### Java Developer

- ✓ 4+ Years of software development experience in all the phases of the Software Development Life Cycle (SDLC), including requirement Analysis, Design, Implementation, and product testing in both web-based and Enterprise applications, emphasizing object-oriented, Java/J2EE, SQL, Python, and Client Server technologies.
- ✓ Experience with Oracle,SQL and/or other RDBMS.
- ✓ Extensive experience in developing various web applications using Monolithic, Microservices architecture using the technologies like Servlets, JSP, Struts, JSF, Spring boot, Spring I/O, Spring Rest, Spring Core, Spring MVC, Spring AOP, Spring Data, and Spring JPA.
- ✓ Expertise in using Angular
- ✓ Experience with AWS (IAM, S3)
- ✓ Expertise in using Hibernate ORM for implementing persistence context using JPA.
- ✓ Expertise in working with Java 8 features like Functional Interfaces, Lambda functions, Stream API, Time API, Collection API and data Structure.
- ✓ Experienced in Agile development environment (Jira).
- ✓ Experience in working with various version controlling tools like Git, SVN, and Project management tool like Jira.
- ✓ A natural problem-solver ; quick learner.
- ✓ Positive, collaborative and constructive – a true team player.

### PROFESSIONAL EXPERIENCE:

---

#### **Java developer**

**Mars 2022 to May 2024**

#### CEGEDIM Insurance Solutions

- Designing, implementing, and maintaining Java applications.
- Worked with Microservice architecture using Spring Boot to modularized code and implemented Rest API's using Spring Rest and integrated Swagger API for documentation.
- Created Actions and action mappings for Struts and consumed data from backend to display on the UI template pages.
- Developed apps using AngularJs/Angular
- Developed the functionalities under Agile Methodology, JIRA processes and used JIRA for task assignment, bug tracking and fixture.
- Developed REST Web Services using Spring Rest.
- Developed/Customized Java Server Pages (JSP) for Customer UserInterface (UI).
- Developed UI pages using HTML5, CSS3, JavaScript, JSON.

- Developed application using OOPS concepts and design patterns such as Singleton, Abstract Factory.
- Developed backend logic using Core Java including Collections, Stream API and Exception Handling.
- Worked with Log4J to capture the log that includes runtime exceptions.
- Project code build is done using Maven tool.
- Experience in working with different Databases Oracle 11g, MySQL, NoSQL Databases such as MongoDB.
- experience in unit testing using Junit/Mockito.

**Environment :**

JAVA 7/8, J2EE, Core Java, Cobol, Spring IOC/AOP/CORE, Spring Boot, AngularJS/Angular, Struts, JavaScript, Rest web Services, jQuery, HTML5, CSS3, ORACLE, Hibernate, Mockito, GIT, Jenkins.

**Java developer**

**Dec 2019 to till Mars 2022**

**CEDAMUS**

- Designing, implementing, and maintaining Java applications.
- Developed and implemented the MVC Architectural pattern using STRUTS 2.x framework in monolithic application.
- Participated in front end development using JSF 2.0, JavaScript, HTML 5, CSS 3.0.
- Developed REST Web Services using Spring REST framework with data representation in different formats such as XML and JSON. .
- Involved in various phases of Software Development Life Cycle (SDLC) on the application like Requirement gathering, Design, Analysis and Code Development.
- Experience with data entry and writing queries in SQL
- Project code build is done using Maven tool.

**Environment :**

JAVA 7, J2EE, Core Java, Spring IOC/AOP/CORE, JSF, Primer faces, Struts, JavaScript, REST Web Services, jQuery, HTML5, CSS3, Ajax, ORACLE, Hibernate, Mockito, SVN, Jenkins
