ANJALI SREEJA KADIYALA

San Jose, CA| +1 (408) 709-0830 | anj9.kadiyala@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

4+ years of experience as a Data Scientist, specializing in designing, developing, and deploying machine learning models to address complex business challenges and inform strategic decisions. Experienced in software development methodologies, including SDLC, Agile, and Waterfall, ensuring efficient project management. Proficient in a broad spectrum of machine learning algorithms, like Linear Regression, Logistic Regression, Decision Trees, Random Forests, SVM, Naive Bayes, KNN, etc., with strong capabilities in supervised and unsupervised learning methods. Expertise in utilizing popular libraries like NumPy, Pandas, Matplotlib, SciPy, etc., for data manipulation, analysis, and visualization. Skilled in database management with practical experience in SQL Server and MySQL. Strong ability in utilizing AWS and Azure for scalable data solutions and optimizing processing workflows.

EXPERIENCE

Axbio Inc. | Data Scientist **Aug 2023 – Present**

- Applied Agile methodologies in project management to promote iterative development and ensure the continuous delivery of data-driven solutions that adapt to changing business requirements.
- Conducted over 50 in-depth data analyses using Python, R, SQL, and SAS, enabling robust data processing and delivering predictive models with an accuracy rate of 92%.
- Employed various supervised and unsupervised machine learning algorithms, including Classification, SVM, Naive Bayes, KNN, and K Means clustering, achieving a 30% improvement in pattern identification and supporting strategic business decisions.
- Created and deployed predictive models with Python and Scikit-learn, resulting in a 15% increase in operational efficiency by precisely forecasting key business metrics.
- Designed and implemented scalable data pipelines on AWS, reducing data processing time by 30% through the integration of services like S3, EC2, and Lambda.
- Crafted and executed over 100 intricate SQL queries to extract, transform, and analyze data from SQL Server and MySQL databases, supporting comprehensive data analysis and reporting, and reducing data processing time by 35%.
- Managed version control and fostered collaborative development using Git and GitHub, ensuring smooth code integration and deployment among team members while maintaining project consistency and integrity.

Data Square, India | Data Scientist **Jan 2019 – Jan 2022**

- Employed Waterfall methodologies to contribute significantly to the planning and execution of business strategies.
- Implemented predictive models using a variety of machine learning algorithms, including linear regression, classification, Naive Bayes, Random Forests, K-means clustering, KNN, and regularization, achieving a 25% increase in accuracy and model performance.
- Produced over 30 concise tabular models tailored for targeted reporting solutions using Power BI and Excel Power Pivot, enhancing reporting efficiency by 30%.
- Leveraged Python libraries such as Pandas, NumPy, PySpark, SciPy, Matplotlib, and sci-kit-learn to develop diverse machine learning algorithms, resulting in a 40% reduction in data processing time and a 20% improvement in algorithm efficiency.
- Utilized Azure Data Factory for ETL processes, automating data workflows and reducing manual effort by 50%.
- Utilized SQL queries proficiently to extract meaningful insights, facilitating evidence-based decision-making processes and improving data retrieval speed by 25%.

EDUCATION

Master of Science, Artificial Intelligence | San Jose State University, California
Bachelor of Technology, Computer Science | Jawaharlal Nehru Technological University, India

SKILLS

Methodologies: SDLC, Agile, Waterfall
Language: Python, R, SQL, SAS
IDEs: Visual Studio Code, PyCharm
ML Algorithm: Linear Regression, Logistic Regression, Decision Trees, Supervised Learning, Unsupervised Learning, SVM, Random Forests, Naive Bayes, KNN, K Means, CNN, Classification
Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, Ggplot2
Cloud Technologies: AWS, Azure, GCP, DataBricks
Visualization Tools: Tableau, Power BI, SPSS
Database: SQL Server, MySQL
Other Tools: Git, GitHub, MS Excel
Operating System: Windows, Linux, Mac
