PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience specializing in comprehensive data cleaning, analysis, and generating actionable insights from complex datasets. Expertise includes advanced SQL, Python, and R for data manipulation, alongside proficiency in Power BI, Tableau, and Excel for dashboard creation and reporting. Background encompasses optimizing data processing with tools like Apache Spark and dbt, and cloud platforms such as AWS S3 and Redshift. Skilled in transforming raw data into clear, impactful recommendations for business operations, with experience in dynamic financial tech and e-commerce sectors.

TECHNICAL SKILLS

- Data Streaming:** Apache Kafka
- Cloud Platforms:** AWS Glue, AWS Kinesis, AWS CloudWatch, AWS EMR, AWS Lambda, AWS S3, AWS Sagemaker
- Programming Languages:** Python, SQL, R
- Infrastructure as Code:** Terraform
- Data Warehousing & Databases:** Snowflake, Amazon Redshift
- Data Processing & Orchestration:** Apache Spark, Apache Airflow, PySpark, dbt
- Business Intelligence & Analytics:** Power BI, Tableau, Looker, Excel

WORK EXPERIENCE

Brex , Data Analyst	Apr 2024 to Present
- Performed extensive data cleaning and validation on corporate expense and banking transaction data using SQL and Excel, ensuring accuracy for reporting. - Developed interactive dashboards in Power BI to visualize key financial performance metrics related to corporate card spending and bill payments. - Generated detailed daily and weekly reports on financial data for business operations, identifying trends relevant to emerging markets like India. - Analyzed diverse datasets to identify patterns in customer spend behavior and expense management, providing actionable insights to internal teams. - Wrote and optimized SQL queries to extract relevant data from various financial databases for ad-hoc analysis and specific reporting requests. - Assisted in preparing presentations summarizing data findings for stakeholders, translating complex data into understandable business narratives. - Supported data integrity initiatives by regularly cross-referencing information across multiple financial data sources, ensuring consistent data quality. - Contributed to data analysis projects using basic Python scripts, automating routine data manipulation tasks to improve efficiency and reduce manual effort. - Engaged with cross-functional teams to understand their data requirements, delivering tailored reports and dashboards for various business units. - Maintained and updated existing Excel models and data sheets, performing regular checks to ensure all financial data remained current and reliable.	
ThredUp , Data Engineer	Oct 2021 to Jul 2023
- Cleaned and structured raw transactional data for resale orders and customer interactions using SQL, ensuring accuracy for analytical reporting and platform performance insights. - Built interactive dashboards in Tableau to visualize key performance indicators for inventory turnover and sales trends across diverse product categories. - Generated daily and weekly operational reports using Excel, detailing platform activity such as new listings, fulfilled orders, and customer returns analysis. - Analyzed large datasets to identify emerging trends in secondhand fashion and consumer purchasing patterns, providing strategic insights to merchandising and marketing teams. - Developed SQL queries to extract specific data segments related to seller performance and buyer preferences, supporting targeted marketing initiatives and product recommendations. - Prepared concise presentations summarizing data findings on platform efficiency and user engagement for various internal stakeholders, aiding data-driven decisions. - Implemented data validation routines in Excel to uphold the integrity of product catalog information and pricing structures on the online resale platform. - Created basic Python scripts to automate repetitive data extraction tasks for competitor pricing and market research within the broader resale industry. - Designed custom reports in Power BI to track the effectiveness of promotions and seasonal campaigns, offering insights into customer acquisition and retention strategies. - Maintained and updated data models in Excel, performing regular audits to ensure consistency and reliability of data used for internal financial reconciliation processes.	

EDUCATION

M.S. in Data Science	Dec 2024
New Jersey Institute of Technology, Newark, New Jersey	

CERTIFICATIONS

- Machine Learning Algorithms | Great Learning |
- Data Science with Python Programming training at FITA Academy
- Certified entry level Python programmer through Coursera
