PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience delivering actionable insights through SQL, Python, R, Tableau, Power BI and Excel. Proven ability to perform data cleaning, ETL processes, statistical analysis, dashboard creation and business intelligence reporting to support data driven decision making. Strong background in SAP ERP, AWS cloud services, data visualization, predictive modeling and stakeholder collaboration with a track record of improving operational efficiency, reducing costs and enhancing data quality.

TECHINICAL SKILLS

- Programming Languages: SQL, Python, R
- Database Management: Data collection, ETL, Data mining, Data Quality Assurance, Data Integration
- Data Visualization Tools: Tableau, Advanced Excel (Pivot Tables, VLOOKUP), Google Analytics, Power BI, KPI Analysis
- Databases: MySQL, Oracle, Microsoft SQL Server
- Software Proficiency: Microsoft Office Suite (Excel, Access, Word, PowerPoint), SAP ERP, Material Master Data Management, SAP Process workflows, MS Visio, Lucid Chart
- Cloud Platforms: AWS (EC2, S3, Glue, Athena, Sage Maker)
- Analytical Expertise: Predictive Modeling, Quantitative Analysis, Root cause analysis, Data Visualization

WORK EXPERIENCE

Data Analyst

Cytiva (Danaher Corporation)

Duncan, SC

March 2025 – December 2025

- Extracted, cleansed and analyzed manufacturing data (BOMs, routings, material master data) from SAP ERP using SQL and Advanced Excel enabling supply chain and operations teams to make data driven decisions.
- Developed and maintained Power BI KPI dashboards tracking inventory accuracy, production efficiency and cost trends, reducing reporting time by 25%.
- Performed Excel and SAP based data validation and variance analysis, ensuring audit compliance and accurate financial operational reporting.
- Partnered with cross functional stakeholders to translate complex manufacturing data into actionable insights, reducing recurring data discrepancies by 15%.

Data Analyst

Quest IT Solutions, Inc

Houston, TX

June 2024 – January 2025

- Extracted and transformed data from SQL Server, MySQL databases to support KPI reporting, variance analysis and executive dashboards.
- Integrated SQL datasets with Excel, Tableau and Power BI, enabling automated dashboards and reducing manual data preparation time by 40%.
- Ensured regulatory compliance by validating datasets and delivering accurate timely reports.

Graduate Assistant (Data Analytics)

Central Michigan University

Mount Pleasant, MI

August 2023 – January 2024

- Conducted data mining and predictive analytics using Python (Pandas, NumPy) and SQL identifying process improvements that increased operational efficiency by 15%.
- Designed Tableau dashboards and Excel reports summarizing academic and operational KPIs, enabling data driven planning.
- Provided detailed feedback on ERP course assignments explaining complex data concepts and improving student performance by 20%.

Advocacy Operations Associate

Amazon

Hyderabad, Telangana

September 2021–July 2022

- Analyzed large scale operational and financial datasets using SQL and Excel to monitor KPIs, SLA adherence and cost impacting process inefficiencies.
- Identified recurring trends and root causes, recommending process improvements that enhanced reporting accuracy by 20%
- Handled 50 support tickets per day with 90% quality, using data to identify recurring issues, document root causes and recommend process improvements.

- Analyzed financial, inventory and logistics data using SQL and Advanced Excel, identifying trends and variances that contributed to a 10% reduction in operational costs.
- Reconciled inventory and order tracking data with financial records, improving balance sheet accuracy and inventory valuation by 15%.
- Built recurring Excel based management reports and KPI dashboards summarizing cost performance, operational efficiency and budget variances for leadership.

PROJECTS

ERP Sim Manufacturing Company Project (SAP -Based)

- Used SAP ERP to model procurement, production, sales and logistics processes for a simulated manufacturing company, monitoring data flows and financial impacts.
- Analyzed SAP generated financial and operational reports to forecast demand, adjust Bills of Materials and make data driven planning decisions.
- Created executive level planning reports summarizing KPIs, control points and process changes, documenting how decisions flowed through the ERP and reporting lifecycle.

Sales & Profit Analysis Project (Tableau)

- Built an executive ready Tableau dashboard to analyze 2019–2022 sales and profit, tracking KPIs such as order volume, sales and profit by segment, profit percentage, average delivery time, average discount and average profit per order.
- Combined bar charts, KPI tiles, geographic maps and ranked customer tables (Top N states and customers by orders) to help stakeholders quickly identify high value segments and underperforming regions.

Food Management System

- Designed and developed a cross platform surplus Food Management System using Python (Tkinter) and SQLite, modeling entities and data flows to track donations and distributions across campus.
- Implemented data validation, role-based access and reporting features (CSV/PDF exports) to improve data integrity, auditability and visibility into waste-reduction metrics.
- Optimized query logic and error handling to support higher data volumes and concurrent users, improving system reliability for operations.

Wilco Construction Systems Analysis and Design Project

- Designed ER diagrams, data flow diagrams and a normalized MySQL database schema to support core construction business processes.
- Wrote and optimized SQL queries for analytics and reporting, troubleshooting performance issues and ensuring data consistency across modules.
- Documented system requirements, data models and reporting specifications in a structured Systems Proposal to guide future development and testing.

EDUCATION

Certifications

- Certified Lean Six Sigma Green Belt
- AWS Certified Solutions Architect– Associate
