

Balaji Pasam

Network Engineer

Mail: balu.p2108@gmail.com || Ph.: 201-377-0476

PROFESSIONAL SUMMARY:

- 3+ years of experience Network Engineer with a proven track record of designing, implementing and optimizing complex network infrastructures and a proven ability to collaborate with IT security teams to enforce stringent access controls and mitigate risks.
- Possessing a strong foundation in routing protocols (BGP, OSPF) network security (firewalls, VPNs, ACLs), and automation (Cisco ACI), I have consistently delivered high-performance, secure and reliable network solutions.
- Expertise in network management tools coupled with a deep understanding of network protocols enables efficient troubleshooting and optimization.
- Demonstrated success in leading network projects from inception to completion, resulting in significant improvements in network performance, security and user experience.

TECHNICAL SKILLS:

Networking Equipment:	Cisco Routers, Switches, FTD Firewalls, Nexus Series, Meraki, SRX Firewalls, FortiGate Firewalls, Cisco ISE, Palo Alto NGFW, Cisco Wireless LAN Controllers.
Network Monitoring & Analysis:	SolarWinds NPM, Nagios, Zabbix, Wireshark, Splunk.
Automation & Scripting:	Ansible, Terraform, Puppet, Chef.
Cloud Platforms:	AWS, Microsoft Azure, Google Cloud Platform (GCP).
Protocols & Technologies:	IPv4/IPv6, BGP, OSPF, EIGRP, MPLS, QoS, NAT.
Security & Access Control:	NAC solutions, VMware NSX, Cisco ACI, SD-WAN Solutions.
Other:	LAN, WAN, WLAN, Data Center Networks.

PROFESSIONAL EXPERIENCE:

Cisco

Jan 2023 – Current

Network Engineer

- Developed & maintained comprehensive documentation for network configurations and procedures to facilitate knowledge transfer. Conducted risk assessments to identify potential threats, contributing to a proactive security posture.
- Designed and implemented network architecture capable of supporting over 250 concurrent users, enhancing overall user experience. Configured and managed network devices including Arista switches, to optimize traffic flow and enhance security.
- Increased network performance by 40% through the optimization of WAN connections and implementation of QoS policies.
- Deployed security measures that reduced potential vulnerabilities by 30%, ensuring a robust network environment.
- Successfully integrated centralized management systems, including Arista CloudVision for automation, leading to a 25% reduction in troubleshooting time.
- Provided technical support for network-related incidents, ensuring timely resolution and minimal disruption to services.
- Conducted regular network performance assessments, including Arista switch monitoring, to identify areas for improvement and ensure optimal operation.
- Collaborated with IT security teams to enforce network access controls, strengthening network security protocols.

Brane Enterprises – India

Oct 2020 – Nov 2022

Network Engineer

- Deployed comprehensive firewall solutions with Cisco FTD and Palo Alto NGFW, reducing security breaches by 50%.
- Optimized BGP and OSPF routing protocols, achieving a 40% improvement in network convergence times.
- Configured Cisco FTD for data center network automation, reducing provisioning times by 30%.
- Deployed and maintained SD-WAN solutions, providing secure and efficient connectivity for 50+ bank branches.
- Designed and managed a high-availability WAN infrastructure, supporting 50,000+ users and critical applications.
- Configured and maintained MPLS circuits, ensuring reliable and efficient data transfer across the network.
- Managed Cisco Prime Infrastructure for network management and monitoring, improving network visibility and control.
- Utilized Nagios and PRTG Network Monitor for real-time network performance monitoring and alerting.
- Utilized Arista EOS for network programmability, enhancing automation capabilities and reducing manual configuration errors.
- Developed and enforced network security policies, including firewall rules, VPN configurations, and access control lists (ACLs).
- Configured and managed VPN solutions for secure remote access and site-to-site connectivity.

EDUCATION AND CERTIFICATION:

Master of Information Technology - University of Cincinnati, Cincinnati, OH, USA.

Bachelor of Computer Science – Jawaharlal Nehru Technological University, Kakinada, India.

Cisco Certified Network Associate (200-301 CCNA) ---> [See Credentials](#)

Microsoft Certified: Azure Administrator Associate (AZ-104) --> See Credentials
