physical/logical data modeling, metadata documentation, user documentation, and production specs.
- Performed data mining to analyze the patterns of healthcare data, including patient records and claims processing.
- Involved in writing, testing, and implementing triggers, stored procedures, and functions at the database level using PL/SQL.
- Developed and implemented data quality checks, resulting in a 30% reduction in errors and discrepancies in healthcare data reporting.
- Developed and maintained comprehensive datasets integrating CVX and CCDA codes, enabling efficient tracking of immunization records and clinical summaries, which improved patient outcomes through better data visibility.
- Conducted data analysis on healthcare claims and patient records to identify trends, optimize operational efficiency, and support data-driven decision-making.
- Facilitated training sessions for staff on data interpretation and analysis tools, enhancing the overall analytical capabilities of the team.

MetLife, USA | Data Analyst **Oct 2019 – July 2022**

- Collaborated within Agile teams to deliver iterative data analysis reports, ensuring a faster turnaround for key projects in the insurance domain.
- Leveraged SQL to extract, transform, and analyze insurance claims and policyholder data from a data warehouse, optimizing data retrieval processes.
- Worked with actuarial and risk teams to standardize data models and improve interoperability.
- Used Decision Trees and Random Forests to detect fraud in claims data, enhancing security.
- Created interactive dashboards using Tableau to track key insurance metrics, enabling stakeholders to monitor claims processing trends in real time for informed decision-making.
- Built ML models to predict claim risks, reduce churn, and optimize pricing.
- Enhanced data quality by implementing validation checks and resolving inconsistencies, ensuring accuracy in policy and claims data.
- Conducted in-depth insurance data analysis using statistical techniques, identifying trends that improved underwriting efficiency and risk assessment.
- Optimized SQL queries for insurance data analysis, improving execution time and facilitating faster insights for risk assessment and policy management.
- Utilized Python for data wrangling and visualization, enabling deep insights into customer demographics, policy trends, and claims behavior.
- Automated data extraction and transformation processes, streamlining reporting workflows and reducing manual effort in insurance data processing.

EDUCATION

Bachelors of Science Business Administration Concentration Information Technology **Mar 2015 – Sep 2019**
Colorado Technical University CO, USA
