SUMMARY

I'm a solution-focused data analyst with over 3 years of experience turning raw data into meaningful insights using tools like Python, SQL, Power BI, and Tableau. I've worked with major clients like Wells Fargo and Cognizant, helping them build efficient data pipelines, automate reporting workflows, and make better business decisions through clear, insightful dashboards. Whether it's analyzing trends in sales, finance, or marketing, I enjoy digging into complex datasets and finding the story behind the numbers. I'm also experienced in collaborating with cross-functional teams and stakeholders to align data strategies with business goals. Currently, I'm wrapping up my master's in information systems and technologies from the University of North Texas.

SKILLS

Data Visualizations: Tableau, Power BI

Programming: Python (NumPy, pandas, Matplotlib, seaborn)

Database Management: MySQL, PostgreSQL, Microsoft SQL Server, Oracle Database, Amazon RDS

Data Engineering: Data Warehousing, SSIS, Big Data (Spark)

Data Analysis: MS Excel (Power Query, VLOOKUP, XLOOKUP, ETL, Pivot Tables), Statistical Analysis

Data Management: Data Modeling, Data Cleaning, Data Transformation, Pipeline Automation

Communication: Collaboration, Problem-Solving, Stakeholder Engagement

EXPERIENCE

Nukasani Group Inc

Client: Wells Fargo (US Based)

MAY 2025 - PRESENT

SQL, Python (NumPy, Pandas)

- Delivering data-driven insights to Wells Fargo's business units by building data pipelines, analyzing KPIs, and supporting performance metrics reporting.
- Developed and maintained automated **ETL** workflows using **Python and SQL**, streamlining data ingestion, transformation, and reporting processes.
- Wrote optimized **SQL** queries and stored procedures for complex data extraction and transformation tasks to support recurring business reporting.
- Collaborating closely with stakeholders to refine data models and ensure alignment with business logic, regulatory requirements, and performance goals.
- Ensuring high data integrity, consistency, and compliance with internal data governance policies across all stages of the data lifecycle.

Client: Cognizant Technology Solutions (India)

APR 2020 – JUN 2023

SQL, Python (NumPy, Pandas)

- Extracted, joined, and filtered complex datasets using advanced **SQL** queries to generate reports and uncover actionable business insights.
- Built and **optimized SQL views, stored procedures**, and indexes to support recurring reporting needs and improve query performance.
- Cleaned, transformed, and standardized raw data using **Python (Pandas)**, resolving issues such as missing values and duplicate records.
- Automated end-to-end data preparation workflows using Python scripts, reducing manual effort and improving report accuracy.
- Conducted exploratory data analysis (EDA) to identify sales and marketing trends, driving a **15%** increase in customer engagement.
- Collaborated with cross-functional teams to gather business requirements and deliver custom dashboards and reports that enhanced decision-making for stakeholders.

PROJECT EXPERIENCE

Missing Migrants Data Analysis - Python (NumPy, Pandas and Matplotlib)

- Analyzed a dataset of **13,370 migration-related incidents**, identifying trends in causes of death and high-risk routes. Cleaned and transformed data over 2 weeks, achieving **100% accuracy** by resolving inconsistencies and missing values.
- Delivered insights in **1 week**, influencing **75% of migration routes** through policy recommendations for improved decision-making.

Hardware Sales Analysis - [Power BI | MySQL | Excel]

- Developed a Power BI dashboard in 1 month to enhance **data-driven decision-making** across Finance, Sales, Marketing, and Supply Chain, addressing challenges in **Latin America** for improved operational efficiency
- Connected **MySQL database to Power BI** in 3 weeks, ensuring **data validation** and creating interactive dashboards for insights into **financial forecasting, sales, and supply chain metrics**, improving **budgeting accuracy by 30%**.

Consumer Goods Ad Hoc Insights - [MySQL | Excel]

- Faced with **data access challenges**, **SQL analysis** revealing desktops had the highest production costs, notebooks were top sellers, and a product saw a **36.33% sales increase** in FY 2021, aiding **growth strategies**.
- **Flipkart** contributed **30.83% of sales** compared to **Amazon's 29.33%**, leading to actionable recommendations. Suggested cost optimization, enhancing underperforming products, and improving retailer performance.

EDUCATION

Master's in Information Systems and Technologies

MAY 2025

University of North Texas

Bachelor's in Information Technology

R.M.K Engineering College, Anna University, India.
