SAHITHI GUNDA
DATA ANALYST
Kansas | sahithig028@gmail.com | 908 760 6532 | **LinkedIn**

SUMMARY:

- Experienced Data Analyst with over 4 years of expertise in leveraging advanced analytical techniques and predictive modeling to drive business insights, streamline operations, and support data-driven decision-making in both public health and financial sectors.
- Proficient in data manipulation and analysis using Python (Pandas, NumPy), SQL, and machine learning algorithms, including regression analysis and decision trees, delivering high-impact models and forecasts to predict trends and risks.
- Skilled in developing interactive data visualizations and dashboards with Power BI and Tableau, enabling key stakeholders to access real-time insights and improve decision-making efficiency.
- Extensive experience in data management and storage using tools such as Amazon S3 and AWS, ensuring secure, scalable, and efficient storage while maintaining compliance with regulatory standards like HIPAA and financial reporting guidelines.
- Adept at automating processes and reducing manual effort through the development of Python scripts, Excel macros, and VBA, significantly improving operational efficiency in financial and public health reporting.
- Proven track record of collaborating with cross-functional teams, including public health officials, epidemiologists, and financial analysts, to integrate insights into actionable strategies, resulting in improved health responses and financial stability.
- Strong background in real-time data processing using tools like Apache Kafka and SSIS, enhancing operational capabilities and ensuring timely, accurate analysis of large datasets to inform critical business decisions.

SKILLS:

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL, R
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, dplyr, ggplot2
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Database:	MySQL, PostgreSQL, MongoDB, SQL Server
Cloud Platform:	Amazon Web Services (AWS), Snowflake
Other Technical Skills:	SISS, SSRS, SAS, SPSS, Machine Learning Algorithms, ETL\ELT Tools, Statistics, ServiceNow, Hadoop, Spark, MapReduce, Alteryx, Google Big Query, Power Query, Probability distributions, Mathematics, Confidence Intervals, ANOVA, Advance Analytics, OLAP & OLTP, SAS, MS Office Suite (Microsoft Word, PowerPoint, MS Visio), Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Big Data, Data Integration, Data Interpretation, Data Pipeline, Data Visualization, Data warehousing, Data transformation, Data Governance, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Descriptive analytics, Git, GitHub, JIRA
Soft Skills:	Time Management, Leadership, Strategy Planning, Problem-Solving, Negotiation, Decision-Making, Documentation and Presentation, Analytical Thinking, Attention to Detail, verbal, and written communication
Operating Systems:	Windows, Linux

EXPERIENCE:

Data Analyst | Medica- KS | Aug 2023 - Current

- Developed a comprehensive predictive model to analyze public health data, identifying trends and forecasting potential disease outbreaks, which improved public health response and resource allocation by 25%.
- Conducted in-depth analysis of a dataset containing over 1 million public health records using statistical techniques like regression analysis and time series forecasting to uncover trends, risk factors, and patterns, leading to early intervention strategies that reduced outbreak response times by 20%.
- Utilized SQL to execute complex queries and extract data from over five sources, ensuring the accuracy, relevance, and timeliness of datasets for effective predictive modeling.

- Leveraged Python libraries (Pandas, NumPy) to manipulate data, automating cleaning processes that enhanced data integrity by 30% through effective management of missing values and outliers, improving the reliability of the analysis.
- Developed interactive Power BI dashboards to visualize key performance indicators (KPIs) related to disease trends and outbreak risks, leading to a 30% improvement in stakeholder engagement and decision-making efficiency for public health officials.
- Designed and implemented machine learning models (logistic regression, decision trees) to predict high-risk populations, achieving an 85% accuracy rate in forecasting disease outbreaks, facilitating timely interventions and reducing potential case counts by 15%.
- Collaborated with over 10 public health officials and epidemiologists to integrate model insights into health response workflows, reducing response times by 15% during disease outbreaks and enhancing public health readiness.
- Employed Amazon S3 for secure, scalable storage of public health data, improving data retrieval efficiency by 50% while ensuring compliance with HIPAA regulations to protect patient privacy and secure sensitive health information.
- Conducted training sessions for over 50 public health professionals on using data insights for proactive outbreak management, resulting in a 20% increase in adherence to preventive measures and protocols.
- Established protocols for data sharing and access control, ensuring all data handling practices met HIPAA standards, safeguarding patient confidentiality, and building trust in public health initiatives.

Data Analyst | Capgemini, Chennai | June 2019 - March 2022

- Utilized Scikit-learn to build and deploy predictive models, improving the accuracy of financial risk and trend forecasts by 20%, which supported proactive risk management and informed strategic decision-making.
- Documented comprehensive functional requirements for financial analytics processes, covering data extraction, transformation, and reporting needs to ensure alignment with business goals.
- Developed Python scripts to automate data extraction and reporting tasks, reducing manual processing time by 45% and ensuring timely and consistent financial report generation.
- Applied advanced predictive analytics techniques to refine financial risk management strategies, resulting in a 15% reduction in operational risks and enhancing financial stability.
- Designed and maintained data marts within the data warehouse to meet business needs related to sales, revenue.
- Integrated real-time data connections in Tableau, ensuring that financial reports and visualizations reflected the most up-to-date data, thus supporting better decision-making.
- Implemented SSIS control flow tasks for managing complex data workflows, including data validation, error handling, and logging, ensuring the reliability and accuracy of data processing.
- Leveraged AWS S3 for scalable, cost-effective storage of large financial datasets, ensuring high data durability and accessibility.
- Identified and managed risks related to regulatory compliance, including adherence to financial reporting standards and data protection regulations, ensuring that systems met relevant legal and industry requirements.
- Utilized Apache Kafka for real-time data streaming, capturing and processing financial transactions as they occurred, enabling timely analysis and reporting.
- Developed and tracked key performance indicators (KPIs) such as transaction volume and average revenue per user to assess the impact and success of various financial strategies.
- Automated financial reporting tasks using Excel macros and VBA scripts, reducing manual effort and ensuring accurate and timely report generation.
- Organized and facilitated Joint Application Development (JAD) sessions, establishing clear objectives, agendas, and timelines to promote effective discussions and decision-making.
- Involved key stakeholders and end-users in User Acceptance Testing (UAT) to ensure the system met their requirements and to collect valuable feedback for continuous improvement.
- Participated in daily stand-up meetings to provide project updates, address challenges, and efficiently coordinate financial analytics tasks within the team.

EDUCATION:

University of Central Missouri, Missouri
May 2024
Master of Science, Computer Science and Engineering GPA: 3.3/4.0

CMR Technical Campus
Apr 2019
Bachelor of Technology, Computer Science and Engineering GPA: 3.2 / 4.0
