PROFESSIONAL SUMMARY

Results-driven Data Analyst with experience in Power BI, SQL, Python, Tableau, Excel, and business analysis. Proven ability to build dashboards, automate reporting, translate business requirements into data solutions, and deliver actionable insights to stakeholders. Combines analytical skills with prior enterprise experience in Agile environments, testing, and cross-functional collaboration.

CORE SKILLS

Power BI | DAX | Power Query | SQL | PostgreSQL | Python | Pandas | NumPy | Tableau | Excel | Data Cleaning | Data Visualization | Business Requirements | Agile/Scrum | Jira | Trello | Stakeholder Management

PROFESSIONAL EXPERIENCE

LAM Research

Data Analyst (via Qubiqon) | Mar 2024 – Feb 2026

- Design, develop, and maintain 30+ interactive Power BI reports and dashboards to support operational and executive reporting.
- Create KPI scorecards, trend analyses, and performance reports to enable data-driven decision-making.
- Use DAX, Power Query, and data modeling techniques to transform raw data into scalable reporting solutions.
- Teamed with data engineers to enhance data pipelines enabling efficient analytics consumption.
- Collaborate with cross-functional stakeholders to gather requirements and translate business needs into analytical deliverables.
- Perform data validation, reconciliation, and quality checks to ensure reporting accuracy and consistency.
- Enhance report usability through intuitive visual design, drill-through functionality, and user-focused layouts.
- Support Agile project delivery through requirement tracking, testing coordination, and stakeholder communication.

Numpy Ninja

Data Analyst | Feb 2023 – Jan 2024

- Worked with clinical dataset for designing a KPI dashboard that included factors like length of stay, throughput for ICU Sepsis patients using Tableau with use of calculated fields, Level of Details (include, exclude, fixed), filters, parameters which will help to improve ICU operational efficiency by 30%.
- Used python pandas, numpy library for data cleaning, data wrangling and missing data analysis. Skilled in Python visualization libraries like matplotlib and seaborn for deriving insights through exploratory data analysis.
- Executed SQL queries for extracting data from relational database using many functions concepts like CTE, Triggers, window functions and many more.
- Involved in the process of implementation Agile Methodology using Scrum and Trello.
- Used Power BI to establish and understand relationships between a main table and its associated sub-tables, analyze different aspects of dataset using DAX, create multiple visualizations like table chart, pie chart, waterfall chart, stacked bar chart, KPI cards and others.

Tata Consultancy Services

Test Analyst | Jul 2013 – Mar 2018

- Supported enterprise financial services applications across credit cards, loans, and deposits.
- Created test plans, test cases, RTM, and defect documentation.
- Led onboarding and training of new associates.
- Worked in Waterfall and Agile delivery models.

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Professional Scrum Master I (PSM I)
- Google Data Analytics Professional Certificate
- PCEP – Certified Entry-Level Python Programmer

EDUCATION

Bachelor of Electronics and Communication Engineering | GITAM University | Andhra Pradesh, India
June 2013
