Education

DePaul University

Master of Science in Business Analytics; GPA: 4.00

Jan. 2023 – Nov. 2024

Chicago, Illinois

Jawaharlal Nehru Technological University

Bachelor of Technology in Computer Science; GPA: 4.00

Sept. 2018 – July 2022

Hyderabad, India

Experience

Deeproot

Business Analyst Intern

Jun 2024 - Aug 2024

Remote, USA

- Designed Tableau dashboards for real-time KPI tracking, saving 20+ hours weekly, and standardized data with a centralized dictionary for consistent reporting and market segmentation on student flow to IT sector.
- Conducted detailed market research, market size calculation, performed business analysis, and updated various business decks while, performing in-depth industry research and market analysis by collaborating with key stakeholders to support global EOR strategy and strategic initiatives.

ICRISAT

Research Analyst Intern

June 2022 - Dec 2022

Hyderabad, India

- Led an experimental project on crop responses to water conditions and bio-irrigation treatments using Agile methodology with iterative sprints, overseeing tasks from planting and monitoring growth to soil analysis.
- Conducted in-depth data analysis using SQL and MS Excel, leveraging macros and pivot tables to process frequently collected crop growth data for insights and optimization.
- Applied statistical techniques such as Chi-square tests and t-tests to evaluate the efficacy of bio-irrigation treatments, with a focus on mycorrhiza, ensuring continuous feedback and improvement in crop production practices.

SKLTSHU

Product Development and Process Improvement Analyst

Jan 2022 - Jun 2022

Telangana, India

- Led product development by transforming horticultural crops into value-added, preservative-free products, while conducting product testing and implementing marketing strategies that emphasized the purity, sustainability, and natural essence of the products.
- Utilized Jira for designing and managing workflows, implementing Business Process Management (BPM) principles to streamline operations, track task progress, and ensure alignment with business objectives, contributing to overall process efficiency and continuous improvement.
- Leveraged Tableau to visualize and analyze key business processes, developing interactive dashboards to monitor performance, identify bottlenecks, and support data-driven decision-making for process optimization and quality management strategies.

ATGC Biotech

Student intern

Oct 2021 - Dec 2021

Hyderabad, India

- Gained hands-on experience in product analysis during the testing phase of AKARSH ME, a pheromone-based pest control solution designed to disrupt fruit fly mating cycles and mitigate pest populations, while conducting live demonstrations in both field and laboratory settings to build farmer confidence and showcase product efficacy.
- Collaborated with stakeholders and worked cross-functionally to align pest control initiatives with business goals, analyzing data from fruit farmers in Telangana using Excel (VLOOKUP, pivot tables) to draw actionable insights and provide technical recommendations for product adoption and improved pest management strategies.

Technical Skills

Skills: Agile methodology, SWOT analysis, GAP analysis, Root Cause Analysis, Predictive Analytics, Statistical Analysis, Market research, Market size calculation, Analytical skills, Project Management, KPI Dashboards, Business Process management
Technologies: MS Office suite, Advanced Excel, Windows XP/7/8/10/11, R, SQL, Tableau, SAS, MS Visio, JIRA

Projects

Enhancing Driver Safety through Data-Driven Risk Management | *Tableau, R, Python, Pandas*

- Developed a predictive analytics model using **R**, incorporating Random Forest and K-Means clustering to classify driver behaviors into High-Risk, Moderate-Risk, and Low-Risk groups.
- Designed Tableau dashboards to highlight high-risk divisions, enabling targeted safety interventions and operational improvements.
- Proposed tailored strategies, such as psychometric testing and route optimization, reducing safety incidents and operational costs, and Emphasized real-time data integration and adaptive modeling for long-term risk management improvements.

Business Process and Financial Analysis: Starbucks vs. McDonald's Comparative Study |

- Conducted a comprehensive business performance analysis of Starbucks and McDonald's by evaluating their financial reports, focusing on key metrics such as revenue, profit margins, and market share, to determine their investor attractiveness and long-term growth potential.
- Analyzed cash flows and operational efficiencies, comparing Starbucks' emphasis on store operations with McDonald's franchising model, identifying areas for improvement and providing insights into both companies' cost management strategies.
- Utilized a blend of quantitative metrics and qualitative research to deliver a comparative analysis that informed investment decisions, providing actionable insights into the companies' financial health and growth prospects.

Consumer Behavior Analysis for ShopCo | *R Programming*

- Analyzed the effect of real-time messaging on sales using **R**, revealing a significant sales boost among recipients, particularly females and consumers aged around 30.
- Identified correlations between real-time messaging and consumer loyalty, providing actionable insights for tailored marketing strategies and recommended leveraging targeted mobile app advertising to enhance engagement and growth further
