Education

Central Michigan University , Hamtramck, MI <i>Master of Science - Information Systems</i> (1 st Major: Project Management, 2 nd Major: Business Data Analytics) GPA: 3.44	December 2023
National University , Bangladesh <i>Bachelor of Science in Computer Science & Engineering</i>	March 2012

Certifications

Sales Excellence: Science of Relationship Selling - Sapient: Strategy consulting and research	August 2018
Lean Startup - Lean Startup Machine	November 2019
LeaderShape - LeaderShape Inc	January 2023
Lean Six Sigma Green Belt - Central Michigan University	May 2023
AWS Cloud Practitioner - Amazon Web Services	January 2025
Project Management Professional (PMP) - PMI	September 2025
Google Certified Data Analyst - Google Inc.	Expected: December 2025

Skills

Business Analysis: Requirements Gathering, Functional Design, Agile SDLC, Testing Documentation
Tools & Software: SQL, SAP, JIRA, Confluence, Microsoft Office Suite(Power BI), MS Visio, SmartSheet, Amazon QuickSight, Tableau, RStudio, Slack, Lucid Chart, ServiceNow, Asana, Trello, Smartsheet, Clover, NRS.
Project Management: Agile Methodology, Scrum, Risk Management, Planning, Scheduling, End-to-End Testing, PMP
Technical Proficiency: SSDLC, Data Integration, Business Process Optimization, Process Design

Experience

Project Manager <i>Elite Merchant Services, Orchard Lake, Michigan</i> -Lead end-to-end project management for fintech, customer support, and digital initiatives, overseeing full SDLC from requirements gathering, design, development, deployment, to post-launch optimization. -Collaborated with cross-functional teams to ensure alignment on objectives, project milestones, scope, schedule and budget. -Supported Agile/Scrum ceremonies, including daily stand-ups, sprint planning, backlog refinement, and retrospectives to adherence Agile methodologies. -Manage partnerships with credit card processors (Worldpay, Maverick, Shift4, Elite North) to deliver secure, scalable, and customer-focused payment solutions. -Oversee sales and service delivery to ensure client onboarding, solution adoption, and achievement of business objectives. -Plan, coordinate, and execute Agile/Scrum projects, including social media campaigns, website design, and website development, enhancing brand visibility and digital presence. -Work closely with customers to maintain cloud-based solutions, ensuring uptime, reliability, and performance optimization. -Lead customer support initiatives, including troubleshooting, escalation management, and service improvement planning to drive satisfaction and retention. -Develop process documentation, training materials, and success guides to streamline onboarding, adoption, and customer engagement. -Utilize Smartsheet for project tracking, task automation, workflow optimization, and real-time team collaboration, improving transparency and accountability. -Build and maintain dashboards and reporting tools to monitor project KPIs, track progress, and allocate resources efficiently. -Integrate Smartsheet with productivity tools such as Slack, Jira, and Microsoft Teams to enhance workflow efficiency and team communication. -Mentor team members in Agile project coordination, cloud adoption, and customer service best practices, ensuring high-quality project delivery. -Performs other duties as assigned by the supervisor.	August 2025 - Present
Customer Success Manager <i>InNeed Intelligent Cloud, Richardson, Texas</i>	May 2024 – July 2025

- Assisted in managing the end-to-end lifecycle of cloud-based and software development projects, including planning, execution, monitoring, and closure.
- Collaborated with cross-functional teams to ensure alignment on objectives, project milestones, scope, schedule, and budget.
- Supported Agile/Scrum ceremonies, including daily stand-ups, sprint planning, backlog refinement, and retrospectives, to ensure timely delivery and adherence to Agile methodologies.
- Monitored project risks, dependencies, and escalations, assisting in mitigation planning to reduce potential impacts on schedule, cost, and quality.
- Served as a client-facing point of contact, maintaining strong relationships and providing clear updates on project status, timelines, and deliverables.
- Worked alongside software developers to ensure code quality, architecture, and deployment strategies aligned with cloud infrastructure requirements and business objectives.
- Gained exposure to AWS cloud platforms, CI/CD pipelines, containerization, compute, storage, networking, and security concepts.
- Developed and maintained detailed project plans, tracking deliverables, timelines, resource allocation, and risks.
- Built dashboards and reports using Amazon QuickSight, Tableau, Power BI, and Excel to monitor system performance, adoption, and project KPIs.
- Contributed to continuous improvement initiatives by documenting lessons learned, refining processes, and supporting team adoption of best practices.
- Assisted with project documentation, SOW review, vendor coordination, and cost tracking to support budget management and compliance.
- Mentored junior team members on project coordination, Agile practices, cloud adoption, and client engagement strategies.
- Assisted with cost analysis, SOW review, vendor quotes and financial paperwork tracking for projects
- Performs other duties as assigned by the supervisor.

IT Support Coordinator

May 2015 - January 2022

InterCloud Ltd, Dhaka, Bangladesh

- Managed end-to-end coordination and delivery of 100+ IT and telecom projects, including Internet, data connectivity, IP telephony, cloud services, SMS services, and software/app development.
- Conducted over 500 customer visits as a pre-sales engineer to understand business needs, identify solutions, and propose tailored IT and cloud offerings.
- Delivered first- and second-level support to 350+ users, troubleshooting hardware, software, and network issues both onsite and remotely.
- Assisted with cloud service setup, system access, user account management, and application support to ensure seamless adoption and uptime.
- Developed and maintained IT support and project schedules using MS Project, ensuring timely issue resolution and successful project delivery.
- Applied Agile and Waterfall methodologies to coordinate tasks, manage resources, and streamline project execution across cross-functional teams.
- Monitored system performance, conducted regular system checks, and documented incidents to prevent recurring issues.
- Performed data analysis and reporting to track project performance, user adoption, and service outcomes, providing actionable insights for decision-making.
- Trained end-users on new IT systems, cloud platforms, and communication tools to enhance operational efficiency.
- Collaborated with technical teams to escalate and resolve complex issues within defined SLAs, ensuring high-quality service delivery.
- Assisted with risk management, system checks, training, and process improvement initiatives across cross-functional teams
- Performs other duties as assigned by the supervisor.

Executive, Enterprise Solutions

July 2013 - November 2014

Netcom Technologies (Pvt.) Limited, Dhaka, Bangladesh

- Supported the delivery of 16+ enterprise networking infrastructure projects, including data centers, low-voltage systems, audio/video, access control, cooling, and related IT infrastructure.
- Assisted the Project Management team in all phases of the project lifecycle, including initiation, planning, budgeting, scheduling, and execution, gaining hands-on experience in project management principles.
- Prepared BOQs, budgets, project schedules, and technical documentation to ensure projects were delivered on time, within scope, and on budget.
- Coordinated with cross-functional teams and vendors to ensure seamless installation, configuration, and integration of IT and network systems.
- Provided client support during onboarding and training, enabling smooth adoption of IT and networking solutions.
- Assisted in monitoring project progress, maintaining quality standards, and documenting lessons learned to improve future project delivery.
- Gained practical knowledge of PM processes, resource allocation, risk management, and cost control in enterprise IT infrastructure projects.
- Performs other duties as assigned by the supervisor.
