SUMMARY

- Over 5 years as a Business Analyst, focusing on process enhancement, documentation, and data analysis in finance, insurance, and healthcare.
- Expertise in creating comprehensive Business Requirements Documents (BRDs) and Functional Specifications (FSDs) to align projects with stakeholder needs.
- Proficient in data analysis using Tableau, Power BI, and Excel, driving data-driven decisions and improving reporting efficiency.
- Skilled in Agile methodologies, facilitating scrum meetings, sprint planning, and managing backlogs for timely project delivery.
- Experienced in process optimization through Gap, SWOT, and Impact analyses, enhancing operational efficiency and client satisfaction.
- Technical skills in SQL, Python, and R for data manipulation and analysis, supporting advanced data solutions.
- Strong cross-functional collaboration with development, testing, and business teams to optimize processes and ensure alignment.
- Familiar with project management tools like MS Project, Jira, and Asana to manage timelines and resources effectively.
- Advanced documentation skills, including UML diagrams and process flows, ensuring clear communication of complex systems.

SKILLS

Methodologies:	SDLC, Agile/Scrum, Waterfall, Kanban
Programming Languages:	SQL, R, Python
Documentation:	FRD, BRD, SRS, BPMN, Test Plan, User Guide, User stories, Use Cases.
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Asana, Trello, Jira, Rally
Visualization Tools:	Tableau, Power BI
ERP Planning and CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Analysis Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking / Other Skills:	Jira, Microsoft Visio, JAD, Rational ClearQuest, RTM, UAT, KPI, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS Office, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication.
Operating System:	Windows, Linux, Mac OS

EXPERIENCE

MetLife, New York Data Analyst	Sept 2023 – Current
• Led critical business analysis initiatives for MetLife's Group Benefits digital transformation project, enhancing documentation processes across the product lifecycle and increasing operational efficiency by 40%. • Developed sophisticated Excel macros and standardized reporting templates for MetLife's Retirement & Income Solutions division, resulting in a 30% increase in test completion rates and streamlined scheduling for UAT conduct. • Utilized SQL to extract and analyze customer data from MetLife's policy database, enabling the development of detailed reports and providing insights for Retirement & Income Solutions, reducing data retrieval time by 20%. • Implemented a comprehensive knowledge management system for MetLife's Property & Casualty business unit, optimizing the employee onboarding process and reducing administrative task time by 25% per project. • Authored high-quality Project Plans, Business Requirements Documents (BRDs), Functional Specification Documents (FSDs), User Stories, API documentation, and Wireframes for MetLife's core insurance platform upgrade, ensuring 100% alignment with BABOK guidelines. • Leveraged Tableau to design and build interactive dashboards for MetLife's underwriting department, incorporating advanced data manipulation techniques such as grouping, sorting, filtering, and ranking to provide actionable insights on policy risk assessment.	

- Developed Python scripts to automate data cleaning and validation processes, improving the accuracy of weekly and monthly reports for MetLife's life insurance product lines and reducing manual effort by 30%.
- Collaborated with QA teams to document and track bugs in JIRA during the rollout of MetLife's new claims processing system, ensuring prompt resolution and maintaining a 98% on-time delivery rate for sprint goals.
- Created detailed UML diagrams including Use Cases, process flows, activity diagrams, class diagrams, and sequence diagrams to validate and optimize MetLife's customer onboarding and policy issuance processes.
- Facilitated cross-functional communication between development, testing, and business teams to identify gaps, improve application quality, and prioritize feature requests for MetLife's mobile app enhancement project.
- Implemented SQL queries to analyze annuities management system data, supporting product owners in crafting precise business requirements and maintaining a well-groomed product backlog.
- Conducted regular data analysis to uncover market opportunities, track product performance metrics, and drive data-informed decision-making processes for MetLife's Asia and EMEA business segments.
- Employed Agile methodologies throughout the project lifecycle, facilitating daily scrum meetings and bi-weekly sprint planning sessions to ensure continuous improvement and timely delivery of MetLife's customer service chatbot initiative.

Capgemini, India
Business Analyst

Feb 2018 – Jul 2022

- Led a comprehensive business process analysis for Capgemini's global banking client, identifying system deficiencies and proposing enhancements to the customer onboarding notification system, resulting in a 35% improvement in client satisfaction scores.
- Spearheaded the development of a cutting-edge client portal using Agile methodologies, enabling users to customize communication preferences and achieving a 40% increase in user engagement during the onboarding process.
- Developed SQL queries to analyze customer onboarding data, identifying trends and discrepancies, which improved the accuracy of Tableau dashboards used to track real-time onboarding KPIs for stakeholders.
- Facilitated daily scrum meetings and bi-weekly sprint planning sessions, utilizing Agile project management tools to maintain a well-groomed product backlog and achieve a 95% on-time sprint completion rate.
- Developed comprehensive weekly and monthly reports using advanced MS Excel techniques (VLOOKUP, Pivot Tables, Conditional Formatting) and created impactful PowerPoint presentations, improving C-suite decision-making processes.
- Orchestrated the creation and review of business requirements, functional specifications, and project documentation using MS Project, MS Visio, and Rational Suite, achieving a 98% stakeholder approval rate for deliverables.
- Conducted extensive Joint Application Design (JAD) sessions with Subject Matter Experts (SMEs) to elicit, analyze, and document Credit Card process requirements, resulting in a 20% reduction in requirement ambiguities.
- Collaborated with ETL specialists to develop Python scripts for automating the extraction and transformation of large datasets, ensuring seamless data migration with 99.9% accuracy during the client's legacy system upgrade.
- Authored a comprehensive User Interface manual for web users, aligning GUI functionality with business needs and compliance standards, leading to a 30% decrease in user onboarding time.
- Co-authored the Business Requirements Document (BRD) with key stakeholders, employing BABOK-guided techniques to extract, refine, and prioritize business requirements, achieving 100% traceability to project objectives.
- Conducted in-depth analysis of automated and manual business processes, identifying optimization opportunities that led to a 25% increase in operational efficiency for the credit card application workflow.
- Utilized SQL to perform data integrity checks on credit card application workflows, leading to a 25% increase in operational efficiency by identifying and resolving data-related bottlenecks.
- Utilized Unified Modeling Language (UML) to design and develop Use Cases, Use Case Diagrams, and Activity Diagrams, enhancing system understanding and facilitating efficient communication across development teams.
- Collaborated with QA teams to develop and execute a comprehensive test plan, ensuring 95% test coverage aligned with project requirements and resulting in a 40% reduction in post-deployment issues.
- Facilitated user acceptance testing (UAT) sessions, documenting and prioritizing feedback to drive iterative improvements, ultimately achieving a 92% user satisfaction rate for the new credit card processing system.

EDUCATION

Pace University, Seidenberg School of Computer Science, and Information Systems	New York, New York
Master of Science in Information Systems Concentration: Business Analytics Honors: GPA: 3.6	May 2024
