

# HYMA DIVYA SRIVALLI MEDICHARLA

214 E Armour Blvd, Kansas City, MO 64111

📞 913-326-9019 ✉ [srivallimedicharla@gmail.com](mailto:srivallimedicharla@gmail.com) [in linkedin.com/in/srivalli-medicharla](https://www.linkedin.com/in/srivalli-medicharla) [github.com/Medicaharlasrivalli](https://github.com/Medicaharlasrivalli)

## Education

**Master's in Computer Science (GPA : 4.0)**

*University of Missouri Kansas City*

**Expected Graduation-May 2024**

*Kansas, Missouri*

**Bachelor of Technology, Computer Science (GPA : 3.8)**

*Godavari Institute of Engineering and Technology*

**July 2017 - July 2021**

*Rajahmundry, India*

## Technical Skills

**Programming Languages:** Python, Java, C  
**Database:** MongoDB, Oracle, MySQL  
**Web Tools:** ExpressJS, NodeJS, ReactJS, HTML5, CSS  
**Scripting Frameworks:** JavaScript, TypeScript  
**Operating Systems:** Windows, Linux, MacOS  
**Version Control Systems:** GitHub, Bitbucket, Git  
**Cloud Providers:** AWS - Amazon Web Services  
**Virtualization:** Docker, Virtual Box  
**Technologies:** Python Django, Spring Framework, Spring Boot, MATLAB, Hadoop, Apache Spark

## Experience

**University of Missouri-Kansas City**

*Graduate Research Assistant*

**Jan 2023 – Present**

*Kansas City, MO, United States*

- Engaging in the Internet of Things projects which include Hazard Detection and Alert systems to prevent incidents and Safety Zoning and working with devices such as ESP32, UWB, buzzers, sensors such as temperature sensors etc.

**Virtusa consulting services, pvt,Ltd**

*Associate Software Engineer*

**Aug 2021 – Nov 2022**

*Hyderbad, India*

- Maintained awareness of backend development using the JAVA Spring Boot, Spring Security and Microservices.
- Refactored the application from Angular 7 to Angular 9 to improve user interaction and responsiveness.
- Led a team of 6 members while implementing best practices for project planning, execution, and monitoring.
- Agile team player with expertise in Scrum, code reviews and code quality.

**Virtusa consulting services, pvt,Ltd**

*Intern Technology*

**May 2020 – Jul 2020**

*Chennai, India*

- Developed and Integrated the RESTful APIs using JAVA Spring Boot, Spring Security, MySQL
- Maintained and managed the data in the MySQL database which responds to the RESTful APIs.

## Projects

**Hazard Detection and alert system to prevent incidents** | *MobileApp, ESP32*

- Developed a smart tag with ESP32 and Buzzer and installed it in the worker's helmet. Used the technology of BLE and distance calculation using RSS (signal strength) and implemented a mobile application that tracks workers' locations and alerts vehicle drivers of impending incidents based on their distance from the worker.

**Music Recommendation System Based Facial** | *Expression—CNN, ResNet50V2*

- By Utilizing computer vision, the system decodes facial expressions, training a deep neural network to identify emotions such as happy, sad, fear or disgust etc. This emotion data is then integrated into a music recommendation algorithm, providing personalized music suggestions based on the user's current facial emotion state.

**Chat Application with Socket.IO** | *React, Node.js, Socket.io*

- Enable instant messaging with features like online status, sending emojis and message persistence. Implement a responsive and interactive interface for seamless communication, making use of Socket.IO for efficient real-time data exchange between clients and the server.

## Certification

- Oracle Certified "Java Developer"
- NPTEL Certification in "Programming in Java".
- NPTEL Certification in "Database Management Systems".
- NPTEL Certification in "Programming, Data Structures and Algorithms using Python".
- Hacker Rank Certification in "Problem Solving".
