EDUCATION

Master of Science in Business Analytics

University of Illinois at Chicago | Chicago, Illinois | 2026 | 3.70

Bachelor of Engineering in Electronics & Communication Eng.

Panjab University | Chandigarh, India | 2022 | 3.73

EXPERIENCE

Data Analyst

Deloitte | Gurugram, India

May 2022 – July 2024

- Designed and automated end-to-end **ETL pipelines** in **Azure** integrating multi-source sales and product data for a global FMCG client, **reducing report turnaround time by 40%** and enabling faster **data-driven decision-making** for supply chain planning, **pricing analytics**, **demand forecasting**, and regional performance monitoring across multiple markets.
- Conducted **root cause analysis (RCA)** on high-priority reporting and data pipeline issues using **advanced SQL, Python, and Databricks**, **identifying pipeline bottlenecks**, faulty joins, and transformation logic errors; collaborated with client architects to deploy permanent fixes, enhance **data quality**, and **improve pipeline stability by 50%**.
- Partnered with **cross-functional business teams** to translate complex data patterns into **actionable insights**, directly influencing product mix optimization, financial planning, and logistics cost reduction; delivered **executive-ready KPI dashboards and RCA reports** aligned with **data governance standards and stakeholder requirements**.
- Served as primary analytics point of contact during early project phases, independently managing **JIRA defects**, investigating data discrepancies, presenting **root cause findings to business stakeholders**, and implementing reporting and transformation logic fixes to restore **data accuracy, metric consistency, and stakeholder confidence**.
- Supported project scaling and knowledge transfer by onboarding and mentoring new team members, providing functional walkthroughs of **data pipelines, ETL workflows, reporting logic**, and known edge cases, while acting as a **go-to resource** for resolving **SQL, Python, and data validation issues** during development, **UAT**, and ongoing production support.
- Designed and optimized Azure data pipelines** for new analytics and reporting use cases by strategically orchestrating parallel and sequential activities, improving **execution efficiency, error handling, and data availability**; implemented structured **failure handling (try/catch patterns)**, optimized data writes to ADLS, integrated **upstream business-facing application inputs**, and delivered a pipeline design selected over alternative approaches for production deployment.

Data Analyst Intern

Deloitte | Gurugram, India

January 2022 – May 2022

- Created **Excel and Power BI dashboards** tracking **forecast accuracy** and **market-level KPIs**, enabling regional managers to identify underperforming SKUs and high-growth segments and supporting **data-driven decisions** around regional performance reviews.
- Led **data quality review sessions** with stakeholders to address data anomalies, performed structured root cause analysis, and aligned corrective actions, **cutting recurring data errors by 30%** and improved trust in downstream analytics and reports.
- Developed reusable data ingestion workflows using Python and Azure to automate **data cleaning, data merging, and feature engineering (lagged sales, growth rates)**, standardizing preparation logic across analyses and **reducing manual preparation time by 60%**.

SKILLS

Data & Analytics: SQL, Power BI, Tableau, Microsoft Excel (Pivot Tables & Pivot Charts, VLOOKUP/XLOOKUP, INDEX-MATCH, Power Query, Conditional Formatting, VBA & Macros, Slicers, Data Validation), Data Quality Analysis, KPI Development, Reporting & Dashboards, Data Visualization, Microsoft Office Suite

Data Platforms & Tools: Azure Data Factory, Azure Databricks, Azure Data Lake, Azure Synapse Analytics, Salesforce (Reporting), BI Tools, Alteryx Designer, Microsoft Access

Programming & Databases: Python, Spark-SQL, Scala, R, MySQL, Graph DB, Spark

Governance & Process: Data Lifecycle Management, Data Integrity, Cross-Functional Collaboration, Root Cause Analysis

PROJECTS

Customer Churn and Revenue-Impact Analysis

University of Illinois at Chicago | Chicago Illinois

November 2025 – December 2025

- Analyzed customer transaction and engagement data using SQL and Python to identify churn drivers, perform feature engineering, and segment customers by risk and lifetime value (CLV) across multiple customer cohorts.
- Built dashboards** tracking **churn rate, retention cohorts, and revenue impact**, delivering scenario-based insights to support targeted **retention strategies** and **long-term revenue optimization decisions**.

Airline On-Time Performance Analytics

University of Illinois at Chicago | Chicago, Illinois

May, 2025 – June, 2025

- Built automated **ETL workflows in Python (Pandas, NumPy)** to clean, transform, and validate large-scale datasets supporting operational datasets, improving **data reliability** and readiness for downstream analytics.
- Developed **interactive Tableau dashboards** with **geospatial analysis** and **KPI benchmarking** to identify delays and **operational bottlenecks**.
