Professional Summary

Cloud-focused IT professional with hands-on experience in AWS services, infrastructure management, and Python programming. Strong foundation in cloud computing, object-oriented programming, and scalable system design, with practical experience deploying and monitoring cloud-based solutions.

Education

Master of Science in Information Technology Management

Oct 2023 – Aug 2025

Indiana Wesleyan University, Merrillville, IN

GPA: 3.12 / 4.0

- Relevant Coursework: Cloud Computing, Database Management Systems, Operating Systems, Object-Oriented Programming, Data Structures & Algorithms, Generative AI, Machine Learning Foundations

Professional Experience

AWS Cloud Intern

Jan 2022 – Present

AICTE– Remote

- Completed structured internship focused on AWS cloud fundamentals and hands-on labs.
- Worked with core AWS services including EC2, S3, IAM, VPC, and CloudWatch.
- Deployed and managed EC2 instances and S3 storage solutions.
- Implemented IAM users, roles, and policies for secure access control.
- Monitored cloud resources and performance using CloudWatch.
- Strengthened understanding of scalability, high availability, and AWS shared responsibility model.

Cisco Networking

Jun 2021 – Sep 2021

– Remote

- Built strong foundation in programming concepts including data structures, algorithms, and OOP.
- Developed Python programs with focus on debugging, testing, and clean code practices.
- Applied object-oriented principles including classes, inheritance, and encapsulation.

Technical Skills

Programming Languages: Python, SQL

Frameworks: FastAPI, Odoo

Cloud: AWS (EC2, S3, Lambda, DynamoDB, ECS, EKS, VPC, CloudWatch)

Containers: Docker, Kubernetes

Databases: PostgreSQL, DynamoDB

DevOps: Git, GitHub Actions, Linux/Unix

Concepts: REST APIs, Microservices, Distributed Systems

Networking: OSI Model, VPC Networking, Cloudflare Tunneling

AI Tools: GitHub Copilot, ChatGPT, Claude AI

Technical Projects

Phishing Websites Feature Classification Based on Extreme Learning Machine (Major Project) 2022

Python, Machine Learning

- Developed ML model to classify phishing vs legitimate websites using feature-based analysis.
- Applied the Extreme Learning Machine algorithm to achieve fast training and effective classification performance.
- Performed data preprocessing and feature extraction to improve model accuracy and robustness.
- Used this project to strengthen understanding of supervised learning, cybersecurity threats, and practical ML implementation.
