Profile Summary

- 5+ years of professional IT work experience in Software Testing/Quality Assurance/Automation and Manual Testing in Web and Client-Server based applications in all phases of Software Development Life Cycle (SDLC).
- Strong experience in **Selenium WebDriver, Selenium IDE/RC, Eclipse, TestNG, Java, and API** testing using **Postman**.
- Experience in both **Agile** and **Waterfall** Software Development Models.
- 3+ years of hands-on experience in QTP/UFT automation testing for web and middleware applications
- Extensive experience with SOA Test for API testing and service virtualization
- Deep understanding of SOAP, REST, HTTP protocols with expertise in JSON and XML data formats
- Strong proficiency in test planning, scripting, execution, and defect management
- Demonstrated ability to multi-task and work in self-directed environments
- Experience in all phases of Software Testing Life Cycle (STLC), Software Development Life Cycle (SDLC) and **Bug life cycle**.
- Experience with Mobile Apps (both native and hybrid) testing in both **iOS** and **Android** operating systems on **iPhone, Android** and **iPod** devices manually.
- Expertise in developing and maintaining automation frameworks using **Page Object Model (POM)** and **Behavior Driven Development (BDD)**.
- Experience in database testing using **SQL**.
- Strong knowledge of CI/CD tools like **Jenkins** and version control systems like **Git**.
- Hands-on experience in creating Test Plans, Test cases, Test Scripts, creating Test Scenarios, analyzing and preparing result summary reports.
- Experienced in reviewing and analyzing business requirements and writing detailed test plans, scenarios, defining test cases, developing, and maintaining test scripts, analyzing the results of scripts, interaction with team members in fixing the errors.
- Experience in Web debugging tools like XPath, Fire path, and Firebug also provided efficient locators for strategies like Xpath and CSS to run web driven scripts.
- Excellent analytical and problem-solving skills with the ability to troubleshoot with strong oral and written communication skills.
- Worked collaboratively and cross-functionally as part of a team as well as independently

TECHNICAL SKILLS:

Testing methods	Functional testing, Regression testing, Performance testing, Smoke testing, System testing, Integration testing, Sanity Testing, API Testing
Testing Tools	Selenium IDE, Selenium WebDriver, Selenium Grid, JMeter, Cucumber, Appium (iOS/Android), QTP, SoapUI, JMeter, Load Runner, Postman, Firebug, Gherkin, QTP/UFT, SOA Test.
Testing framework	TestNG, Junit, Page Object Model, Cucumber
Test Management Tools	HP ALM/ Quality Centre, JIRA

Integrated Development Environment	Eclipse, Visual Studio, IntelliJ
Build/ CI Tools	Ant, Maven, Jenkins, Git, GitHub, Docker
Programming Languages	Java, JavaScript, Python, HTML, CSS, XML, JSON
Database Management Systems	Oracle 9i/10g/11g/12c, MySQL, SQLite, SQL Server, Azure Cosmos DB
Operating Systems	Windows, MAC OS, UNIX, LINUX
Project Methodologies	Agile-Scrum, Waterfall. BDD, TDD

Education:

Master's of Science from University of Cumberlands - Williamsburg, KY, USA
 Bachelors in Jawaharlal Technological University, Hyderabad, India.

Aug - 2024
May 2019

Professional Experience:

Pilgrim Bank, Dallas, TX
Senior QA Automation Engineer

August 2023 - Till Date

Responsibilities:

- Reviewed **design documents & business requirements** to learn the function and scope of the application.
 - Involved in Development of the **Test Cases** and **Test Scripts**.
 - Developed Test Automation Framework using **BDD, Cucumber, Selenium WebDriver** and **Java**
 - Designing and implementing test automation framework using **Selenium WebDriver** and **TestNG**
 - Performing cross-browser testing using Selenium Grid with parallel execution
 - Automated **API** testing scenarios using **Postman** and **SoapUI**
 - Developed and maintained UFT test scripts for critical business workflows
 - Utilized SOATest for comprehensive API testing and service virtualization
 - Implemented security testing patterns for SOAP and REST APIs
 - Created reusable functions in UFT for improved script maintenance and reusability
 - Implemented continuous integration using **Jenkins** and **Docker** containers
 - Executed performance testing using JMeter for critical application modules
 - Performed the Mobile Testing for Mobile App of Client, identify the Mobile Platform like IOS, Android by using **Appium**.
 - Created Feature File, Scenario Outline with Cucumber framework and Wrote Acceptance test using BDD Cucumber.
 - Created **SQL** queries for database validation.
 - Used **Agile** methodology (Scrum) to ensure the new features meet the business requirements and acceptable quality assurance standards Re-tested fixed bugs and Closed or Re-opened defects in JIRA tool
- Environment:** Selenium WebDriver, Java, TestNG, Appium, Cucumber, Jenkins, Eclipse, Postman, SoapUI.

Capgemini Technology Services, Bangalore, India
QA Automation Engineer

June 2021 – November 2022

Responsibilities:

- Developed and implemented comprehensive QA strategies for healthcare website testing
- Automated critical regression tests using **Selenium WebDriver** and **TestNG** for patient portal functionality
- Executed complex **SQL** queries to validate patient data integrity in Oracle healthcare databases
- Ensured cross-compatibility of appointment scheduling systems across Chrome, Safari, and Firefox on desktop and mobile devices
- Performed mobile testing using **Android, IOS devices**.
- Performed **continuous integration** on test cases periodically using **Jenkins** and configured to email reports during a build failure.
- Performed **end-to-end** testing of application and also verified compliance for software quality standards of the organization.
- Executed regression test suites to maintain integrity of existing patient data management functionalities after updates
- Led UFT automation framework development for healthcare applications
- Performed extensive middleware testing using SOATest and UFT
- Implemented XML and JSON schema validation for API testing
- Created PowerPoint presentations and project updates for management review.
- Also, took part in the daily standup meetings with Sr. Business Analyst and managers and understood various process plans, business process, and functionality in detail.
- Initiated and participated in conference calls, walkthrough and review meetings.

Environment: Selenium WebDriver, Java, TestNG, Maven, MySQL, IntelliJ, Windows

Edu-Kinect, Hyderabad, India.

January 2019 – June 2021

QA Engineer

Responsibilities:

- Actively involved with **SCRUM** and sprint meetings, managing product backlog, removing obstacles to progress, re-allocating resources where necessary, prioritizing and review milestones and accomplishments.
- Designed test cases in MS Excel.
- Performed **Regression testing** for the designed test cases.
- Created and maintained a comprehensive test data management strategy using **SQL** queries for various test scenarios
- Developed and executed detailed test cases for student registration, course enrollment, and learning management modules
- Participated in requirement analysis sessions to ensure testability of new features
- Improved test coverage by implementing both positive and negative test scenarios for critical business flows
- Performed cross-browser compatibility testing across Chrome, Firefox, and Safari to ensure consistent user experience
- Participated in daily, weekly meetings and technical reviews and Prepared reports.

Environment: Jira, TFS, SQL, MS Office, Quality center, Waterfall, Agile.
