+1(334)781-2599 | saibabu.k2599@gmail.com | Seattle , WA | LinkedIn

SUMMARY

Data Analyst with 4+ years of experience in data mining, statistical analysis, and business intelligence. Proficient in SQL, Python (Pandas, NumPy, Scikit-Learn), and data visualization tools like Power BI and Tableau. Skilled in ETL processes, data warehousing (Snowflake, PostgreSQL, Azure SQL DB), and automation using Apache Airflow. Expertise in predictive modeling, machine learning, and big data technologies like Apache Spark and Databricks to optimize data workflows and drive business insights.

SKILLS

Programming Languages: SQL, Python, R

Methodologies: SDLC, Agile, Waterfall, Data Science Life Cycle (DSLC), Clinical Data Analysis & Reporting (CDAR), A/B Testing

Packages & Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn

Cloud & Infrastructure: AWS (S3, Redshift, Lambda, CodePipeline), Azure (Data Factory, Synapse, CI/CD), GCP (BigQuery, Cloud Functions)

Databases: MySQL, PostgreSQL, MS SQL Server, MongoDB, Oracle, Snowflake

Tools & Technologies: Power BI, Tableau, Excel (Advanced Formulas, Pivot Tables), Google Analytics, Databricks, ETL (SSIS, SSAS, Informatica, Apache Airflow), Git, Confluence

Other Skills: Data Modeling, Data Warehousing, Data Visualization, Statistical Analysis, Predictive Modeling, Machine Learning (Regression, Classification), Data Cleaning, Data Mining, Electronic Health Records (EHR) Integration, Quantitative Analysis, Healthcare Data Compliance (HIPAA), Data Governance

EDUCATION

Master of Science in Computer Sciences — **Aug 2021 – Dec 2022**
Auburn University at Montgomery, USA

Bachelor of Technology in Electronics and Communication Engineering — **2016 - 2020**
Prist University, India

PROFESSIONAL EXPERIENCE

Data Analyst | McKesson, USA — ***Oct 2024 – Present***

- Developed a predictive analytics model using machine learning to identify drug usage trends and prescription patterns, enabling healthcare providers to optimize inventory management while ensuring compliance with HIPAA regulations.
- Implemented ETL pipelines to extract, transform, and load patient prescription data from multiple sources into a centralized data warehouse, ensuring data accuracy, security, and HIPAA-compliant anonymization.
- Designed interactive dashboards using Power BI and Tableau to visualize prescription trends, physician prescribing behaviors, and patient adherence rates, aiding stakeholders in data-driven decision-making.
- Optimized cloud-based data processing on AWS using S3, Glue, and Redshift, improving query performance by 40% and enabling real-time insights into drug distribution and patient medication adherence.

Data Analyst | Vidu Solutions LLC, TX, USA — ***Jan 2023 – Sept 2024***

- Led the "Customer Behavior Analysis & Business Insights" project, analyzing website traffic, software usage, and support data to identify trends, improving customer satisfaction by 25% through data-driven enhancements.
- Developed automated Power BI and SQL reports to track key business metrics, reducing manual reporting efforts by 40% and enabling quick insights into customer engagement and retention trends.
- Designed a recommendation system to personalize website content and software features based on user preferences, leading to a 20% increase in user engagement and a 15% boost in conversions.
- Optimized database queries and data pipelines, reducing report generation time from 10 minutes to 2 minutes, significantly improving real-time decision-making for business stakeholders.

Data Analyst | Vertex India Pvt Ltd., Mumbai, India — ***Dec 2019 – Jul 2021***

- Developed an end-to-end customer analytics dashboard in Power BI and Tableau, integrating data from MySQL, PostgreSQL, and MongoDB, which reduced reporting time by 35% and enhanced customer satisfaction insights for improved business decisions.
- Designed and implemented ETL pipelines using SSIS, Informatica, and Apache Airflow, automating data extraction from multiple sources, ensuring 98% data accuracy, and optimizing the processing time for customer support analytics by 40%.
- Conducted sentiment analysis on customer interactions using Python (Pandas, NLTK, Scikit-Learn) and predictive modeling, leading to a 20% improvement in customer retention rates by identifying trends and proactively resolving service issues.
- Migrated and optimized customer data processing from on-premises SQL Server to AWS Redshift and Snowflake, reducing query response time by 50% and enabling real-time analytics for faster decision-making in customer support operations.
- Implemented data governance and compliance standard for ISO 27001, ensuring 100% regulatory compliance in handling sensitive customer data, strengthening security measures, and reducing data breaches by 30% through improved access controls and encryption.

Projects

Broadband Comparative Analysis Project | Auburn University at Montgomery

- Analyzed broadband performance metrics across multiple regions using Python (Pandas, NumPy, Scikit-Learn), identifying key trends in network speed, accessibility, and adoption, leading to data-driven insights for infrastructure improvements.
- Developed interactive dashboards in Tableau and Excel (Pivot Tables, Power Query), visualizing broadband coverage disparities and enabling stakeholders to make informed decisions for optimizing network expansion and resource allocation.
