PROFESSIONAL SUMMARY

- MBA graduate in Business Analytics with over 4+ years of experience in Data Analytics, with specialization in SAP Datasphere for ETL/ELT and BI Tools like PowerBI, Tableau and SAP Analytics cloud for dashboard and reporting.
- Proficient in real-time data integration from databases like S/4 HANA, SAP ECC and other 3rd party data sources into Datasphere using live connections and scheduled replication flows for up-to-date analytics.
- Experienced in data modeling, query optimization, and building scalable reporting solutions, with exposure to SAP analytics tools, SAP Datasphere, and enterprise platforms such as Oracle Cloud ERP, HCM, and SCM. Adept at collaborating with business and functional stakeholders to define KPIs, validate metrics, and deliver impactful analytics solutions.
- Skilled in creating analytical models in SAP Datasphere, defining dimensions and measures to support structured and scalable reporting and consume to SAP Analytics cloud.
- Built interactive dashboards in SAP Analytics Cloud and Tableau to monitor key business processes and provide actionable insights. Proficient in Python and SQL for data cleaning, transformation, and preparation for analysis and visualization
- Certified in Lean Six Sigma (White & Yellow Belt) and trained in SAP Generative AI, bringing a continuous improvement mindset to process optimization.
- Recognized for strong analytical thinking, cross-functional collaboration, and the ability to communicate effectively with both technical and non-technical audiences, with a focus on delivering data-driven solutions that enhance business performance and operational efficiency.

SKILLS

- **Data Analysis & Automation:** Proficient in Microsoft Excel (PivotTables, VLOOKUP, Macros, Complex Formulas) and Power Query for data cleaning, transformation, and process automation.
- **Data Visualization:** Skilled in Power BI and Tableau for creating dynamic, interactive dashboards and analytical reports to support business decision-making.
- **Database & SQL:** Experienced in SQL development — including Stored Procedures, Views, and Query Optimization — with hands-on exposure to SAP HANA, MySQL, Amazon Redshift, and Google Big Query.
- **Programming & Scripting:** Proficient in Python, R, Java, SQL, PowerShell, and VBA for data analysis, automation, and workflow optimization.
- **Data Engineering & Big Data:** Skilled in Apache Spark, PySpark, Hadoop, and building ETL/ELT pipelines using SQL Alchemy for data integration and transformation.
- **Machine Learning:** Familiar with predictive analytics, ML fundamentals, and basic model implementation workflows for data-driven insights.
- **SAP Business Data Cloud (BDC):** Certified professional with strong knowledge in data product design, intelligent applications, and data-driven analytics enablement.
- **SAP Datasphere:** Skilled in space management, data modeling, and data flow orchestration, including replication and transformation workflows within cloud-based data landscapes.
- **SAP Analytics Cloud (SAC):** Proficient in interactive story development, embedded analytics, and establishing live and acquired connections for real-time insights.
- **SAP BW/4HANA:** Hands-on experience with LSA++ architecture, ADSO, Composite Providers, and Open ODS Views for scalable data warehousing and analytical reporting.
- **SAP S/4HANA Embedded Analytics:** Experienced in operational reporting, KPI-driven dashboards, and real-time analytics integration.
- **SAP HANA:** Competent in creating graphical, SQL, and calculation views optimized for data performance and advanced modeling.
- **SAP CDS Views:** Skilled in designing and consuming CDS Views for both analytical and transactional reporting use cases.

- **Operational Data Provisioning (ODP):** Knowledge of data extraction, replication, and integration across SAP and non-SAP systems.
- **Mixed Modeling (BW/4HANA + HANA + Datasphere):** Expertise in building hybrid data models to deliver unified and flexible enterprise data solutions.
- **SAP Security & Administration:** Experience in user and role management, space allocation, and ensuring data governance and access control.
- **Task Chains & Data Fabric Design:** Proficient in automating data workflows and designing data fabric layers to support seamless enterprise analytics.

CERTIFICATIONS

- **SAP Certified - Data Analyst - SAP Analytics Cloud** – SAP (Feb 2026)
- **SAP Certified - SAP Business Data** – SAP (Dec 2025)
- **Lean Six Sigma White Belt Certification-CSSC** (May 2025)
- **Lean Six Sigma Yellow Belt Certification-CSSC** (May 2025)
- **Foundation of Operations Goldman Sachs** (May 2025)
- **Oracle Fusion Cloud Applications SCM Oracle** (April 2025)
- **Oracle Fusion Cloud Applications HCM Oracle** (April 2025)
- **Oracle Fusion Cloud Applications ERP Oracle** (April 2025)
- **Excel Dashboard for Beginners**, Simplilearn (July 2024)
- **Business Intelligence Fundamentals**, Simplilearn (September 2024)
- **Introduction to Data Analytics**, Simplilearn (July 2024)
- **Introduction to MS Excel**, Simplilearn (July 2024)
- **Generative AI at SAP**, SAP (March 2024)
- **Basics of Project Management**, Udemy (February 2023)
- **Infosys Certified Java SE8 Developer**, Infosys (October 2023)

WORK EXPERIENCE

Global IT Solutions Inc, Dallas (TX)

April 2025 – Present

Data Analyst

- Designed and delivered enterprise-level dashboards and reports using Power BI, enabling scalable, high-performance analytics and business reporting.
- Modeled and transformed data using Snowflake, SQL, and SAP Datasphere, building robust semantic layers to support enterprise analytics and reporting needs.
- Developed analytics solutions leveraging SAP Analytics tools (SAP Analytics Cloud - SAC) and Power BI to provide actionable insights across business functions.
- Partnered closely with SAP Business Analysts and functional stakeholders to define KPIs, validate business metrics, and ensure alignment with organizational goals.
- Designed and maintained scalable data models using DAX, Power Query, and SAP-integrated data sources, supporting complex analytical and reporting requirements.
- Led end-to-end BI solution delivery, including requirement gathering, KPI definition, data modeling, dashboard development, deployment, and post-production support.
- Troubleshoot and resolved data quality, data refresh, and performance issues across Power BI datasets, SAP data sources, and Snowflake pipelines.
- Administered and governed Power BI environments, including workspaces, gateways, dataflows, refresh schedules, and role-based access controls.
- Implemented performance optimization strategies such as incremental refresh, aggregations, and query tuning, improving dashboard and reporting efficiency.
- Collaborated with cross-functional teams to deliver analytics solutions supporting supply chain and order-to-cash processes, enhancing business visibility and decision-making.
- Supported integration and reporting across SAP S/4HANA-based data architecture, ensuring consistency and

accuracy in enterprise reporting.

- Developed and optimized ETL/ELT pipelines integrating SAP data sources and Snowflake, improving data ingestion, transformation efficiency, and reporting reliability.
- Executed BI platform migrations (Tableau, MicroStrategy to Power BI), enhancing reporting standardization and user experience.
- Improved dashboard performance and data refresh efficiency by 30–40% through optimized data models, SAP data integration, and Power BI tuning.
- Designed reusable and scalable semantic models and dataflows, enabling long-term analytics scalability and enterprise reporting consistency.

Infosys Ltd., Bengaluru

June-2022- July-2023

SAP BI/BW Analyst

- Extracted and transformed data from SAP ECC and other sources into the SAP BW data warehouse layer, writing SQL queries and Python scripts for complex data cleaning and logic within the ETL process.
- Conducted exploratory data analysis by connecting Tableau and Power BI to modeled data, identifying key trends and patterns in customer demographics and purchasing behavior to inform business strategy.
- Applied Python-based machine learning techniques, such as clustering algorithms, to perform advanced customer segmentation within the data pipeline, enhancing analytical models.
- Processed and prepared data using SQL and Python, applying structuring and segmentation skills foundational to building semantic models for enterprise reporting.
- Delivered actionable insights by building and presenting clear, interactive reports and dashboards in Tableau and Power BI, effectively communicating data-driven recommendations to stakeholders.

Artificial Penetration Software Solutions Pvt Ltd., Hyderabad

July-2020 – May-2022

Data Analyst

- Developed a comprehensive Employee Management System to manage crucial work-related and personal employee information, including contact details, salary, job roles, work schedules, and educational background.
- Built and optimized databases to ensure stability, efficiency, and scalability for storing and managing employee data.
- Created and maintained stored procedures and views for efficient data retrieval and reporting.
- Wrote and optimized SQL queries to integrate with various applications, improving data access and processing speed.
- Developed and implemented SQL triggers for data auditing, ensuring data integrity and compliance with organizational standards.

EDUCATION

Gannon University, Erie, Pennsylvania

Master of Business Administration-Business Analytics

Jawaharlal Nehru Technological University, India

Bachelor of Technology – Mechanical Engineering

ACADEMIC PROJECT

Financial Management -Schlumberger Stock Valuation and Financial Forecasting

Spring 2024

Led a financial analysis and stock valuation project for Schlumberger using CAPM to estimate a 23% cost of retained earnings. Analyzed growth rate trends, beta of 1.62, and a 1.42% yield, resulting in strategic investment recommendations focused on portfolio diversification, risk-adjusted returns, and due diligence.
