

CALEB MOK

New York, NY | (425)-770-0871 | caleb.mok@hotmail.com

EXPERIENCE

Capital One

Aug 2020 - Aug 2024

Senior Associate Software Engineer

New York

- Decreased Large Language Model prediction time by over a factor of 100 using AWS SageMaker to facilitate processing 70+ million accounts daily
- Co-authored a research paper on differences between faithfulness metrics for machine learning models that got accepted to NeurIPS XAIA 2023
- Developed and supported an internal package to explain and monitor machine learning models, which won an award for its ease of use and numerous use cases
- Fine-tuned a Large Language Model with several million parameters for an 8% lift in accuracy

Associate Software Engineer

- Refactored a monolithic codebase into 5 microservices, improving system scalability and reducing deployment times
- Tested and validated resiliency of the financial ledger architecture
- Guided students how to build personal websites using HTML and CSS

Capital One

Jun 2019 - Aug 2019

Software Engineer Intern

Richmond

- Extracted and stored customer responses to Capital One's chatbot in a database
- Developed a website with search engine to query the database using React
- Trained a sentiment analysis model to filter out negative responses from being displayed

WeChat

Jun 2018 - Aug 2018

Software Developer Intern

Hong Kong

- Trained an image recognition model to distinguish between different brands for a marketing campaign demo
- Created a RESTful back-end API using Flask to communicate with regular WeChat users
- Streamlined project to deploy on any operating system through Docker
- Presented weekly on topics such as common data collection problems and solutions and how to create similar machine learning projects

EDUCATION
