Experienced database analyst/developer. Experienced in data modeling, data analysis, systems, database design and development and ETL. Strong SQL, T-SQL and PL/SQL skills.

Security Clearance: Secret

Qualifications

Summary of Education:

Bachelor of Science in Mathematics, minor in Economics, 1986
University of South Alabama, Mobile, Alabama

Training:

Courses within the DMBOK and CDMP Preparation Learning Plan: March 2019

1. The Data Management Process, DMBOK, and Overview of the CDMP Certification
2. Data Governance (Including Data Ethics)
3. Data Quality Management
4. Master and Reference Data Management
5. Data Warehousing and Business Intelligence Management (Including Big Data)
6. Data Modeling
7. Metadata Management
8. Data Architecture and Lifecycle Management
9. Data Security Management
10. Document and Content Management
11. Data Storage and Operations Management
12. Data Integration and Interoperability

Certifications:

CompTIA Security+	2/01/2014 - 2/12/2029
Certified Data Management Professional (CDMP) Associate	3/01/2019 – 12/31/2025
Asure Data Engineer Associate	2/18/2025 - 02/18/2026

Employment History

Plateau Software Inc., Senior Developer & Systems/Database Analyst, May 16, 2018 – Nov 14, 2025

Contractor: U.S Army Combat Readiness/Safety Center, Ft Rucker, Alabama

- Continued maintenance and development of the DRRSA UIC Processing System
- Weekly, Biweekly, Monthly UIC Processing
- Data Analysis of AOS UIC data, Integration of AOS UICs with DRRSA UICs
- Data Analysis, Business Rule & Requirements identification and documentation of RCAS data and application
- Database development for RCAS
- External Data Source Analysis and Import Development with integration into ASMIS2
 - OSHA Establishment Codes
 - Station Codes
 - HQIIS Real Property Assets
- Provide ASMIS2 Developer support
- ASMIS2 application and database testing
- Production Support and troubleshooting, Issue and data analysis
- ASMIS2 Analytics database query support
- Project Lead in the OSD Minimum Data Element Requirements gathering (database, application and OSD extract requirements), User Story/Data task development, database development
- External Data Source Analysis and Import Development

- Project Lead in the OSD Minimum Data Element Requirements gathering (database, application and OSD extract requirements), data task development, database design and development
- ETL and Database design and development
- Database support for the Combat Readiness / Safety Center ASMIS2 applications
 - Near Miss and Mishap Reporting, Hazards and Inspections
- Support of integration between ASMIS2 applications and Analytics

Global Technical Services, Senior Developer/Analyst, May 2011 – May 2018

Bering Straits Native Corporation, Alaska

Contractor: U.S Army Combat Readiness/Safety Center, Ft Rucker, Alabama

- Senior database analyst/developer of the data tier for ASMIS2 formerly ASOHEIMS. Provide database support for the A03 Mishap Reporting and A02 Inspections Application teams.
- Senior database analyst/developer of the data tier for the Army Safety and Occupational Health Enterprise Information Management System (ASOHEIMS).
 - Responsible for design, development of the transactional layer. Worked with Lead Data Architect.
 - Responsible for the mapping and migration documentation.
 - Responsible for data analysis and migration planning of the legacy data.
 - Worked with DoD to have more integrated data.
 - Responsible for the analysis of external Data Sources. Worked with team on ETL procedures and packages for incoming data sources.
 - Worked with team on the development of views, database procedures and ETL packages for the migration of the legacy mishap data.
 - Work with team on the design and development of the ASOHEIMS data warehouse using SSIS and MicroStrategy Business Intelligence Tool.
- Developer in the requirements gathering, design and development of the Army Safety Management Information System (ASMIS) data warehouse using SQL Server Analysis Services and DevExpress Dashboard Designer.
- Team Developer in the design, development and merge of current ASMIS and ReportIT system databases into one SQL Server database.
- Team Developer in the design, development, migration planning, analysis and migration of the new Enterprise database
- Project Coordinator, Technical/Business Analyst and Developer in the support of over 8 .NET and SQL Server applications maintaining Department of Defense (DoD) Information Assurance Certification and Accreditation Process (DIACAP) security requirements.
- Provide system and data impact analysis for major update initiatives due to business rule updates in accordance with DoD and Army regulatory guidance.
- Work with team members in the design, development and implementation of application and data enhancements as well as troubleshooting and resolving application and data issues.
- Development of the DRRSA UIC Processing System

QinetiQ North America, Aerospace and Defense Group, Senior Developer/Analyst, April 2001 – May 2011

Cobro / Westar Aerospace and Defense Group

Ft. Rucker, Alabama

Contractor: U.S Army Safety Center, Ft Rucker, Alabama

SQL Server

- Member of the ReportIT team that worked in the development of a new Accident Reporting Input and Quality Control System.
 - Design and Development of the new ASMIS database in SQL Server.
 - Also served in role of collecting and documenting technical validation requirements.
- Role of technical lead and SME for an enterprise-wide project to migrate all Oracle 10g applications and databases to the Windows 2003 and SQL Server 2005 database platform.

- Provided technical guidance on the strategy to migrate to the new platform. Served as a database developer to create new stored procedures in SQL Server 2005 during the process incorporating existing functionality and adding new business rules.
- Analyzed the current database design and table structure to make adjustments where necessary. Developed reports in SSRS. Worked with ETL jobs in SSIS. Worked with other development team members to provide direction on changes to web applications based on existing requirements.
- Team member in the design, development, documentation and conversion/migration of over 8 Oracle applications and databases to SQL Server 2005 and .Net using SQL Server 2005 SQL, T-SQL, Management Studio, Reporting Services, Report Builder, Integration Services and Microsoft Visual Studio 2005/2008.
 - Played major role in the development and implementation of the Microsoft Reporting Services Report Builder tool as an ad hoc reporting tool for the organization using SQL Server 2005 BI Suite. Designed and developed report models.
 - Helped to lead the transition from Oracle Discover to Report Builder. Participated in the development of training materials and administering of training to the user community.
 - Worked with the business community to document and finalize business rules. Worked to educate management and business users on the new functionality.

Oracle Systems

- Team member in the design, development, implementation, documentation and training of the Risk Management Information System (RMIS) Registration System using Oracle Mod PL/SQL & PL/SQL, Oracle Internet Directory (OID), Microsoft .NET and Oracle 9i Application Server. Team member in the addition of enhancements and conversion of RMIS to Oracle 10g Application Server.
- Team member in the design, development and implementation of RMIS Quick Search using Cold Fusion and Oracle, the Recommendations Tracking System using Cold Fusion and Oracle with integration to the master Findings & Recommendations System, as well as the Preliminary Loss Reporting System which records preliminary accident information as it occurs using Microsoft .NET and Oracle database.
- Project lead in the design, development, implementation and training of the Document Management System using Oracle Developer 2000 Forms 6i, Oracle database, PL/SQL and Adobe Acrobat. The system managed the digitization and location of accident records.
- Team member in the analysis, requirements, design and development of the Centralized Accident Investigation Preliminary Reporting Management System in Mod PL/SQL and Oracle 10g Application Server.
- Provided maintenance, support and enhancements to the Oracle 6i Forms Accident Reporting Input and Quality Control, Recommendation & Tracking System (RTS), Population and CasePrint applications.
- Technical resource for the organization to develop, manage, support and administer Oracle Discover.
- Responsible for software upgrades to Oracle Discover versions 3 to version 10g. Provided technical and end user support for Oracle Discoverer Desktop and Discover Plus 9/10g for both internal and external customers.
- Worked as a technical resource in the overall design, development and maintenance of Oracle databases and applications for an organization that is responsible for housing the safety data for the entire Army.
- Experienced with creating entity relationship diagrams and data dictionaries using the Erwin data modeling tool.
- Performed Oracle DBA duties implementing replication, security, full text searching, table/index analysis, user account/job creation and management as well as other DBA duties.
- Provided user support by troubleshooting and resolving database and application issues.
- Subject Matter Expert on the organization's data, business processes and business rules. Worked with all levels of the organization to provide expert advice and implement new capabilities.
- Worked on several projects to upgrade Oracle databases to newer versions (i.e. Oracle 8 to 8i, Oracle 8i to 9i, Oracle 9i to 10g).
- Team member in a 6-month application DIACAP review process identifying and remediating security vulnerabilities on two different occasions (2010 and 2013). Worked with Oracle DBA and developer to implement new security processes and procedures for the organization.

- Responsible for making enhancement modifications to Oracle Developer 2000 Forms and Reports 6.0. Modified and tested Oracle database packages and procedures to incorporate new security structure and improve performance for Oracle 8i, Oracle 9i and Oracle 10g.
- Application Server Administrator for 9i and 10g. Team member in the configuration and maintenance of the Oracle 9i Application Server.
- Developed documentation plan and team member for the installation, configuration and implementation of the Oracle 10g Application Server. Provided administration for the following OAS components: Oracle Internet Directory (OID), HTTP Server and Discoverer.
- Worked with packages and procedures for the internet/intranet using Oracle Web application server 4.0.8, 9iAS and 10gAS. Produced and maintained Mod PL/SQL reports on the Risk Management Information System (RMIS) Web Site (NIPRNET and SIPRNET).

Automated Business Systems and Services, Consultant, Dec 2002 – Oct 2005

Washington D.C.

Consultant: City of Mobile, Alabama

- Provided support, maintenance and development services in the conversion of the Request for Action System (REACT) to a more dynamic system for sale, distribution and implementation to other entities, developed in PowerBuilder, Oracle, and SQL Server.

AllStates Technical Services, Contractor, May 2001 – Dec 2005

Mobile, Alabama

Contractor: City of Mobile, Alabama

- Provided support and maintenance when required for the Request for Action System (REACT), developed in PowerBuilder and Oracle. Provided support and maintenance for other systems as required.

City of Mobile, Office Automation Coordinator, Database Analyst I, Database Analyst II, 1987 – April 2001

Mobile, Alabama

- Project lead in the requirements gathering, design, development, implementation and training for systems using Oracle SQL*Forms 3.0, SQL*Plus, PL/SQL, Databus and SQL Reportwriter. Systems include Municipal Offense Ticket System and the City-Wide Training System.
- Project lead in the data conversion, implementation and training of the Mainstreet Mobile Downtown Properties system from Access to Developer/2000 v4.5. Developed a web application using Oracle's Web Application Server and PL/SQL.
- Member of Oracle Financials data conversion team using Oracle procedures (PL/SQL)
- Lead developer on a data conversion team for Urban Development's current permitting system and related systems contained in flat files and Oracle to that of Tidemark's Permitting System in Oracle. Worked with a Tidemark developer to create data mapping documentation.
- Assisted in the conversion, implementation and training of the City of Mobile Police Information System (COMPIS) system from PowerBuilder to Oracle Web Application Server, PL/SQL. The system was used by approximately 600 users. Provided maintenance of the system.
- Responsible for instructing classes on the following software: Microsoft Word, Excel, Oracle, RMS/XA Resource Management System Extended Architecture operating system and several in-house systems. Developed class documentation and manuals for Oracle and RMS/XA classes.
- Project lead in the requirements gathering, design, development, implementation and training of the Action Center REquest for ACTION System (REACT) system using PowerBuilder, Oracle PL/SQL, Folio & MapObject. The system records citizen requests with keyword-based request search and routes them to the department responsible for providing the service and interfaces with several other systems within the city, including Geographic Information Systems (GIS). Provided support, maintenance and enhancements to the system. The system was used by 13 city departments with approximately 150 users.
- Project lead in the requirements gathering, design, development, implementation and training of the Mobile Area Crimestoppers System using PowerBuilder and Oracle. The system records anonymous tips from citizens to assist in solving and preventing crimes. Provided support, maintenance and enhancements.

Skills/Hardware/Software/Awards

Expert: SQL Server Database, TSQL, Data Analysis and Migration Planning, ETL

Hardware/Software Experience:

Development Tools

- Oracle Forms, Reports, SQL and PL/SQL, Oracle Discoverer Business Intelligence (BI) Tool
- PowerBuilder, Cold Fusion, Microsoft Visual Studio 2005/2008/2013/2015
- SQL Server Database and BI Suite (SQL Reporting Services and Report Builder)
- SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS)
- Erwin, Visio, DevExpress Dashboard Designer,
- Toad for Oracle and SQL
- SQL Server Management Studio (SSMS), SQL, T-SQL
- Strong SQL skills

Databases

- Oracle 6 to 10g
- SQL Server

Awards: N/A
