EXPERIENCE

CHAMPTitles, Cleveland, Ohio — *Software Engineering Intern*

June 2025 - Present

Developed core features for the Government Facing product suites, using clean code practices and unit testing strategies.

Communicated across multiple teams: product, engineering, and more, in a daily standup meeting.

Delivered two projects to production, currently in use by State Governments across the United States.

Utah Tech — *Academic Research*

October 2025 - Present

Working on a project with two other students, managed by a professor. Our goal is to make a model to determine password strength based off patterns in the Rockyou database.

Utilizing Python, Jupyter Notebook, and data analysis to gather this info in a readable and usable format.
