

PRAKASH PRANEETH NAMAKAR

+1 (602) 770-7055 ◊ Tempe, AZ 85282
pnamakar.j@gmail.com ◊ LinkedIn ◊ GitHub

PROFILE

Data Analyst with hands-on experience delivering data-driven insights through SQL querying, ETL pipelines, Power BI and Tableau reporting, and predictive analytics. Proven ability to transform complex, multi-source datasets into actionable KPIs and stakeholder-facing dashboards. Strong communicator who translates technical findings into clear, intuitive narratives for non-technical audiences.

EDUCATION

Arizona State University

MS in Data Science, Analytics, and Engineering (Computing and Decision Analytics)
CGPA: 3.77/4.0

Tempe, AZ

Aug 2024 – May 2026

Vellore Institute of Technology

Integrated M.Tech in Software Engineering
CGPA: 7.76/10

Chennai, Tamil Nadu

July 2019 – May 2024

SKILLS

Languages	Python, R, SQL, Java
Databases	PostgreSQL, MySQL, MongoDB, Redis; data warehousing, ETL, dimensional modeling
BI & Visualization	Power BI (report authoring, published datasets, DAX), Tableau, Matplotlib, Seaborn
Data & Engineering	Pandas, NumPy, ETL Pipelines, Feature Engineering, REST APIs, Data Modeling
ML & AI	Scikit-Learn, PyTorch, TensorFlow, XGBoost, Random Forest, SVM, LSTM, CNN
NLP	NLTK, SpaCy
Tools & DevOps	Git, Jupyter, Google Colab, Docker, CI/CD

EXPERIENCE

Data Analyst

July 2021 – July 2024

Cloudera

Chennai, India

- Queried and analyzed relational databases (PostgreSQL) to extract, transform, and load 4,000+ learner interaction records; built ETL pipelines for data ingestion, cleansing, and feature engineering, reducing preprocessing effort by 40%.
- Authored and maintained Power BI dashboards integrated via REST APIs to deliver real-time learner performance KPIs and trend analysis to non-technical stakeholders, enabling actionable instructor insights.
- Identified performance trends and at-risk learner patterns through data analysis (Python, Pandas, NumPy), generating data-driven curriculum recommendations and automated weekly progress reports.
- Built and deployed ML classification models (Random Forest, XGBoost) to personalize learner assessments, improving evaluation accuracy and test efficiency by 25%.
- Collaborated with cross-functional teams to consolidate multi-source data and translate complex analytical findings into actionable insights for business stakeholders.

ACADEMIC PROJECTS

SlateMate: Real-Time Multimodal Data Pipeline

Jan 2026 – May 2026

- Designed a near-real-time pipeline processing lecture audio into structured outputs using Whisper ASR, DistilBERT, and Claude LLM; validated at 85%+ accuracy across 25 datasets with sub-2-minute processing.
- Analyzed 25 annotated transcripts; identified temporal clustering patterns (51% follow-on probability) informing an effective automated 30-second triggering strategy.

Customer Churn Prediction & Analytics

Jan 2024 – Apr 2024

- Analyzed telecom customer dataset to identify churn drivers; applied end-to-end preprocessing, SMOTE, and feature importance analysis to surface actionable business insights.
- Built churn prediction models (Random Forest, XGBoost, SVM, Logistic Regression); achieved 88% accuracy; visualized KPIs and churn risk segments to inform strategic retention decisions.

Brain Tumor Detection System

Aug 2023 – Oct 2023

- Developed a Flask-based web app using a fine-tuned CNN for MRI image classification, achieving 92% test accuracy across four tumor categories with an intuitive upload-based real-time inference interface.

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals, Microsoft
- Deep Learning Specialization by DeepLearning.AI
- Machine Learning Engineering for Production (MLOps) Specialization by DeepLearning.AI
