EDUCATION

University of Nevada - Las Vegas

Bachelor of Science in Engineering: Computer Science

GPA: 3.64

RELEVANT COURSEWORK

Internet Security: Learned the basics of various cybersecurity concepts with an emphasis on penetration testing. Learned and applied concepts such as SQL injections with the use of tryhackme.com.

Coding for Data: Learned how to code for data analyst with emphasis on SQL relational databases and Python. Learned Python libraries used to access and visualize data, such as plotly.express and pandas.

TECHNICAL SKILLS

Languages: C++, SQL, Python

Familiar: Java, x86, JavaScript, HTML, CSS

Operating Systems: Windows, Linux (VM), macOS

Tools: Visual Studio Code, Microsoft Visual Studio, CLion, WSL, Virtualbox

PROJECTS

AccessMap (MERN MongoDB, Express, React, Node.js)

August 2025 - December 2025

- An accessibility focused web application designed for event coordinators to create a dynamic map layout.
- Utilizes [Leaflet.js](#) and OpenStreetMaps for the map background and users are able to search for the desired area.
- Uses JWT for secure authentication for creating and logging into an account, and JWT tokens are used for session management.
- Event Coordinator are able to use XLSX sheets to import stalls or vendors participating in the event.

Real Time Chat App (MERN MongoDB, Express, React, Node.js)

September 2025

- Develop a full-stack realtime chat application that allows for live interaction amongst users.
- Uses [Socket.io](#) for bidirectional communication between users and allows the users to see who is online or offline.
- Uses JWT (jsonwebtoken) for secure authentication for creating and logging into an account, and JWT tokens are used for session management.
- Built responsive frontend with React and use React-router to create routes with [Node.js](#) and Express. Lastly, messages and user information are stored in MongoDB database and images are stored in Cloudinary (cloud-based media management platform).

Analyzing Website Performance of the Grammys (Python)

October 2025

- Analyzed the performance between the split of the Grammys' website and The Recording Academy's website
- Used plotly.express in order to visualize the data and pandas in order to read the data.
- Found that the Grammys website had more visitors compared to The Recording Academy and the metrics of the Grammys' website was overall better.
- Recommended that the Grammys and The Recording Academy

WORK EXPERIENCE

Teaching Assistant: *University of Nevada, Las Vegas*

August 2024 - May 2025

- Being able to read other people's code and help debug issues and help solve any issues in the code during office hours.
- Help grade assignments and give students constructive feedback to improve their coding skills.

ORGANIZATIONS

UNLV Layer Zero

February 2025 - December 2025

- Layer Zero is a cybersecurity club that hosts workshops to help and prepare students for CTF (Capture the Flag) competitions.
- Teaches various cybersecurity topics and tools, such as NMAP and SQL injections.
