

Technical Skills

Languages: JavaScript, Python, SQL, HTML, CSS

Frameworks & Libraries: React, Node.js, Express.js, Flask, Cypress, Jest, Vitest

Databases: MySQL, PostgreSQL, MongoDB

Cloud Services & DevOps: Netlify, Render

Dev. Tools: Git, ThunderClient, Vite, VSCode

Education

Texas Tech University

B. Sc. in Management Information Systems, (Application Development)

Lubbock, TX

Jun. 2017 - Jun. 2022

Springboard Software Engineering Bootcamp

Certification in Full Stack Software Engineering

Remote

May 2023 - May 2024

Work Experience

Outliers AI

AI Content Developer/Trainer

Remote

Jun. 2024 - Present

- Engineered and enhanced prompts and responses for **computer science** and **Management Information Systems**, focusing on data algorithms, coding questions, and frameworks like the five forces model and Schein's three levels of culture, by reviewing and creating content to ensure accuracy.
- Evaluated** artificial intelligence outputs using statistical analysis tools and delivered structured feedback to enhance the accuracy and efficiency.
- Participated in **weekly meetings** to discuss correct prompt writing and evaluation, asking targeted questions alongside other team members to enhance understanding and effectiveness in independent tasks.

Springboard Software Engineering Bootcamp

Software Engineering Fellow

Remote

May 2023 - May 2024

- Completed **800+** hours of coursework and developed **4** in-depth projects including **2** full-stack web apps under the guidance of industry experts.
- Developed a full stack **CRUD** application using **JavaScript**, integrating **React** for front-end development with **state management** techniques utilizing `useState`, `useContext`, and `appReducer`, alongside a back-end powered by **Node.js** and **Express.js**, focusing on asynchronous programming and middleware implementation, and enhanced by **HTML** and **CSS**, ultimately achieving a peak response time of under **150ms** for standard operations.
- Engineered a Flask web application utilizing **HTML**, **CSS**, **Jinja**, **JavaScript**, **SQLAlchemy**, and **PostgreSQL** to create a shopping list and a Bootstrap carousel, while implementing **Flask forms (WTForms)** and **Flask Bcrypt** for password authentication and session management. Integrated the **Spoonacular API** to enable users to search for and add recipes to a meal plan, employing **Beautiful Soup** for data parsing and cleanup.

Innovative Solutions Ltd.

Software Engineering Intern

Remote

Jan. 2024 - Feb. 2024

- Collaborated with a **senior engineer** to deliver full-stack applications leveraging **JavaScript**, **React**, **MongoDB**, and **Express.js**, while acquiring proficiency in modern software development technologies and methodologies through structured mentorship and hands-on project execution.
- Evaluated and deployed comprehensive software solutions, implementing robust test suites including **E2E Tests with Cypress** for functionality validation, alongside **Unit Test and Integration Tests** using **Jest** and **Vitest** frameworks, achieving an overall code coverage of **93%**.
- Deployed the application on **Render** to leverage its automatic scaling and streamlined deployment pipelines, enhancing performance and reducing manual oversight.

Software Projects

Feast Finder - Food Delivery App

Feb. 2024

- Developed a full-stack web application using **JavaScript**, **React**, and **MongoDB**, with **Node.js** and **Express.js** powering the backend, integrating **Stripe** for secure payment processing and user account management, incorporating dynamic shopping cart features, real-time order tracking, and an admin panel to efficiently manage items and orders.

Meal Masters - Fitness Dieting Recipe App

Oct. 2023

- Designed and developed a full stack **CRUD** web application for meal plan creation, integrating **Spoonacular API** for personalized recipe searches.
- Developed meal planning and weight tracking applications using **Flask**, **Jinja**, **Python**, **HTML**, and **CSS**, enhancing security by employing a custom decorator function for user authentication that utilized **bcrypt** for password verification and session management to validate user access before rendering new pages, and utilized **PostgreSQL** with **SQLAlchemy** for database management, achieving system reliability with an uptime of **99.9%**.

Movie Mingle - Social Media App

Dec. 2023

- Developed a user-friendly web application and **RESTful API**, integrating real-time **API** and **SQL** for improved browsing, list creation, and chat features, achieving efficient database management using **JavaScript**, **Node.js**, and **Express.js**.
