Professional Summary

- Data Analyst with 4+ years of experience in data analysis, business intelligence, reporting, and dashboard development across wealth management, customer analytics, and municipal administration domains.
- Strong expertise in SQL, Python, Tableau, Power BI, ETL processes, and data warehousing for transforming complex data into actionable business insights.
- Experienced in designing interactive dashboards, KPI scorecards, and self-service reporting solutions that support operational and strategic decision-making.
- Proficient in data validation, data quality management, data migration, and data transformation across multiple enterprise data sources.
- Skilled in dimensional modeling, star schema design, and reporting optimization to improve data accessibility and reporting efficiency.
- Hands-on experience analyzing large datasets, identifying trends, and delivering business recommendations through data-driven solutions.
- Strong collaboration skills with business stakeholders and technical teams to gather requirements and implement reporting solutions.
- Adept at translating business needs into scalable analytics and reporting frameworks that improve productivity and performance.

Technical Skills

Category	Skills
BI & Visualization	Power BI, Tableau, Tableau Server
Programming	SQL, Python, Hive SQL
Databases	SQL Server, PostgreSQL, DB2, IBM Netezza
Big Data	Hadoop
Data Engineering	ETL, Data Warehousing, Data Migration, Data Transformation
Data Modeling	Dimensional Modeling, Star Schema
Analytics	Data Analysis, Data Validation, Data Quality Management, KPI Reporting
Tools	Microsoft Excel

Professional Experience

Data Analyst | Bank of America Merrill Lynch – Merrill Edge Guide Investor

(MEGI) | 2025–present

- Developed Tableau dashboards and business intelligence reports for wealth management analytics initiatives.
- Performed SQL-based analysis on customer, portfolio, and investment datasets.
- Used Python along with SQL to perform data analysis, data validation, and prepare datasets for reporting and dashboard development.
- Supported ETL processes to extract, transform, and load data from multiple source systems.
- Assisted in building and maintaining data warehouse structures for enterprise reporting.
- Created KPI dashboards to monitor portfolio performance and customer activity.
- Performed data validation and quality checks to ensure reporting accuracy.
- Generated ad-hoc reports and analytical insights for business users.
- Collaborated with stakeholders to improve reporting efficiency and decision-making.

Data Analyst / Report Developer | Comcast – Customer Analytics | 2023–2024

- Developed Tableau dashboards, scorecards, and operational reports for customer analytics.
- Created SQL and Hive SQL queries to analyze data from SQL Server, Hadoop, and IBM Netezza.
- Built KPI dashboards to track customer trends and operational performance.
- Performed data blending and integration from multiple data sources.
- Published dashboards to Tableau Server and maintained reporting environments.
- Conducted data analysis to identify patterns and operational improvement opportunities.
- Supported report scheduling and data refresh processes.
- Delivered ad-hoc reporting and analytics solutions for business teams.

Data Analyst | Computer Software Inc. – MAGNET Municipal | 2021– 2022

- Performed data validation and data quality assessments using SQL.
- Designed and supported data migration processes for municipal systems.
- Developed SQL scripts for reporting, extraction, and transformation requirements.
- Supported data integration activities between external systems and databases.
- Collaborated with business analysts to gather reporting requirements.
- Identified and resolved data inconsistencies to improve data reliability.

- Optimized SQL queries and supported database performance tuning.
- Provided production support and reporting enhancements.
