LinkedIn: <https://www.linkedin.com/in/br02072000/>

PROFESSIONAL SUMMARY

- **Salesforce Developer, Admin, QA Engineer** with ~5 years of experience delivering **scalable, high-performance** solutions across **healthcare** and **enterprise** domains.
- Strong expertise in **Apex, LWC, Aura, Visualforce, OmniScript, Flex Cards, and Object-Oriented design patterns**, with focus on scalable **Salesforce architecture**.
- Hands-on across full **SDLC**, using **Agile/Scrum**, with experience in **CI/CD, Salesforce DX (SFDX), Git, and Jenkins**.
- Skilled in **data modeling** using **Custom Objects, Lookup, Master-Detail, Junction Objects**, and implementing **Salesforce Security (Profiles, Roles, Permission Sets, OWD, Sharing Rules)**.
- Experience in **integrations** using **REST APIs, SOAP APIs**, and handling **large data volumes** with optimized **SOQL** and **SOSL** queries.
- Built automation using **Flows, Workflow Rules, Approval Processes**, along with **Reports** and **Dashboards** for business insights.
- Worked across **Sales Cloud, Service Cloud, Health Cloud, Marketing Cloud, and CPQ (SteelBrick, Apttus)**.
- Strong testing experience using **Selenium, TestNG, Playwright, Cypress**, supporting **functional, regression, and UAT testing**.
- Proven ability in **debugging, troubleshooting**, and delivering stable **production deployments** in fast-paced environments.

EDUCATION

- **Masters in Information Technology Management** from **Concordia University, St. Paul**

SKILLS

- **Salesforce & CRM:** Salesforce Platform, Sales Cloud, Service Cloud, Health Cloud, Experience Cloud, CPQ, Data Cloud, Experience Cloud (Communities), OmniStudio (OmniScript, Flex Cards, Vlocity)
- **Programming & Development:** Apex, Lightning Web Components (LWC), Aura Components, Visualforce, JavaScript, HTML, CSS, Object-Oriented Programming (OOP), Design Patterns
- **Automation & Configuration:** Salesforce Flow (Record-Triggered, Screen Flows), Process Builder
- **Integration & APIs:** REST APIs, SOAP APIs, Platform Events, Change Data Capture (CDC), Postman
- **Data Management & Tools:** SOQL, SOSL, SQL, Data Loader, Workbench, Large Data Volume (LDV) Handling
- **DevOps & Version Control:** Salesforce DX (SFDX), Git, GitHub, GitLab, Jenkins, Copado, AutoRABIT
- **Testing & Debugging:** Apex Test Classes, Debug Logs, Developer Console, Selenium
- **Security & Access:** Profiles, Permission Sets, Sharing Rules, Field-Level Security (FLS), Role Hierarchy
- **Other Tools & Technologies:** VS Code, Azure DevOps, JIRA, Agile/Scrum, ReactJS

CERTIFICATIONS

- **Salesforce Certified Administrator**
- **Salesforce Certified Platform Developer-1**
- **Salesforce Certified Platform Developer-2**
- **Legacy JavaScript Algorithms and Data Structures V7**

PROFESSIONAL EXPERIENCE

SR. SALESFORCE DEVELOPER | ADMIN | QA

CVS Health, Irving, TX

Dec 2024 to Present

- Delivered **Apex + LWC solutions** for **healthcare case management**, improving system efficiency
- Designed **scalable integration architecture** using **REST APIs** and **Platform Events**
- Implemented **asynchronous Apex (Batch, Queueable, Future)** for **high-volume data processing**
- Applied **trigger framework** and **bulkification techniques** to handle **LDV** and avoid **governor limits**
- Built **centralized error handling & logging framework** for **integration reliability**
- Automated workflows using **Salesforce Flows**, improving processing efficiency by **30–40%** and reducing manual effort
- Led **CI/CD deployments** using **SFDX, Git, Jenkins** ensuring stable releases
- Enforced **Salesforce security model** ensuring **compliance (FLS, sharing rules)**
- Created **real-time dashboards & reports** for business insights
- Mentored developers on **performance optimization** and **best practices**
- Designed **Salesforce architecture** across integrations and data modeling
- Implemented **OmniScript and Flex Cards** for user workflows
- Led technical solution discussions with stakeholders and cross-functional teams
- Collaborated cross-functionally with **QA, BA, and integration** teams to deliver scalable and efficient **Salesforce solutions**
- Led **end-to-end project delivery**, including planning, execution, and stakeholder coordination
- Acted as **primary point of contact for Salesforce support**, troubleshooting production issues and ensuring system stability
- Managed **project timelines, status reporting, and cross-team communication**
- Supported **configuration, testing, and deployment** of enhancements and integrations
- Identified **process improvements and automation opportunities** within Salesforce platform
- Maintained **project documentation, release notes, and audit/compliance records**

SALESFORCE ADMIN & DEVELOPER

IBM, India

March 2022 to June 2023

- Developed **Apex triggers, classes, and Visualforce pages** to support business workflows.
- Designed **custom objects, workflows, and approval processes**, reducing manual operations by **30%**.
- Built **reports and dashboards** to improve visibility into sales performance
- Implemented **REST integrations**, improving data flow and reducing manual intervention.
- Optimized **SOQL/SOSL queries**, reducing execution time by **30%**.
- Performed **data migration using Data Loader**, ensuring accurate data mapping and validation.
- Customized **Lightning UI and page layouts**, improving user adoption by **25%**.
- Collaborated in **Agile teams** to deliver features on time.

SALESFORCE ADMIN & DEVELOPER

Synchrony, India

April 2019 to Feb 2022

- Developed **Apex classes and triggers** to support core business functionality.
- Configured **workflows, approval processes, and validation rules**, reducing manual effort by **25%**.
- Built and maintained **reports and dashboards** for business tracking.
- Performed **data migration and mapping**, ensuring smooth transition from legacy systems.
- Managed **user access and security configurations**, improving data protection.
- Migrated **Visualforce components to Lightning**, improving UI performance by **30%**.
- Supported **Agile development lifecycle** and sprint delivery.
- Monitored and resolved system issues to maintain application stability.
