Education

University of Oregon

Bachelor of Science, Computer Science

Eugene, OR

Graduation – June 2025

Projects

FreeTune | *React, TypeScript, Node, Express, PostgreSQL, OAuth2*

<https://freetuner.vercel.app/>

- Developed a web app to help guitarist learn and practice with a fully responsive UI and 50+ users.
- Implemented a real-time tuner featuring visual feedback and 75+ tuning presets across 11 instruments.
- Designed an interactive guitar chord library with dynamic audio playback for over 2,000 chords.
- Integrated OAuth2 authentication (Google, GitHub, Twitter) with secure session management using PostgreSQL.
- Deployed frontend on Vercel and backend on Render, insuring reliable and scalable performance.

TV and Movie Tracker | *AWS EC2, JavaScript, jQuery, Flask, MongoDB, Docker*

- Developed a full-stack web app utilizing the TVDB API, allowing users to search, add, rate, and review shows and movies.
- Implemented secure user authentication with bcrypt hashing for password protection and data security.
- Developed sorting and filtering functionality for better content management, with a responsive and intuitive jQuery interface.
- Deployed on AWS EC2 via Docker, with a Flask backend and MongoDB database for efficient data storage.

Active-Reading-Assistant | *Python, Tkinter, PyMuPDF, MySQL*

- Developed a desktop PDF reader supporting the SQ3R method for effective notetaking and document organization.
- Integrated PyMuPDF and MySQL Connector to enable seamless PDF viewing, note-taking, and cross-device data synchronization.
- Built user authentication and profile management to save personal notes, PDFs, and settings for each user.
- Designed an intuitive Tkinter interface optimized for navigating PDFs and managing hierarchical notes efficiently.

Experience

DoorDash

Driver

Eugene, OR

January 2022 – Present

- Developed strong communication and problem-solving skills, providing excellent customer service and resolving issues efficiently.
- Managed time effectively by optimizing delivery routes to ensure timely arrivals while balancing multiple orders.

Albertsons

Produce/Fresh Cuts Clerk

Ashland, OR

June 2020 – September 2021

- Collaborated with a team to efficiently prepare and organize fresh produce and cuts, ensuring all tasks were completed within deadlines.
- Maintained a clean and organized work area, demonstrating attention to detail and contributing to a smooth workflow in a fast-paced environment.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL Python, C/C++,

Libraries and Frameworks: React, Node, Express, Flask, jQuery

Developer Tools: AWS, Docker, MongoDB, MySQL, PostgreSQL, Git
