

Chandu Kurre

Data Scientist

Houston, US, 76209, 713-842-0143, chandukurre237@gmail.com

Professional summary

Analytically driven and results-focused Data Scientist pursuing a Master's in Data Science with 2+ years of project experience in machine learning, predictive modeling, and marketing analytics. Adept at designing data-driven solutions that optimize business performance and marketing ROI. Strong background in Python, SQL, and statistical modeling with a passion for applying data science in marketing measurement, media mix modeling, and forecasting. Known for clear communication, collaborative mindset, and entrepreneurial approach to solving complex business problems.

Skills

Python, SQL, R, Pandas, NumPy, Scikit-learn, Power BI, Tableau, MySQL, Docker, Git, NLP, Machine Learning, Data Analysis, Data Visualization, Data Mining, Database Design, Data Engineering, Visualization Techniques, Statistical Modeling, Business Analysis.

Employment history

Technical Trainer, Aug 2022 - Aug 2024

NextHub Technologies Pvt Ltd

- Delivered comprehensive, curriculum-based training in **Data Science, Machine Learning, and Artificial Intelligence**, empowering students with both theoretical understanding and real-world project exposure.
- Designed end-to-end training modules on **Python, SQL, Power BI, Tableau, and data preprocessing** techniques, helping students build deployable data solutions.
- Guided 100+ students through **real-time projects** involving **classification, clustering, forecasting, NLP, and data visualization** using industry-standard tools.
- Created labs and case studies that simulate real enterprise problems in areas such as **marketing analytics, predictive modeling, and BI reporting**.
- Conducted assessments and workshops on **data engineering fundamentals** including **MySQL, data transformation, relational modeling, and cloud workflows (basic GCP exposure)**.
- Mentored students in deploying ML models using **Jupyter Notebooks, scikit-learn, and Hugging Face transformers** for NLP and AI applications.
- Developed dashboards in **Power BI** for use-case simulations, introducing best practices in **DAX, drill-throughs, and slicers**.

Additional information

LibraMate - Personal Library Assistant Chatbot, University of North Texas | Apr 2025

- Library staff faced increasing demand for handling repetitive tasks such as room booking, service inquiries, and resource availability—leading to user frustration and decreased efficiency.
- Tools/Technologies Used: Python, spaCy (NLP), API integration, Streamlit, Git
- Collaborated with a cross-functional team of 5 to design and implement an intelligent chatbot tailored to automate core library operations. Leveraged Python and NLP libraries to interpret user queries in natural language and deliver context-aware responses.
- Developed robust backend logic for search and reservation workflows integrated with live resource data.
- Implemented features for real-time availability checking, study/meeting room bookings, and automated email confirmations using scheduling APIs.
- Designed intuitive conversational flows with error handling and multi-intent processing to ensure seamless interaction.
- Reduced manual staff workload by ~40% for service-related queries through automation.
- Enhanced student experience with 24/7 self-service access to library functions. Demonstrated the practical application of NLP and automation in streamlining institutional services, showcasing scalable potential beyond academic libraries.

Clinical Trials Database Management System, University of North Texas | Dec 2024

- Clinical researchers required a structured, reliable system to manage cancer patient data and track progress in clinical trials focused on immune checkpoint inhibitors.
- Tools used are MySQL, MySQL Workbench, SQL, Microsoft Excel, ERD tools, Google Colab
- Collaborated on the design and development of a relational database system for managing patient records, treatment plans, and milestone tracking.
- Built and tested a scalable database solution with robust SQL queries, data modeling capabilities, and automated reporting features.
- Enabled researchers to extract timely insights, monitor clinical milestones, and streamline data analysis workflows across complex cancer trial datasets.

Education

Master in Data Science, Jan 2024 - May 2025

University of North Texas, Denton, Texas

Relevant Coursework: Data Mining, Data Processing, Data Analysis, Data Visualization • GPA: 3.33

Bachelor of Technology in Electronics and Communication Engineering

Amrita School of Engineering, Bengaluru, India

Courses

Database Foundations: Intro to Databases

MySQL for Non-Programmers

Introduction to GANs

my Python basic certification

Excel Essential Training (Microsoft 365)

Power BI Essential Training (2024)
