

SUMMARY

Accomplished Java full-stack developer with 4+ years of experience designing and deploying enterprise-grade applications in finance, healthcare, and technology. Expert in Java, Spring Boot, React, Angular, and microservices architecture, delivering high-performance, scalable solutions. Skilled in AI/ML integration, enabling predictive analytics, NLP automation, and data-driven insights. Proficient in AWS, Azure, Docker, Kubernetes, Jenkins, and GitHub Actions, driving DevOps automation and 99.9% uptime deployments. Recognized for optimizing backend performance by 40%, reducing release cycles by 30%, and enhancing product reliability through efficient CI/CD and testing practices.

SKILLS

- Programming Languages:** Java (8/11/17), Python (for AI/ML), JavaScript (ES6+), TypeScript, SQL, PL/SQL, Shell Scripting
- Backend Technologies:** Spring Boot, Spring MVC, Spring Cloud, Hibernate, JPA, Microservices Architecture, RESTful & SOAP APIs, Node.js, Express.js, GraphQL
- Frontend Technologies:** Angular (8+), React.js, HTML5, CSS3, Bootstrap, jQuery, JSON, AJAX, Responsive Web Design
- AI / Machine Learning & Data Technologies:** Python (NumPy, Pandas, scikit-learn), TensorFlow, OpenAI APIs, LangChain, NLP (spaCy, NLTK), Chatbot Integration (Dialogflow, Rasa), Apache Spark, MLlib, Data Pipeline Development, Model Deployment via REST APIs
- Databases:** MySQL, PostgreSQL, Oracle, MongoDB, Redis
- Cloud & DevOps:** AWS (EC2, S3, Lambda, SageMaker, RDS, CloudWatch), Azure (App Services, Cognitive Services, Functions), Docker, Kubernetes, Jenkins, GitHub Actions, Maven, Gradle, SonarQube, CI/CD Pipelines
- Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS
- Testing & Quality Assurance:** JUnit, Mockito, Selenium WebDriver, Postman, JMeter, REST Assured, TestNG, Cucumber (BDD)
- Security & Authentication:** OAuth 2.0, JWT, API Gateway, SSL/TLS, SSO, Spring Security, Role-Based Access Control
- Version Control & Collaboration:** Git, GitHub, Bitbucket, JIRA, Confluence, Agile/Scrum Methodologies
- Performance Optimization & Monitoring:** SQL Query Tuning, Redis Caching, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)

WORK EXPERIENCE

PNC Full Stack AI Engineer	June 2024 – Present
- Designed and deployed Spring Boot-based microservices to process over 2 million daily financial transactions, improving system throughput by 25% and ensuring 99.9% uptime with Docker and Kubernetes orchestration. - Developed and integrated secure RESTful APIs for payment, authentication, and reporting modules using OAuth2.0, JWT, and API Gateway, ensuring compliance with banking security and audit standards. - Automated CI/CD pipelines using Jenkins, Maven, and GitHub Actions, accelerating deployment timelines by 40%. - Integrated Apache Kafka for real-time event streaming and asynchronous communication, improving inter-service reliability and responsiveness by 30%. - Led Angular UI development to modernize the front end, improving maintainability, enhancing user experience, and reducing defect rates by 35% across multiple product releases.	
Tata Consultancy Services Full Stack Java Developer	Aug 2021 – Aug 2022
- Engineered financial account management modules using Java, Spring Boot, and Angular, enabling real-time KYC processing and customer onboarding with 25% faster data validation. - Optimized Hibernate and JPA persistence layers, improving query response times and reducing database latency by 30%, leading to faster financial data retrieval. - Implemented Jenkins-based CI/CD pipelines integrated with Git workflows, automating build and deployment processes, cutting manual intervention, and improving team productivity by 35%. - Conducted load and performance testing with JMeter, ensuring platform stability under high transaction volumes and improving overall system resilience. - Migrated legacy monolithic applications to AWS Cloud (EC2, S3, RDS), achieving better scalability, reducing operational costs, and improving system uptime across environments.	
Cybage Software Associate Java Developer	Jul 2019 – Jul 2021
- Developed core modules for a Customer Engagement Portal using Java, JSP, Servlets, and Spring MVC, improving page responsiveness and reducing load times by 30%. - Built and deployed RESTful APIs to support backend microservices and internal CRM integrations, improving data consistency and communication between distributed systems. - Enhanced front-end performance with HTML5, CSS3, and JavaScript, creating a more accessible and responsive user experience that reduced bounce rates by 20%. - Migrated legacy applications to Spring Boot microservices, improving maintainability, scalability, and deployment efficiency by 25%, while reducing code complexity. - Automated unit and integration testing using JUnit, Mockito, and Selenium, maintaining over 90% test coverage and improving pre-release software quality.	

EDUCATION

- University of North Texas, USA**
Master's in Computer and Information Sciences

Lakireddy Bali Reddy College of Engineering, India
Bachelor's in Electronics and Communication Engineering
