

ABDUL REHMAN
M.E ELECTRICAL ENGINEERING

INFORMATION

Birthday: 1991-11-14	Email work :rehman_abdul@apple.com
Nationality: Pakistani	Email personal : abdulrehman_ee12@yahoo.com
Years of Working: 6+	Mob : +1(929) 760-6836

SUMMARY

Address: 45th Street Woodside NYC, NY 11377

More than 6 years of work experience as a Software development and integration. Flexible and quickly integrate into a new team. Consistent towards achieving targets. Strong ability to learn and have the keen interest to learn new technology in a short period of time. Have the high spirit of hard working. Strong enthusiasm for latest technology. Confident, optimistic, an excellent presentation skill and have a strong sense of responsibility.

SKILLS

- Languages : C/ C++ , Rust, Lua , Python, ShellScript
- IDE & Tools : Eclipse, GitLab, GitHub, Jira , Gerrit
- Operating System : Linux , IOS
- Framework : Elvis, JCAT

WORK EXPERIENCE

2023.08 – 2024.06 Metron Shenzhen Limited

Position : Test Development Engineer

Responsibilities: (APPLE IPad NPI PROJECT)

Shenzhen, China

- Develop the test sequence for automation testing to calibrate the test fixtures.
- Design, develop, optimize, review and debug the error during testing procedure.
- Collaborate with cross functional teams to specify and implement test coverage.
- Run simulations or experiments to make data driven decisions and presenting results to senior management.
- Specify and acquire instruments, components and tools for use in a NPI environment
- Balance decisions between engineering asks and manufacturing efficiency while ensuring product quality.
- Deploy calibration and performance verification stations throughout the NPI cycle
- Generate reports that analyze large amounts of NPI touch performance data

2022.08 – 2023.08 Espressif Systems (Shanghai)Co.,Ltd

Position : Embedded Software Engineer

Responsibilities: (IEEE802.15.4 PROJECT)

Shanghai, China

- **Primary (C/C++ Developer)**
 - Design, build, and maintain efficient, reusable, and reliable C/C++ code for Zigbee and matter SDKs.
 - Provide technical support to customers according to customer requirements
 - Product field application debugging.
-

- Design verification methodology based on functionality designs and failure points
- Validate the new features by running the automation tests and integration test for chip level and unit level verification
- Collaborate with system-level and design verification engineers to add more functionality into existing SDKs.
- Reviewing existing engineering criteria for similar products
- Write verification plans, specifications and documentation

2018.07 – 2022.08 CTeNET Technologies (Nanjing)Co.,Ltd

Position : Software Development Engineer

Responsibilities: (ERICSSON PROJECT)

Nanjing, China

- Primary (C/C++ Developer)

- Design, build, and maintain efficient, reusable, and reliable C/C++ code
- Debug and Troubleshoot the Basic Test to check the validity of coding
- Work closely with other engineers to develop new products
- Work on extensions of existing products
- Responsible to hold the technical meetings with feature stakeholders
- Attend the meetings and presentations for the new feature requirements
- Interact with Customer's CU Engineer to explain the feature functionality
- Strong knowledge of the UNIX/Linux Operating system
- Familiar with Agile process, source code version tools, e.g. Jira/Git/Gerrit;

-Secondary (I&V Node Testing)

Responsibilities:

- Setup the WCDMA , LTE node Testing environments using (Linux , Moshell)
- Configure RBS for WCDMA and LTE nodes
- Pre-study the new features introduced and run the test cases accordingly to verify the feature functionality
- Arrange the workshop and presentations for the new introduced feature and attend the meetings

PROJECT EXPERIENCE (ERICSSON PROJECT)

2018.07 – 2018.11 MR1177-4

Testing

Description: (Test the Multi operator Radio Access Network)

Responsibilities: Responsible to setup the test environment using the required configuration and perform the test cases to verify the feature functionality.

2018.11 – 2019.02 MR3265-2

Coordinate with Customer CU Engineer

Description: Optimized Antenna Selection

Responsibilities: Responsible to interact with customer CU Engineer to explain the feature functionality and site selection process to execute the live test in customers real environment.

2019.03 – 2019.09 MR6211-4

Developer

Description: *Replace the legacy way of handling license and add new alarms*

Responsibilities: The main responsibility was to pre-study the feature and understand the required solution and do development work for WG1, and add new block test case to verify the code implementation.

2019.10 – 2020.02 MR3374-1

Developer

Description: *Baseband Power Saving Mode*

Responsibilities: Responsible to raise the alarm in WRAT when baseband is in power-saving mode and operator tries to unlock the more cell capacity, to let the operator know that baseband is in PSM, first need to exit the PSM mode then more resource can be enabled

2020.03 – 2020.08 MR4111-7

Developer

Description: *More Improved Alarm Text*

Responsibilities: Responsible to analyze the code and identify the missing alarm texts that need to be documented and drive the feature during pre-study and development phase by holding the technical meeting with stakeholders.

2020.09 – continue SST Refactor Test cases (Java)

Developer

Description: *Refactorize Radio SW Test cases*

Responsibilities: Responsible to analyze the test cases and refactorize/re-develop them to make test cases more efficient and used commonly by removing the hard code and adding new common functions instead. Also, responsible to test those refactorize test cases on STP and daily wash loops.

2021.04 – 2021.08 Main track loops Monitoring

Developer

Description : *Monitor the radiosw delivery track loops*

Responsibilities: Responsible to Monitor the radiosw delivery main track loops and analyze the root cause in case of failure or any ambiguity and responsible to fix the issue to keep the delivery of Main track open.

2021.08 – 2022.01 MR7777-6

Developer

Description : *Dynamic Latency handling for C1 Radios*

Responsibilities: Responsible to design the solution for radios uplink handling process for latency handling to implement & support the new time alignment model using CPRI to compensate the delay of BFN number.

2021.01 – 2022.07 MR5234-6

Developer & Tester

Description : Add New CarrierType of 7.5Mhz for General radios

Responsibilities: Responsible to implement the solution in radiosw to add the new CarrierType of 7.5Mhz for general radios and also verify the basic measurements on spectrum for new added CarrierType to see if the carrier setup successfully.

PROJECT EXPERIENCE (IEEE802. 15.4)

2022.08 – 2022.11 Learn the IEEE802.15.4 protocols for Zigbee and Matter

Description : Get familiar with the Zigbee and Matter SDK APIs to add more features

Responsibilities: Responsible to add new features (such as customized cluster, OTA cluster and commands to the existing Zigbee and matter SDK) and verify their functionality to support more features for home automation applications.

2022.11– 2023.08 Improve the Espressif SDK and Customer support

Description : Add pytest for CI integration and Provide customer support

Responsibilities: Responsible to add pytest scripts to verify APIs functionality during CI test for Zigbee SDK and provide customer support to initialize and provision the matter projects over thread based on esp32C3, esp32C6, esp32h2 chips.

PROJECT EXPERIENCE (APPLE iPad NPI)

2023.08 - 2024.06 Touch Station DRI

Description : Support the iPad NPI build for touch stations calibration and measurement

Responsibilities: Responsible to develop the test sequence to calibrate the touch performance and analyze the build data and touch station performance reports to ensure the test coverage and measured data applied as expected

EDUCATION

2015.09-2018.07 Southeast University (86.5 %) Master of Engineering (Electrical Engineering)

2010.11-2014.06 University of Engineering and Technology (Taxila) Pakistan (3.78 CGPA) BSc Electrical Engineering

AWARDS /ACHIEVEMENT

- Received Excellent Team Award from ERICSSON (2020).
- Got fully funded Scholarship for M.Sc in China.
- 3rd position in Electrical Engineering Batch 2010-2014
- First position in own section in Electrical Department
- Topper of School and College

Miscellaneous

Language Skills : English , Urdu , Hindi , Chinese

Excellent Communication, Interpersonal & Team Management Skills
