Professional Summary

Analytical and results-driven IT professional with comprehensive expertise in cybersecurity, cloud administration, and DevOps automation. I hold certifications in CompTIA Security+, CompTIA CYSA+, CompTIA Security Analytics Professional (CSAP), Microsoft Certified: Fabric Analytics Engineer Associate, Microsoft Certified: Power BI Data Analyst Associate, Microsoft Certified: Azure Administrator Associate, and Microsoft Certified: Azure DevOps Engineer Expert. I excel at designing and managing secure, scalable cloud solutions while implementing CI/CD pipelines through Infrastructure as Code. Leveraging my AZ-400 skills, I develop and orchestrate continuous integration workflows using Azure Pipelines and GitHub Actions, engineer robust release strategies, and automate deployments to ensure rapid, reliable delivery of applications. Adept at integrating security best practices into agile environments, I am committed to enhancing operational efficiency and protecting mission-critical data.

Core Competencies

- **Cybersecurity & Risk Management:**
 - Threat Detection & Incident Response
 - Vulnerability Assessments & Security Audits
 - SIEM Monitoring & Regulatory Compliance (NIST, ISO)
- **Cloud Infrastructure (Azure):**
 - Azure Administration (Virtual Machines, Networks, Storage)
 - Identity & Access Management (Azure AD)
 - Cloud Security & Governance
- **DevOps & Automation:**
 - CI/CD Pipelines & Release Management
 - Infrastructure as Code (ARM Templates, Terraform)
 - Automation & Configuration Management (PowerShell, Azure CLI)

- **Collaboration & Project Leadership:**

- Cross-functional Team Coordination
- Agile Methodologies & Continuous Improvement
- Effective Communication & Technical Documentation

Professional Experience

Cybersecurity & Cloud Engineer

Colonial Life & Accident Insurance Company. Riverside CA.

May 2022 – Present

- **Secure Cloud Design & Administration:**

Architected and maintained Microsoft Azure environments in alignment with **AZ-104** standards—managing virtual machines, storage solutions, secure networks, and identity services, while maintaining compliance with industry frameworks.

- **DevOps Automation & CI/CD Implementation:**

Developed and managed robust CI/CD pipelines using Azure DevOps tools and Infrastructure as Code practices (ARM/Terraform), reducing deployment errors and accelerating release cycles in accordance with **AZ-400** best practices.

- **Security Operations & Incident Response:**

Employed CSAP principles to design and implement proactive threat detection mechanisms and incident response protocols utilizing SIEM and other monitoring tools, leading to a measurable reduction in risk and improved system uptime.

- **Cross-Functional Collaboration:**

Partnered with development, QA, and operations teams to integrate security protocols into continuous integration processes and provided technical guidance on cloud and cybersecurity best practices.

IT Systems & Network Administrator

ABC Legal Services, San Diego CA.

January 2018 – May 2022

- Managed hybrid IT environments (on-premise and cloud) with a focus on enhancing performance, security, and disaster recovery preparedness.
- Implemented automation for routine tasks using scripting tools (PowerShell, Azure CLI), leading to a 25% reduction in operational downtime.
- Conducted security training sessions and developed documentation to ensure compliance with internal policies and regulatory requirements.

- **Certifications**
- **PMI – Project Management Professional (PMP)**
- **ISC2 - Certified in Cybersecurity**
- **CompTIA Security+**
- **CompTIA CYSA+**
- **CompTIA Security Analytics Professional (CSAP)**
- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)**
- **Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)**
- **Microsoft Certified: Azure Administrator Associate (AZ-104)**
- **Microsoft Certified: Azure DevOps Engineer Expert (AZ-400)**

Education

Bachelor of Science in Economics

University of Abuja, FCT, Nigeria • 2009

Additional Information

Key Projects:

- Successfully migrated on-premise systems to Azure with zero downtime while integrating automated security checks.
- Developed end-to-end DevOps pipelines, improving deployment frequency by 40% and enhancing system resilience.

Professional Development:

Regular participant in industry conferences and continuous learning through webinars and advanced courses in cloud security and DevOps.
