 Houston Texas, United States 77705

 +1 219-386-7593

 deepika.tannacareers@gmail.com

LinkedIn profile:

<https://www.linkedin.com/in/deepika-tanna-38b366191/>

Skills:

Operating Systems	Windows, Red Hat Linux, Unix, Mac OS
Programming Languages	Java, J2EE, C, C++, Scala, Python
Scripting Languages	JavaScript, jQuery, Perl, Python, Scala, HTML, Ruby, Shell Script, SSH, Bash
Java/J2EE Technologies	JDK, JVM, JRE, Swing, AWT, Applets, JDBC, Servlets, JSP, Struts, Spring, Spring MVC, Spring Boot, Hibernate, JTS, JTA, Java Mail, Webservices, RMI, JPA
Web Development	Angular.js, Node.js, React.js, Bootstrap, Backbone.js, HTML, DHTML, CSS3, Java Script, Typescript, Struts Tag Library, JSON, JSTL
Web Services	REST, RESTful, SOAP, WSDL, UDDI, JAX-WS, JAXB, JAX RS, JAX-RPC
Cloud Technologies	AWS, Microsoft Azure
Frameworks	Struts, Spring (MVC, AOP, DAO, ORM, Core), Spring Boot, Hibernate
Application/ Web Servers	Apache Tomcat, JBoss, Glassfish, WebSphere, WebLogic
Methodologies	Agile, MVC, DAO, Factory pattern, Singleton, Delegation.
Relational Databases	Hive, Oracle, MySQL, PostgreSQL, IBM DB2, SQLite, MariaDB, SQL Server, MSSQL

Professional Summary

- As a Full Stack Java Developer with overall 4 years of hands-on IT experience with Object-oriented Programming, Analysis, Design, Documentation, Integration, Testing, and Implementation of Client Server, Distributed Multi-tiered and Large-Scale Enterprise applications in Waterfall and Agile methodology using JAVA and JEE technologies.
- Experience with Core Java concepts such as OOP Concepts, Collections, Exception Handling, Multi-Threading and sound knowledge on Data Structure and Algorithms.
- Experience in various Spring components like Spring MVC, AOP, CORE, Reactive, Hibernate, Spring IOC, Spring Cloud, Spring JDBC, Spring JPA, Spring Securities, Spring Microservices, Swagger APIs, and developed strategy for integrating internal security models.
- Extensive work experience on Spring Framework modules like Spring Core, Spring Web, Spring JDBC, Spring Rest Services, Spring Batch, Spring AOP, Spring Transaction and Spring Security.
- Expertise in the implementation of Core concepts of Java, J2EE Technologies: JSP, Servlets, JSF, JSTL, EJB transaction implementation (CMP, BMP, Message-Driven Beans), JMS, Struts, Spring 5.x, Hibernate, Java Beans, JDBC, XML, Web Services, Multi-Threading etc.
- Working knowledge in User Interactive (UI) Web Pages using front end technologies like HTML5, CSS, JSON, JSTL, Bootstrap, JavaScript, jQuery, Angular14, ReactJS, ExpressJS, NodeJS, GraphQL and AJAX.
- Experienced in working with MEAN stack development using MongoDB, Express, Node, and Angular14.
- Experience in Node environment using Node.js, NPM, Grunt and Groovy Bower. Experienced in working with node.js and NPM modules like http-server, Marathon, inquirer, path, mongo DB, Micro Services, Request, Elastic Search, express, luck, spark, and templating engines.
- Strong understanding of common API technologies, such as OAUTH, SAML, Spring Boot 2.x and Micro services.
- Experience in Amazon Web Services (AWS) environment & knowledge of AWS services like Elastic Compute Cloud (EC2), Elastic Load-balancers, Elastic Container Service (Docker Containers), S3, Elastic Beanstalk, Elastic File System, RDS, DMS, VPC, Route53, Cloud Watch, Cloud Formation, IAM.
- Experience in working, setting up the CI/CD pipelines using Jenkins by writing Groovy scripts and integrating the pipeline with GIT, Bitbucket, SVN and with Maven for build automation.
- Expertise in deploying J2EE applications, encompassing JAR, WAR and EAR archives, on enterprise-level application servers such as IBM WebSphere, Apache Tomcat and BEA WebLogic.
- Experience in working with messaging systems like Kafka, RabbitMQ and knowledge of real time data analytics using Apache Spark for developing Spark streaming modules.
- Proficiency in deploying J2EE Applications archives (JAR, WAR and EAR) on IBM Web Sphere Application server, Apache Tomcat Web Server, and BEA Web Logic Application Server.
- Expertise in utilizing JIRA for bug tracking and worked with different JIRA plugins for enhanced project management. Experience in using XML based technologies like XSL, XSLT, parsers DOM, SAX, JAXP, and JAXB.

Experience

Wells Fargo Bank | Dallas, Texas

December 2023 – Current

Full Stack Web Developer

Responsibilities:

- Involved in Requirements and Analysis Understanding the requirements of the client and the flow of the application as well as the application Framework. Worked on behavior driven development (BDD) using SCRUM framework under Agile Methodology. Optimized HTML code for improving website performance and faster page loading times.

Build Automation	Gradle, Maven, Ant, Grunt, Gulp
NOSQL Databases	MongoDB, Cassandra, DynamoDB, HBase, CouchDB, Redis, Neo4j
Bug Tracking	JIRA, Bugzilla, Firebug, ALM, HP Quality Centre, Log4J.
Version Controls	Git, GitHub, Subversion (SVN), CVS.
Testing Tools	JUnit, TestNG, Mockito, Power Mock, Easy Mock, SoapUI, Jasmine, Karma, Selenium Web Driver, Cucumber

Certification:

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional.
- Java stream training and assessment: Tech Expressway Program

- Used Bootstrap components of Angular-UI like carousel, collapse, dropdown, and tabs to develop dynamic responsive Web Application. Used Spring Boot properties like actuators and health checkers to enhance Microservice implementations.
- Utilized CSS to create interactive data visualizations for medical reports and charts.
- Developed Bill generation and Plan management modules in Angular, leveraging advanced features such as data binding, routing (ng-route), custom filters and directives to meet business requirements.
- Worked on Angular components including Controllers, Filters, Services, Templates, Injectors, ensuring efficient and seamless application development.
- Designed and developed Microservices using (MEAN Stack) Node.js, Angular Elastic search on Private Cloud OpenStack Platform using Express.js.
- Developed Microservice to provide Restful API utilizing Spring Boot with various data persistence frameworks such as Hibernate, Spring Data JPA and Messaging engines.
- Implemented Hibernate Query Language (HQL) and Criteria API to execute database queries, promoting database-agnostic code and enhancing application performance.
- Utilized RabbitMQ as a robust and scalable message broker and created asynchronous communication and seamless integration between distributed systems.
- Worked with Azure Microservices, Azure Functions and Azure Solutions and used Azure for storage of data in the cloudlike Azure Data Factory and Azure Cosmos DB.
- Configured message filtering and routing rules in RabbitMQ to selectively process and forward messages based on predefined criteria. Performs UNIT testing with JASMINE and KARMA and develops web services using RESTFUL API.
- Developed real-time monitoring dashboards using Grafana, providing comprehensive visibility into critical metrics and data points such as patient vital signs, equipment status.
- Integrated Grafana with various data sources, such as Electronic Health Records (EHR) systems, medical devices, and third-party APIs, consolidating disparate data streams into a single, unified view within Grafana dashboards, enabling comprehensive analysis and reporting.
- Worked on various tasks and transformations like Execute SQL Task, Execute Package Task and conditional split, Script Component, Merge and Lookup while loading the data into Destination.
- performed Create, Read, Update, and Delete (CRUD) operations on SQL database using SQL statements and JDBC, manipulated data from the java classes itself using JDBC drivers., ensuring efficient data manipulation.
- Designed SQL database indexes to accelerate query performance, reducing response times for complex queries.
- Utilized Azure DevOps services for continuous integration and continuous deployment (CI/CD), automating application testing and deployment processes.

Accenture | Hyderabad, Telangana, India
Application Development Analyst

November 2019 - April 2023

- Designed and developed web interfaces using Struts, JSP, CSS and JavaScript, leveraging Struts custom tag libraries and HTML logic tags to create user interfaces efficiently and reduce manual HTML coding
- Utilized JPA support for efficient database connections, handling selects, updates, deletes and inserts, along with calling stored functions. Led the development of data

access beans and middleware web service components while skillfully implementing the persistence layer with JPA and POJOs to represent the database tables

- Developed XML Schemas and utilized SAX parsers for parsing XML data, while integrating all components within the Struts framework through Web.xml, struts.cfg.xml and Validation.xml files
- Supervised web app design and development, boosting client-side performance by
- Developed module components for CRM system, increasing efficiency.
- Led end-to-end system testing, reducing bug
- Managed team of six developers, boosting productivity
- Implemented Java 8 standards, enhancing code readability
- Utilized Hibernate and spring for scalable apps, cutting operational errors
- Incorporated modern coding standards using Java 8, improving code readability
- Incorporated modern coding standards using Java 8, improving code readability
- Optimized application flow, thereby improving loading time
- Developed and enhanced micro services using Spring Boot, accelerating application speed
- Streamlined development process by implementing Agile and Scrum methodologies, boosting project delivery timeframe

Education

Wichita State University, Wichita

January 2023- May 2024

Master of Science (M.S.) - Computer Science

Mallareddy University | India

August 2015 - 2019

Bachelor of Electronics And Communication Engineering
