

Yeswanth Reddy Seelam

(734) 576-1081 | yeswanthreddy2242@gmail.com | Ypsilanti, MI
www.linkedin.com/in/yeswanth-reddy-seelam

Experienced Engineer with a demonstrated history in construction planning, site management, and quality control. Skilled in data collection, safety inspections, and project management. Proven ability to teach and guide students, enhancing their academic success.

EDUCATION

Master of Science in Construction Management (April 2025)

Eastern Michigan University (EMU) | Ypsilanti, MI

Bachelor of Science in Civil and Structural Engineering (May 2022)

Sri Chandrasekharendra Saraswathi Viswa Mahavidyalaya | Kanchipuram | India

SKILLS

Proficient in Primavera P6, Microsoft Projects, Autodesk Autocad, Site Assessment, Project Support, Work Methods Analysis, Technical Support, Field Support

EXPERIENCE

Graduate Assistant | EMU Technology Labs | Ypsilanti, MI

Aug 2024 - April 2025

- Maintained the lab environment, ensuring equipment functionality, and kept the space organized.
- Explained lab experiments to 30 students, providing clear instructions and guidance to enhance their understanding.
- Graded 60 papers per week accurately and efficiently, offering constructive feedback.
- Assisted professors with various academic tasks, contributing to a smooth and effective learning environment.

Part-Time Professor | Beibu Gulf University | Qinzhou, China

May 2024 - July 2024

- Developed, implemented, and graded two course materials, syllabi, lectures, readings, assignments, and exams for 60 students for a semester.
- Taught and advised students on personal matters while driving their academic success, attendance, and behaviour.
- Contributed to maintaining a school-wide culture of respect by actively utilizing positive behavioural interventions and supports (PBIS) disciplinary methods.

Intern-Site Engineer | Government of Telangana, Panchayat Raj Engineering Department | Telangana, India

Oct 2022 - Feb 2023

- Assisted an engineer by gathering data on material costs, daily material usage, and worker numbers while maintaining data sheets.
- Monitored construction activities to ensure adherence to plans, schedules, and quality standards, participated in safety inspections, and ensured compliance with safety regulations.
- Surveyed sites, collected measurements, assessed project conditions, managed construction operations, assisted in developing construction plans and specifications, provided technical support during project meetings, and conducted site visits to ensure compliance with design specifications.

Intern Site Engineer | Local Contractor Telangana, India

May 2022 - Aug 2022

- Assisted in developing construction plans and specifications, conducted site visits to ensure compliance with design specifications, and performed calculations related to material quantities, costs, and other critical factors.
- Monitored construction activities to ensure they adhered to established plans, schedules, and quality standards, and worked on renovation projects, preparing cost estimates for labor, equipment rentals, and materials required for specific tasks or entire projects.

Intern – Assistant Quality Check Engineer | M/S. Shree Shyamji Arch Infra | Guntur, India

Feb 2022 - Mar 2022

- Built concrete blocks by partially replacing cement and adding different admixtures like GGBS, checked the quality and process of the concrete mix.
- Conducted research for various projects related to the company's services and supported various program activities by assisting with administrative tasks. This role enhanced my practical materials science and project management skills within the construction industry.

Intern – Assistant Engineer | Government of Telangana Irrigation & CAD Department

I.B.Division|Yellandu, India

Dec 2019 - Dec 2019

- Assisted an engineer by compiling data on material costs, daily material usage, and worker counts while maintaining data sheets.
- Helped supervise daily work, conducted site research to examine soil conditions, and shadowed an engineer to gain insights into office work.
- Conducted Toolbox meetings and ensured favorable site safety conditions.

RELEVANT PROJECTS

Bachelors Projects:

- Designed and estimated a G+4 reinforced concrete (RC) residential building using AutoCAD, including detailed floor plans, elevations, and material quantity calculations.
- Case Study on Partial Replacement of Cement: Conducted a case study on partial cement replacement with alternative materials, analyzing its impact on concrete strength, durability, and cost-effectiveness.

Masters Projects:

- Enhancing Construction Safety Through Future Technologies: Innovations for a Safer Tomorrow

Intern Projects

- **Lake Bed Water Storage and Utilization Project:** Focused on water storage and its efficient use for various purposes, ensuring sustainable practices and resource optimization.
- **Concrete Mold Quality and Material Analysis Project:** Checked the quality and quantity of materials required for creating concrete molds for large industries, ensuring compliance with standards, and worked as the office management officer.
- **Residential House Renovation and Site Management Project:** Assisted in developing construction plans and specifications for a complete house renovation, ensuring compliance with design standards. Conducted site visits, monitored construction activities, and prepared labor, materials, and equipment cost estimates.
- **G+2 Residential Buildings and Road Construction Project:** Assisted in gathering data on material costs, usage, and worker numbers for G+2 residential buildings and road projects. Monitored construction activities, ensured compliance with plans, schedules, and quality standards, and participated in safety inspections. Conducted site surveys, developed construction plans, and provided technical support during project meetings.
