

Rahul A

Email : rahulakula7@gmail.com

Mobile No : (913)608-9198

Professional Summary:

- 4 years of experience in developing web-based applications, software development and design using **Python, Flask, Dispy, Dask and Pyspark**.
- Extensive experience working with **Dask and Dispy frameworks**.
- Experience using different types of IDE's like **Pycharm, Jupyter, Atom**.
- Experience working in **Agile Methodologies, Scrum stories** and **sprints experience** in a Python based environment, along with **data analysis** and Excel data extracts.
- Expertise in Object-Oriented design, Good knowledge of various Design Patterns.
- Proficient in SQL databases **MS SQL, MySQL, Oracle**.
- Hands-on experience in **UNIX and Linux** Kernels.
- Working Experience on various Python packages such as **NumPy, SQLAlchemy, Beautiful soup, pickle, Pyside, Pymongo, Scipy, PyTables**.
- Efficient in using **Python Spark API** and efficient in using **Apache Spark**.
- Efficient in using **Apache Hive** and hive query language.
- Used Hive to analyse data by writing SQL like queries called **HiveQL**.
- Used **Spark SQL** to query structured data inside Spark programs using **Data Frame API or SQL**.
- Basic knowledge in Front end development technologies like **HTML, XML, CSS, JSON and JavaScript**.
- Good knowledge of server **Apache Tomcat, Web logic**.
- Experience in developing web-based applications using **Python, Django, Angular JS, React JS, C++, XML, CSS, HTML, DHTML, JavaScript**.
- Experienced in various types of testing such as **Unit testing, integration testing, User acceptance testing, Functional testing**.
- Good Experience in Infrastructure Development and Operations involving **Google App Engine and AWS Cloud** platforms.
- Exposure in building **CI/CD** pipelines in container-based fashion using **Docker, Jenkins, UBUNTU, Ansible & GitLab**. And Experienced with **GITHUB, GITLAB, SVN and MAVEN build tool**.
- Experienced in writing SQL Queries, Stored procedures, functions, packages, tables, and views.
- Strong skills in writing technical and functional documents defined by the business requirements.
- Good knowledge in various stages of **SDLC** (Software Development Life Cycle), Software Testing Life Cycle (**STLC**) and **QA** methodologies from project definition to post-deployment documentation.
- Maintained Automated Scripts and troubleshoot their issues for each Site Release, Feature and Small Enhancement Project.
- Well experienced in **unit testing, integration testing and end-end testing**.
- Strong understanding of Agile and Scrum Software Development Life Cycle Methodologies
- Experienced in performing tests for nondeterministic code, testing multithreaded code, test design paYerns, and more.
- Involved in the issue resolution and Root Cause Analysis.
- Developmental experience on **Windows 10, UNIX and LINUX** platforms
- Excellent communication and inter-personal skills

Technical Skills:

Programming Languages	Python , JavaScript, C, C++
Deployment Tools	Amazon EC2, S3, Jenkins , Dockers
Web Technologies	HTML, HTML5, CSS3 , JavaScript , jQuery, AJAX
Databases	SQL Server, MySQL , MS SQL, Oracle, Mongo DB, PostgreSQL
Cloud	AWS, Microsoft Azure
Methodologies	Agile/Scrum, waterfall, and TDD
IDE	Visual Studio, PyCharm , jupyter Notebook, Atom
Web frameworks	Django, Flask, React JS , Angular JS, Vue JS, Node JS
Operating Systems	Windows, Unix, Linux, Mac OS

Work Experience:

BNY Mellon – New York, NY
Python Developer

Jan 2023 to Present

Responsibilities:

- Involved in all phases of the project including setting up the initial project, setting up frameworks, documenting the developers guide, creating and supporting implementation plan for production deployment .
- Created estimations for the efforts required to produce end-to-end solutions and led the technical solution development .
- Developed the Parallel Processing method using **Dispy Python Framework** to do the large set of computations in parallel .
- Involved in the development of front end of the application using **Python 3.6, HTML5, CSS3, bootstrap 3.0, AJAX, JSON and JQuery**.
- Wrote **python** scripts to parse **XML** documents and load the data in database and developed web - based applications using Python, CSS and HTML.
- Involved in Development of **Python3.6/Django2.0** based web application using Python scripting for data processing, **MySQL** for the database, and **HTML5/CSS3/jQuery** and High Charts for data visualization of the served pages.
- Involved in development of Python APIs to dump the array structures in the Processor at the failure point for debugging.
- Achieved business process automation via applications developed using **Git, Gerrit, Jenkins, MySQL** and custom tools developed in **Python and Bash**.
- Developed Restful Microservices using Django2.0 and deployed on **AWS servers** using **EBS** and **EC2**.
- Used **Pyspark, SparkSQL** in making pipelines to extract data coming from MDL in spark environment.
- Designed, Configured and managed cloud infrastructures utilizing Confidential Web Services (AWS) including **EC2, Auto-Scaling, Elastic Load Balancer, Elastic Beanstalk, S3, Cloud Front, RDS, VPC, Route53, Cloud Watch, Cloud Formation; IAM, EBS, RDS, SNS, SQS, Redshift**.
- Containerized and Deployed the **ETL and REST** services on AWS ECS through the CI/CD Jenkins pipeline.
- Implemented **Docker** containers to create images of the applications and dynamically provision slaves to Jenkins CI/CD pipelines.
- Implemented programming automations using **Jenkins** and **Ansible** on Unix/Linux based OS over cloud like Docker.
- Utilized **PyUnit**, the Python Unit test framework, for all Python applications and used Django1.11 Database API's to access database objects.
- Written test cases using PyUnit and Selenium Automation testing for better manipulation of test scripts.
- Wrote python scripts to parse XML documents and load the data in database.
- Developed Microservices by creating **REST APIs** and used them to access data from different suppliers and to gather network traffic data from servers.
- Involved in development of Web Services using REST for sending and getting data from the external interface in the JSON format.
- Used **Microsoft SQL** server to store and process the large amount of data .
- Used **NAS** (Network-attached storage) file system to store the data as files .
- Developed **Unix Shell Scripts** for automation .
- **ESP** work station is being used as a scheduler to process the batch .
- Used the Ansible tool to deploy the code into several environments
- Communicated with Business Users to gather requirements, have strong financial background and experience supporting trading systems/environments.
- Incident management - trouble shooting trade issues.
- Automated software configuration and work towards flawless change management .
- Interacted with management to give the status updates
- Excellent troubleshooting ability
- Interacted with **Murex GUI** and murex support team members and gained minimal knowledge on Murex.
- Worked with offshore team to delegate the work to the junior team members of the team

- Involved in **production support** to assist and resolve the issues with production team to resolve the issues in timely manner

Environment: Python 3.2.7, Django, Dispy, Unix, MySQL, Pycharm, Flask, ESP, Docker, Microservices, Jenkins, RestAPI, HTML5, CSS3, XML, GIT, Shell scripting, JIRA, AWS, JavaScript, Ansible, Murex, Incident Management.

Indiglobe IT Solutions
Python Developer

May 2019 to Dec 2021

Responsibilities:

- Involved in requirement gathering, designing, and developing the entire system with Agile-Scrum methodology.
- Designed the Web application Using **Python** on **Django** Web Framework pattern to make it extensible and flexible, implemented code in python to retrieve and manipulate data.
- Developed Merge jobs in **Python** to extract and load data into **MySQL** database.
- Worked on Element Tree **XML API in python** to parse **XML** documents and load the data in database.
- Worked on python-based test frameworks and test-driven development with automation tools.
- Developed a fully automated continuous integration system using **Git, MySQL, Jenkins**, and custom tools developed in Python.
- Worked on server-side applications with Django using Python programming.
- Utilized standard Python modules such as **CSV tools and pickle** for development.
- Worked on **Python OpenStack APIs** and used **Numpy** for Numerical analysis.
- Designed the front end of the application using **Python, HTML, CSS, AJAX, JSON and Query**. Worked on backend of the application, mainly using Active Records.
- Used **PyQuery** for selecting DOM elements when parsing HTML.
- Worked on **React.js** for creating interactive page using One-way data flow, Virtual DOM, JSX, React Native concepts.
- Used **pandas** and made report of daily inventory and sent automated emails used SMTP server to product owner
- Designed and developed the UI for the website with **HTML, XHTML, CSS, Java Script and AJAX**.
- Added support for Amazon **AWS S3 and RDS** to host static/media files and the database into Amazon Cloud.
- Worked on **Python OpenStack APIs** and used **NumPy** for Numerical analysis.
- Successfully migrated the Django database from SQLite to PostgreSQL with complete data integrity.
- Wrote scripts in Python for extracting data from HTML file.
- Created **RESTful API's** calls with server, parse output report of excel files.
- Worked on creation of custom **Docker** container images, tagging and pushing the images.
- Used **Jenkins** to build and troubleshoot automated testing and for continuous integration and deployment.
- Involved in development of Web Services using **SOAP** for sending and getting data from the external interface in the XML format. Responsible for the project monitored on JIRA (Agile).
- Used **GIT** for the version control and deployed project into AWS.
- Create, develop and fine-tuned SQL objects: Tables, stored procedures, views and triggers.
- Installed and maintained web servers **Tomcat and Apache HTTP UNIX**.
- Responsible for designing, developing, testing, deploying and maintaining the web application.
- Responsible for managing large databases using **Pandas data frames and MySQL**.
- Wrote and executed various MySQL database queries from
- **Python-MySQL** connector and MySQL dB package.
- Designed **RESTful XML** web service for handling AJAX request

Environment: Python, Django, PySpark, React JS, RESTAPI, Pandas, Jenkins, HTML, CSS3, AJAX, API, Docker, Agile, MySQL, Git, SVN, AWS.

Education: Master's in Computer Science at Warrensburg University
