PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience leveraging SQL, Power BI, Microsoft Fabric, and Python to develop enterprise reporting solutions and drive data-informed decision-making. Experienced in building scalable data models, developing interactive dashboards, performing operational analytics, and ensuring data quality across large datasets. Strong background in **data validation**, **data transformation**, and stakeholder collaboration, with exposure to AI/ML concepts, scenario modeling, and analytics for customer and operational insights.

CORE COMPETENCIES

Programming: SQL, Python, Java

AI & Advanced Analytics: AI-Assisted Analytics, Scenario Modeling, Data Integration, Data Ingestion Concepts, Machine Learning Fundamentals, Business Intelligence

Data Analysis & Visualization: Power BI, Excel, Tableau, Dashboard Development, KPI Reporting, Data Visualization, Executive Reporting, Market Trend Analysis, Data Storytelling, Report Writing & Visualization, Statistical Data Interpretation

Power BI Skills: Data Modeling, Power Query, DAX, Power BI Service, Workspace Management, Deployment Pipelines.

Data Tools: MySQL, Snowflake, Data Warehousing Concepts, Data Cleaning, Data Transformation, Relational Data Management

Tools: Git, GitHub, Jira, PowerPoint

Analytics & Experimentation: A/B Testing, Funnel Analysis, User Behavior Analytics, KPI Definition, Experiment Analysis.

Methodologies: Agile, Scrum, Stakeholder Management, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Data Analyst | TD Bank | Cherry Hill, NJ

May 2025 – Present

- Developed and maintained Power BI dashboards to support operational reporting and KPI monitoring for business stakeholders.
- Performed SQL-based data extraction, validation, and analysis on large operational datasets to support recurring and ad hoc reporting requests.
- Conducted trend, variance, and root cause analysis to identify business performance drivers and operational gaps.
- Built and maintained data models, DAX measures, and Power Query transformations to ensure consistency of reporting metrics.
- Used Python (Pandas) for data cleaning, transformation, and exploratory data analysis.
- Delivered actionable insights through dashboards and reports to support decision-making across business teams.
- Ensured data quality and accuracy through validation checks and reconciliation processes.

Data Analyst | Capgemini | Pune, India.

Jan 2022 – May 2024

- Built and maintained Power BI dashboards supporting Operations and Finance teams with performance monitoring, KPI tracking, and operational decision-making.
- Developed data models, Power Query transformations, and DAX calculations to improve report scalability, usability, and analytical capabilities.
- Collaborated with stakeholders to gather reporting requirements and transform business questions into actionable analytical solutions.
- Conducted exploratory and trend analysis to identify operational patterns, performance gaps, and opportunities for continuous improvement.
- Implemented data validation and reconciliation processes to maintain data integrity and ensure confidence in reporting outputs.
- Automated reporting workflows and standardized dashboard designs to improve efficiency and consistency across reporting environments.
- Delivered analytical insights and executive presentations that supported planning, performance management, and operational strategy discussions.

EDUCATION

M.S. Information Systems - GPA: 3.63 - Saint Louis University, St. Louis, MO

Aug 2024-May 2026

B-Tech – Electronics & Communication Engineering - Sphoorthy Engineering College, India

Aug 2018-May 2022
