

Bilal Contractor

(732) 421-2665 | bcontra9@outlook.com

I am dedicated to leveraging data analytics to enhance operational efficiency, drive informed strategic decisions, and support meaningful advancements in healthcare. With expertise in data analysis, financial modeling, and regulatory compliance, I transform complex information into actionable insights that empower organizations to optimize performance and improve quality. My mission is to harness the power of data to create impactful solutions that foster innovation, efficiency, and long-term success.

Education

University of Louisville – Louisville, KY – Graduated (Dec 2023)

Master of Science in Business Analytics

Johns Hopkins University – Baltimore, MD – Graduated (Aug 2022)

Master of Science in Healthcare Management

Rutgers University – Newark, NJ – Graduated (May 2021)

Bachelor of Science in Supply Chain Management

Professional Experience

University of Louisville Health – Louisville, KY

Data Analytics Coordinator

Feb 2024 – May 2025

Supported enterprise-wide quality improvement initiatives by transforming complex clinical and operational data into strategic insights for leadership.

- Analyzed emergency department performance using Medisolv to identify workflow improvements at Shelbyville and University Hospitals.
- Developed Vizient-based business intelligence reports to drive data-informed decisions across clinical and executive teams.
- Managed quarterly NCDR dataset submissions (CHESTPAIN, CATHPCI) to ensure accuracy and regulatory compliance.

University of Louisville Physicians – Louisville, KY

Business Analyst Intern

Dec 2022 – Feb 2024

Provided analytical support to optimize financial operations, regulatory compliance, and strategic planning within a healthcare environment.

- Audited 600+ patient records to enhance diagnosis and CPT coding accuracy, supporting revenue cycle improvement.
- Built Monte Carlo simulations and analytics tools to evaluate financial risks and interpret CMS policy changes.
- Redesigned physician compensation dashboards using AAMC and CPSC benchmarks to improve performance transparency.

Skills

- Healthcare Data Analytics – Expertise in analyzing clinical and operational data to drive quality improvement initiatives.
- Business Intelligence & Reporting – Skilled in creating Vizient-based business intelligence reports for data-driven decision-making.
- Regulatory Compliance – Managed NCDR dataset submissions to ensure accuracy and adherence to healthcare regulations.
- Financial Modeling & Risk Analysis – Developed Monte Carlo simulations to assess financial risks and policy implications.
- Revenue Cycle Optimization – Audited patient records to improve diagnosis coding accuracy and support revenue cycle enhancements.
- Process Improvement – Analyzed emergency department workflows using Medisolv to identify efficiency opportunities.
- Performance Metrics & Benchmarking – Redesigned physician compensation dashboards using industry benchmarks for transparency.
