

Chetan Reddy Godumagadda

Full Stack .NET Developer

Albany, NY | +1 (518) 577-9687 | cgodumagadda@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack .NET Developer with 5+ years of experience building scalable web applications using C#, ASP.NET Core, Angular, SQL Server, and REST APIs across financial and healthcare domains. Proven expertise in microservices, cloud platforms (Azure, AWS), and DevOps practices. Strong background in Agile delivery, code optimization, front-end development, and secure application deployment. Passionate about delivering clean, maintainable, and performance-optimized solutions aligned with business needs.

SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core, .NET 5/6/7, Web API, Entity Framework Core, Razor Pages, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, jQuery
- **Frontend Technologies:** Angular 13+, React.js, Blazor, Bootstrap, Material UI
- **Database Technologies:** SQL Server, PostgreSQL, MySQL, ADO.NET, Dapper, LINQ
- **DevOps & Cloud:** Azure DevOps, Azure App Services, Azure SQL, GitHub Actions, AWS (EC2, RDS), Docker, Jenkins
- **Tools & Practices:** Visual Studio, Git, Postman, Swagger, SSRS, Agile (Scrum), Jira, Confluence, CI/CD Pipelines, RESTful API, JWT Authentication, SOLID Principles, Microservices Architecture, Clean Code
- **Testing & Security:** xUnit, NUnit, Moq, Selenium, OWASP Top 10, Identity Server, OAuth 2.0
- **Methodologies:** Agile (Scrum), SDLC, CI/CD, Microservices

EXPERIENCE

JPMorgan Chase & Co, USA | Full Stack .Net Developer

Oct 2024 - Current

- Engineered and maintained real-time financial dashboards and APIs using ASP.NET Core Web API and Angular, enabling instant visibility into portfolio positions and risk exposure.
- Developed RESTful microservices integrated with SQL Server and Entity Framework Core, achieving a 35% reduction in latency for high-frequency trading and reporting workflows.
- Automated build and deployment processes across development and UAT environments using Azure DevOps pipelines, streamlining release cycles and improving delivery speed.
- Strengthened application security by implementing IdentityServer4 with JWT-based authentication, ensuring compliance with internal audit and security policies.
- Built interactive, modular Single Page Applications (SPAs) using Angular 14, leveraging reusable components, lazy loading, and reactive forms to enhance maintainability and performance.
- Collaborated closely with Product Owners and Business Analysts in Agile/Scrum sprints to design and deliver investment solutions tailored for institutional clients.
- Designed CI/CD workflows and containerized API deployments using Docker, significantly reducing manual deployment overhead and increasing release reliability.

Hexaware Technologies, India | .NET Developer

Aug 2019 - July 2023

- Designed and developed a patient portal and appointment scheduling system using ASP.NET MVC, SQL Server, and jQuery, enabling streamlined healthcare access for patients.
- Migrated and refactored legacy services to .NET Core 3.1 Web API, resulting in a 40% performance boost and elimination of memory leaks in long-running processes.
- Integrated Power BI embedded analytics into the portal with secure, token-based authentication, delivering real-time, interactive visualizations to end users.
- Built and consumed RESTful APIs to enable seamless integration with external healthcare systems such as EHR platforms and lab information services.
- Developed reusable and accessible UI components using Bootstrap and Razor Pages, ensuring a consistent user experience and improved front-end maintainability.
- Implemented robust unit and integration testing frameworks using NUnit and Selenium, achieving 95% test coverage for backend systems.
- Contributed to HIPAA compliance initiatives by enhancing user audit logging, secure session management, and data access controls.

CERTIFICATION & EDUCATION

Database Programming with SQL - Oracle.

Introduction to Python Programming.

Master's in Information Science | University at Albany, Albany, NY
