

Carlos J Bonilla

Summary

Seasoned React API Developer with extensive experience in designing, coding, and deploying responsive user interface components for mobile and web. Proficient in translating design and wireframes into working React code using JavaScript and ReactJS workflows. Demonstrated expertise in troubleshooting and debugging, ensuring smooth deployment and CI/CD ready applications.

Skills

- React.js
- JavaScript
- TypeScript
- HTML
- CSS
- Python
- SQL
- Firebase Database
- Problem Solving
- Code Review
- Responsive Web Design

SOFTWARE

- Visual Studio Code
- GitHub

Professional Experience:

Acme Computer Squad, Inc

Front End API Developer

April 2022 to September 2022

- I work in a team collaborating with other front-end and back-end developers and communicate with several APIs using standard AJAX methods of Post, Put and Get.
- Primary responsibility is to code the user interface components and modules in React.js from wireframes. All the components send and receive JSON using backend REST API's endpoints.
- I debug, troubleshoot and log errors to ensure smooth deployment and CI/CD ready applications
- Developed self-contained, reusable, and testable modules and components

Front End API Developer

January 2023 to June 2023

- Utilized a deep understanding of React.js to build web and mobile applications, enhancing user experience and performance.
- Optimized performance and resolved issues in a live production environment, improving system reliability and efficiency.
- Developed new user-facing features, ensuring robust and maintainable components, resulting in an increase in user satisfaction.

Carlos J Bonilla

Front End API Developer

October 2023 to March 2024

- Utilized HTML5, CSS3, and responsive design principles to enhance user experience, increasing user satisfaction.
- Performed unit tests to ensure code reliability and maintainability, reducing system errors.
- Developed and maintained high-performance web applications using React, improving application performance.

FULL SAIL UNIVERSITY

GAME PRODUCTION INTERN

August 2021 to December 2021

- Assisted students with model creation, animation, rigging, and UV mapping, enhancing their project outcomes and technical skills.
- Provided detailed critiques on multiple projects, fostering a collaborative learning environment and improving overall project quality.
- Utilized problem-solving skills to address and resolve technical issues, ensuring smooth project progression and increased student satisfaction.

GAME ARTIST for UNHOLY REPENTANCE

April 2021

- Created modular environment assets for the design team
- UV and textured all assets using Maya, Substance Painter and Designer
- Rigged and animated the characters

Education:

FULL SAIL UNIVERSITY

BACHELOR OF SCIENCE, GAME ART

Graduated Valedictorian July 2021
