

CHRIST RODRIGUES

Boston, MA | (857) 264-8431 | rodrigues.ch@northeastern.edu | [Linkedin.com/in/christ-rodrigues/](https://www.linkedin.com/in/christ-rodrigues/)

SUMMARY

Full-stack Software Engineer with hands-on experience in React, Node.js, and Java. Skilled in building scalable applications, optimizing performance, and implementing RESTful APIs in collaborative environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript
Frontend: React, JavaScript, TypeScript, HTML5, CSS3, SASS, jQuery, Responsive Design
Backend: Node.js, Express.js, Spring Boot, Spring, Hibernate, RESTful APIs
Database: MySQL, PostgreSQL, MongoDB, Oracle, SQL Server
Developer Tools: Git, GitHub, Docker, Jenkins, Maven, VS Code, Visual Studio, Eclipse, Postman
Design: Figma, Adobe XD, UI/UX Design Principles, Responsive Design
AI/ML: OpenAI API, LangChain, RAG Systems, Vector Databases, Prompt Engineering

PROFESSIONAL EXPERIENCE

Software Developer Intern, IpersLab | Mountain View, CA Sep 2024 - Dec 2024

- Developed scalable full-stack features, utilizing **ReactJS**, **JavaScript**, and **PostgreSQL**, increasing system efficiency by 40%.
- Boosted backend performance by 30% by refactoring **SQL** queries and business logic, reducing execution time by 25%.
- Contributed to the **software development lifecycle** using **Java**, **JDBC**, and **Maven** in an **Agile/Scrum** environment.
- Built and integrated robust **RESTful APIs** for seamless frontend and backend communication, improving data exchange by 20%.

Software Developer, Vistaar Digital Communications | Mumbai, IN Aug 2021 - Nov 2022

- Engineered multiple enterprise web solutions for pharmaceutical clients using **HTML5**, **CSS3**, **JavaScript**, and **Node.js**, improving UI responsiveness and increasing client engagement metrics by 25%.
- Refined page load times by 30% through optimization techniques, enhancing user experience and overall application performance.
- Integrated **APIs** to support real-time pharma content delivery, increasing session time by 35%.
- Automated **CI/CD** pipelines using **Jenkins** and **Git**, cutting release turnaround time by 40% and ensuring deployment consistency across dev, staging, and production environments.
- Streamlined frontend load performance and responsiveness using image compression, script bundling, and lazy loading, resulting in 30% faster page loads and improved Lighthouse scores.

PROJECTS

University Knowledge Chatbot | RAG System May 2025 - Jun 2025

- Built end-to-end **RAG** pipeline processing 3+ university web pages with **1000+ text chunks** using **LangChain** framework.
- Configured **ChromaDB** with **OpenAI** embeddings to enable semantic search and retrieval for **LLM**-powered document querying.
- Architected text **chunking** strategy (1000 tokens, 200 overlap), improving answer relevance by 30% through contextual retrieval.

Inventory Management System Mar 2025 - Apr 2025

- Designed a scalable inventory system using **Java**, **Spring Boot**, and **MySQL**, applying Facade, Command, and Singleton **design patterns** to ensure maintainable architecture and reduce system complexity by 30%.
- Automated invoice workflows and alerts, accelerating transaction processing by 35% and reducing user errors by 25%.
- Leveraged **generative AI** tools like **GitHub Copilot** and **Claude AI** to accelerate backend development by **35%** and dynamically generate product descriptions and purchase summaries, enhancing content consistency and delivery speed.

Attendance Management System Mar 2024 - Apr 2024

- Engineered a full-stack system using **Spring Boot**, **Hibernate**, and **JSP** to automate attendance tracking for 300+ students.
- Accelerated data processing with **Spring Data JPA**, resulting in a 30% faster response time, significantly accelerating the overall performance and efficiency of the attendance management system.
- Enforced referential integrity in **MySQL** database to prevent the deletion of students with associated attendance records.

EDUCATION

Northeastern University, Boston, MA Jan 2023 - May 2025
Master of Science in Software Engineering Systems

Mumbai University, Mumbai, India Aug 2018 - June 2021
Bachelor of Engineering in Computer Engineering
