## TECHNICAL SKILLS

---

**Languages:** Java, SQL, JavaScript/TypeScript, HTML/CSS, Python

**Frameworks & Libraries:** Spring (+ Security), Vue.js, React, Next.js

**Cloud & Tools:** AWS (S3, EC2, IAM, VPC), Docker, Linux, Nginx, Git/GitHub, Postman, Redis

**AI Tools:** Github Copilot, Claude, ChatGPT

## PROJECTS

---

**County Data Webapp – Software Developer** | *Spring Boot, Vue.js, AWS* August 2024 – May 2025

- Collaborated on a 6-person Agile team to develop a multi-tenant parcel lookup SaaS (3 counties, 300,000 records) with role-based access control.
- Built an ETL pipeline for data ingestion, normalization, and publication to a Postgres database, processing 150,000 records under 60 seconds.
- Secured REST APIs with **Spring Security**, **JWT authentication**, and **Redis**-based one-time tokens.
- Automated subscription billing via **Authorize.net** Subscriptions and signed webhooks, designed to replace a manual QuickBooks renewal workflow ( 2 hrs/month admin effort).
- Wrote unit tests (**JUnit**, **Mockito**) and integration tests (**MockMvc**, **Testcontainers**, **Redis**).

**WJLC Learning – Volunteer Web Developer** | *Next.js, TypeScript* November 2025 – January 2026

- Partnered with a non-technical client to translate loosely defined goals into a marketing site, replacing an outdated site with a streamlined flow that makes it easier for parents to inquire about tutor sessions.
- Built reusable, responsive UI components (hero with CTAs, carousel, trust section, footer) in Next.js with TypeScript.
- Deployed the site on Vercel and configured DNS through GoDaddy so changes merged to the main branch automatically build and deploy.

**Portfolio Site** | *Vue.js, Docker* February 2025 – Present

- Built a CI/CD pipeline using GitHub Actions for a low-resource EC2 instance (1GB RAM), offloading builds to avoid memory issues during deployment.
- Configured Nginx + TLS + Cloudflare DNS for secure deployment and traffic proxying.

## EXPERIENCE

---

**CS Instructor — Mind Sound School** January 2026 – Present

- Created and taught a newly established CS course, providing 1-on-1 programming lessons to 6 students in Scratch and introductory Python

## EDUCATION

---

**Texas Christian University**

*Bachelor of Science in Computer Science*

*May 2025*
