☎ +1 470 484 1715

PROFESSIONAL SUMMARY

- 4+ years of excellent experience with Software Development Life Cycle (SDLC) process and Object-oriented analysis, Expertise in Java Beans and design (OOAD) concepts.
- Experience in Object Oriented (OOP), J2EE and Client & Server-side technologies.
- Expertise in developing GUI using Swing, HTML, DHTML, DOJO, Java Script, CSS, AngularJS, Bootstrap, Apache Cassandra, Full Stack JSF, XML, REST, jQuery and AJAX scripting
- Good Knowledge in all the phases of software development life cycle with Analysis, Design, Development, Integration, Debugging and Testing for Software Applications in Client Server environment, Object Oriented Technology and Web based applications.
- Comprehensively worked on n-tier architecture systems with application system development using Core Java, JDBC, Servlets, JSP, Web services, Restful Web Services, Spring, Spring boot, Struts MVC, and Hibernate.
- Proficiency in Core Java technology which includes OOPS, Multi-Threading, RMI, and network programming.
- Expert-level knowledge of spring modules like Spring Core, Spring Batch, Spring DAO, Spring AOP, and Spring MVC.
- Involvement in integrating the internal security model into new projects with Spring Security and
- Spring Boot.
- In-depth knowledge of Java 8 features such as Lambda, Stream API, and utilizing Map and Reduce for efficient programming.
- Good work experience with IDEs like Eclipse, STS, NetBeans, WebSphere Studio Application Developer (WSAD), and RAD.
- Experience in planning, installing, configuring, tuning and integrating the IBM WAS, IBM HTTP server, WebSphere Commerce series, Apache TOMCAT, JBOSS, Webserver and LDAP
- Extensive experience in design and development of J2EE applications using Core Java, Java Collections, Data Structures, Multithreading, Transaction Management, JDBC, Servlets, JSP, XML, Web Services and other open-source frameworks and APIs.
- Working Knowledge of WebSphere commerce server
- Expertise in developing both static and dynamic user interfaces using JSP, JSF, JSON, JQuery, DOJO, AJAX, Java Script, CSS and HTML.5
- Proficient in implementing MVC architecture using Struts, Struts Framework and spring Experience
- Very strong experience in server-side validation using Struts, spring.
- Experience in deploying Ear and War file in Application serves like JBOSS, WEBLOGIC, and WebSphere.
- Good working knowledge on build tools like Ant, Maven, Gradle
- Experience with AWS cloud services: S3, EC2, EMR, RDS, Redshift and SQL, Snowflake.
- Good working experience on logging framework like Log4j.
- Hands-on experience on different project tracking tools such as Rally, Jira

TECHNICAL SKILLS

Web Technologies:	HTML, HTML5, XML, CSS, CSS3, JavaScript, TypeScript, AJAX, JSP, DOM, Responsive Web Design, DHTML, XHTML, JSON, XML
Java Technologies:	Spring Boot, Spring MVC, Hibernate, Servlets, JDBC, JSP, JSTL, Swing
JavaScript Technologies	React JS, AngularJS, Angular, jQuery, EXT.js, Database Oracle, Microsoft SQL Server, MySQL, MongoDB, Cassandra, Neo4j.
Web Services	RESTful, SOAP, WSDL
Testing Tools	JUnit, Jasmine, Karma, Jest, Log4j

Operating Systems	Windows, UNIX, LINUX, Mac OS.
Web Servers	WebLogic, JBoss, Tomcat, Nginx
Tracking Technologies	JIRA, Bugzilla, Repositories Git, Bitbucket, SVN
Cloud AWS	EC2, RDS, S3, IAM, CloudWatch, EBS, Lambda, Spring cloud

PROFESSIONAL EXPERIENCE

Client: TD Bank, US

Java Full Stack Developer

Jan 2023 to Till Date

Responsibilities:

- Developed enterprise **Java 11** solutions following standard/best practices including **SDLC and design pattern**.
- Design & developed of **J2EE** and **Spring Framework** with **spring core modules & MVC** architecture using **Java 11**.
- Developed the **application** Using **Spring Framework, JPA, JSP, Servlets, AJAX, XML, JQuery**, and **HTML**.
- Used **JDK 11** new **String Methods** and **Pattern recognizing Methods**.
- Involved in the development of the application based on backend **Spring MVC** architecture.
- Used **Spring MVC framework** at web tier level to **isolate each layer of the application** so that the complexity of **integration** will be reduced, and maintenance will be very easy.
- Designed and developed the **REST** based **Micro services** using the **Spring Boot**.
- Created various **Spring Boot** and **spring batch applications** to connect them to various databases and created queries to retrieve data and modify the tables for the databases.
- Used **Eclipse** as the **Java IDE** in the development of the application.
- Used **Hibernate framework** in **persistence layer** for mapping an object-oriented domain model to relational database.
- Designed application by **implementing Spring Framework** based on **MVC Architecture** with **JPA, Java Beans, JSPs & Integrated Web Services** and associated business modules other **sales systems**.
- Involved in Writing **JPA/Hibernate** queries.
- Design and **developed the web pages** using **HTML5, CSS3, JavaScript, Bootstrap, React.JS, Redux, and Node.JS**.
- Developed rich integration for dashboards using **React.JS** and **Virtual DOM**.
- Involved on **React.JS** virtual **DOM** and **React views**, rendering using components which contains additional components called custom **HTML** tags.
- Used various predefined components from **NPM (Node Package Manager)**, **Redux** Library and worked using **React.JS** Components and Stand-alone functions for adding more pages.
- Involved in **React.JS** for **Data patterns** which **improves readability and made** it easier to maintain larger apps and used **React.JS** for declarative, efficient, and flexible JavaScript library for building user interfaces.
- Utilized a concept called **Virtual DOM** in **React.JS** to create in-memory data structure cache, enumerate resulting differences, and update browser's displayed DOM efficiently.
- Implemented stable **React.JS** components and stand-alone functions for reusability.
- Configured **Java Messaging Services (JMS)** on WebSphere Server using **Eclipse IDE**.
- Implemented **AWS** client API to interact with different services as Console configuration for **AWS EC2**.
- Worked on creation of **Docker container images, tagging, pushing images**, integrating **Spring Boot**, created the **Docker containers** and **Docker consoles** for managing the application life cycle.
- Used **EJB 3.0** Session beans using **JBOSS Seam Context Management (Application, Conversation, Session scopes)** and implemented Business processes such as user **authentication, Transfer of Service** using Session **EJBs**.
- Implemented the logging using **log4j** framework which is used to log both User Interface and Domain Level Messages.
- Wrote **JUnit** test cases for unit, integration, and functional tests, run automatically by **Jenkins**
- Used **Jenkins** for **CI (continuous integration) and deployments**.

- Developed **Web Services** using **SOAP, WSDL, UDDI and JAX-WS programming model**.
- Worked on creating various types of indexes on different collections to get good performance in **MongoDB** and created documents in **MongoDB**.
- Developed presentation layer using **JSP, HTML, CSS, JQuery and AJAX**
- Wrote complex **SQL queries DML scripts, stored procedures, triggers** and **PL/SQL** packages to interact with **SQL Server** database.
- Designed and maintained GitLab CI/CD pipelines for automated builds, testing, and deployments.
- Migrated repositories and CI/CD pipelines from other platforms (GitHub, Bitbucket) to GitLab.
- Integrated GitLab with cloud platforms for seamless deployment.

Environment: Java 11, Spring, Spring Boot, MVC, Micro Services, Hibernate, GCP, HTML5, CSS3, JavaScript, Bootstrap, Eclipse, React.JS, REDUX, React Native, Node.JS, JSP, XML, JMS, AWS, Docker, DOM, JBOSS, JPA, SOAP, RESTful, EJB, Log4j, JUnit, Jenkins, GIT, MongoDB, SQL, Agile and Windows, Gitlab.

Associate Software Engineer

Client: Wilco Source Technologies, India

Aug 2021 to Jul 2022

Responsibilities:

- Developed system preferences dynamic user interfaces and created web application prototypes using JavaScript, CSS, and HTML.
- Data Operations were performed using Spring ORM wiring with Hibernate.
- Designed and developed JSP pages using Spring MVC framework and created Spring MVC components like Dispatch servlets, configure Request mapping annotation controllers, and view resolver components.
- Conducted thorough reviews of programming modifications and led team code reviews to ensure quality and adherence to standards.
- Data Operations were performed using Spring ORM wiring with Hibernate.
- Implemented logic for Kafka consumer factory and producer factory using configuration files.
- Implemented Kafka producer and consumer using Spring Boot which is responsible for publishing data to Kafka topics and consuming data from topics, enabling seamless ingestion and processing of high-volume data streams
- Implemented features like logging, and user session validation using the Spring-AOP module and Spring IOC
- Implemented Continuous Integration/Continuous Deployment (CI/CD) practices with Jenkins, enhancing the development pipeline.
- Involved in coding, maintaining, and administering Servlets, and JSP components to be deployed on a WebSphere Application server.
- Utilized Angular, jQuery, and Bootstrap to enhance user interactions and front-end functionalities, and implemented UI validations using JavaScript.
- Developed custom directives in Angular to share common functionalities between different components
- Used Log4j to provide a central logging facility, comes under singleton design pattern and used to monitor the error logs and used GIT as a version control tool]
- Participating in High-level and low-level system design, planning, estimation, and implementation Experienced in building Web Services (SOAP, JAX-WS, and JAXB).
- Used DB2 for table creation and was involved in writing SQL queries using Joins and Stored Procedures.
- Involved in production support for the project and On-Call support.
- Used Linux commands and PUTTY to navigate to logfiles and open gzip files to find the root cause
- Involved in fine Tuning queries and enhancing search criteria for a faster response for the user interface.

Environment: Servlets, HTML, CSS, JSP, JavaScript, JSTL, XML, JMS, XPath, Struts Framework, Hibernate, MYSQL, SOAP UI, POSTMAN, Apache CXF, Junit.

EDUCATION

- Masters in Computer Science, Kennesaw State University, Georgia || Aug 2022 - Dec 2023
- Bachelors in Computer Science, India || Aug 2017 to Jul 2021.
