Work Experience

Senior FP&A Analyst – Corporate Finance

October 2020 –

Present

Guaranty Trust Holding Co.

- Lead annual budgeting, quarterly forecasting, and long-range planning processes for a diversified financial services portfolio generating over \$1.2B in annual revenue.
- Partner with executive leadership across wealth management, insurance, lending, and corporate functions to drive strategic planning and performance management initiatives.
- Develop consolidated financial forecasts, including revenue, net interest income, fee income, operating expenses, EBITDA, and cash flow projections.
- Prepare monthly board reporting packages, executive scorecards, and performance dashboards highlighting business unit profitability and growth trends.
- Build scenario models evaluating market conditions, interest rate movements, client asset growth, and strategic investment opportunities.
- Support acquisition due diligence, integration planning, and financial performance monitoring for newly acquired businesses.
- Drive automation initiatives that reduced monthly reporting cycle times by 35%.

FP&A Analyst II – Strategic Planning & Analysis

Feb 2020 – Sept 2020

Guaranty Trust Holding Co.

- Managed budgeting and forecasting activities for multiple business segments, including wealth management, retirement services, and insurance operations.

- Conducted profitability analysis by product, client segment, distribution channel, and business line.
- Developed financial models supporting strategic initiatives, pricing decisions, and investment evaluations.
- Prepared monthly management reporting packages, variance analyses, and executive presentations for senior leadership.
- Collaborated with business unit leaders to establish KPIs and performance targets aligned with corporate objectives.
- Supported stress-testing and scenario planning exercises assessing impacts of economic and market fluctuations.

Financial Analyst – FP&A

Oct 2017 – Jan 2019

Guaranty Trust Holding Co.

- Supported corporate budgeting, forecasting, and monthly financial reporting activities.
- Performed detailed variance analyses across revenue, operating expenses, headcount, assets under management, and profitability metrics.
- Assisted with annual operating plan development and quarterly forecast updates.
- Created financial models supporting business growth initiatives and operational efficiency projects.
- Developed management reporting dashboards and automated recurring reporting processes.
- Partnered with accounting and operational teams to improve financial reporting accuracy and data governance.
