Professional Summary

Information Science graduate and data analyst with hands-on experience in Python, SQL, and web technologies. Skilled in processing, analyzing, and visualizing large datasets using pandas, NumPy, Tableau, and Excel. Proven ability to streamline workflows and support data-driven decision-making. Passionate about leveraging AI-driven analytics to solve complex business challenges.

Education

University of Maryland, College Park

Bachelor of Science, Information Science

- GPA: 3.73/4.00

May 2023

College Park, MD

Technical Skills

- **Programming & Web:** Python, R, SQL, JavaScript, HTML, CSS
- **Data Analysis & Visualization:** Excel, Tableau, pandas, NumPy
- **Artificial Intelligence & Platforms:** Artificial Intelligence, AI Platforms - Claude, AI Platforms - Codex, AI Platforms - Gemini, AI Platforms - OpenAI
- **Databases, Integration & Methodologies:** Databases - NoSQL, API Integration, Agile

Experience

House of Cheesesteaks

Jan 2026 - Present

Restaurant Operation Assistant

Clinton, MD

- Supported day-to-day restaurant operations including inventory management, ordering, cashier transactions, and customer service in a fast-paced environment.
- Managed stock levels of food and supplies, assisting in ordering and restocking to ensure consistent product availability and reduce shortages.
- Handled point-of-sale (POS) system transactions and assisted with front-of-house and back-of-house operations.

DMV.Heats

Sep 2019 - Present

Founder

Silver Spring, MD

- Founded and manage a successful reselling business overseeing inventory management, demand forecasting, and supply chain logistics.
- Increased profit margins by 35% through data-driven forecasting and optimized stock rotation strategies.
- Drove \$5,000+ in sales and reduced excess inventory by 25% by aligning purchasing with market demand trends.
- Implemented efficient inventory tracking systems to improve order accuracy and streamline fulfillment operations by 30%.
- Built strong vendor relationships to enhance procurement efficiency and ensure consistent product availability.
- Developed and executed business strategies to improve inventory turnover, profitability, and alignment with customer demand in a competitive resale market.

HeiTech Services (FDA)

Aug 2023 - Sep 2024

Data Analyst

Landover, MD

- Streamlined data reporting workflows by processing and analyzing 300+ reports daily, ensuring accuracy and regulatory compliance.
- Applied data analysis and inventory control principles to manage record classification, lifecycle tracking, and quality assurance.
- Collaborated across departments to reconcile and resolve data discrepancies, improving report accuracy by 20%.
- Supported process improvement initiatives by identifying trends and enhancing data accuracy across multiple tracking systems.

Sanofi US Pharmaceutical

May 2022 - Aug 2022

Records and Info Management Intern

Washington, DC

- Applied records management policies and procedures to various electronic records systems and workflows.
- Supported the delivery of NA RIM services and special projects with emphasis on eArchiving initiatives and digital strategies.
- Facilitated the data migration of 8,000+ data points to new and more concise datasets.
- Assisted in record transfer and data management activities, i.e. data entry, approving transfers like inventory movement and tracking.

Projects

No Anxiety Prep Capstone Project | HTML, CSS, JavaScript, Figma

- Demonstrated strong project management skills as a team lead, adhering to strict schedules and maintaining consistent communication.
- Utilized Figma to create wireframes for successful website redesign, displaying expertise in user-centered design principles and leveraging technology for solutions using the Agile development process.
- Crafted a comprehensive social media strategy plan, combining analytical insights with creativity to optimize online presence and customer engagement.

Covid Vaccination Dataset | Python, Pandas

- Plotted numerous graphs on COVID vaccination by counties in Maryland using pandas.
- Visualized data to determine the relationship between race and vaccination status.

Kickstarter | R

- Implemented fundamental statistical concepts including measure construction, data exploration, hypothesis development, hypothesis testing, confidence interval, normalization, etc. using R Studio.
- Analyzed the Kickstarter database to analyze data on various types of projects in the United States in order to answer questions related to the cost, timing, and validity of a given campaign.

Washington Wizards SQL Database | SQL

- Created a Washington Wizards database, which included the roster, games played in the previous four seasons, coaches, and team states.
- Inserted, updated, debugged, normalized, and applied CRUD (Create, Read, Update, Delete) to queries.
