

PRERANA SAWANT

Business Analyst

New York, NY | 206-602-7481 | pas9972@nyu.edu | [Linkedin](#)

SUMMARY

Business & Data Analyst with ~3 years of experience owning end-to-end reporting, maintaining complex datasets, and translating operational data into actionable insights for cross-functional stakeholders. Proficient in SQL, Advanced Excel, Tableau, and Power BI for dashboard development, KPI tracking, workforce performance analysis, and support operations metrics across fast-paced technology environments. Brings strong analytical rigor, process optimization experience, and a proven track record of surfacing trends and root causes that drive operational decisions.

PROFESSIONAL EXPERIENCE

Business Analyst, WorkIndia, India's largest blue-collar job platform | Bangalore, India

July 2022 – Apr 2024

Data Ownership & Reporting:

- Tracked **support case resolution** times and escalation volumes across **payment failures and discount disputes**, maintaining accurate case data in Freshdesk to identify **recurring patterns and reduce repeat contacts**
- Reduced **payment failures 12%** by maintaining **real-time transaction monitoring dashboards** across 3+ payment providers, identifying gateway drop-offs and ensuring data accuracy across all operational reporting systems

KPI Monitoring & Performance Analysis:

- Improved **forecast accuracy 24%** by consolidating **10+ fragmented data sources** into **Tableau dashboards** tracking staffing demand, contact rates, and operational performance **signals for leadership** planning
- Reduced payment-related **support escalations 18%** by conducting **end-to-end RCA** on recurring payment failure cases, triaging tickets in **Freshdesk**, and surfacing resolution to engineering and operations teams

Process Optimization & Documentation:

- Saved **\$115K annually** by **evaluating CRM** communication workflows, identifying inefficiencies, and documenting optimized processes and **SOPs** across sales, operations, and engineering teams
- Reduced **user onboarding TAT 22%** by mapping **end-to-end verification workflows**, identifying redundant steps, and developing **process documentation** for current and future-state operations

Stakeholder Insights & Ad Hoc Analysis:

- Reduced **CAC 7% (~\$50K)** by completing **ad hoc channel** performance analysis, synthesizing findings into clear trend summaries and presenting **actionable recommendations to senior leadership**
- Improved **new-user retention 4%** by analyzing behavioral data across onboarding touchpoints, identifying drop-off patterns, and **translating findings into prioritized operational improvements**

Software Development Engineer Intern, WorkIndia | Bangalore, India

Jan 2022 – June 2022

- Drove **~1.7% daily revenue** increase by developing top-up and subscription workflows using **React.js and PostgreSQL** for accounts
- Lifted **ATV 2%** by building automated coupon code and discount service, replacing manual discount management with a scalable interface
- Increased **daily active calls ~2%** by building **job-ranking algorithm** using Python, Django, and Elasticsearch to surface high-relevance jobs

EDUCATION

New York University, Tandon School of Engineering, New York, NY

May 2026

Master of Science in Management of Technology

(CGPA 3.89/4)

Sardar Patel Institute of Technology, Mumbai University, India

May 2022

Bachelor of Technology in Information Technology

(CGPA 9.16/10)

SKILLS

- Functional Competencies:** Data Ownership & Management | Recurring Reporting & Dashboard Development | KPI Monitoring & Anomaly Detection | Workforce & Support Metrics Analysis | Process Optimization & Documentation | Root Cause Analysis | Ad Hoc Analysis & Stakeholder Reporting | Data Quality & Validation | Process Mapping & Workflow Design | ETL Pipeline Development | Operational Cost Analysis | Cross-Functional Collaboration | Trend Identification & Insights | SOP Development | Forecasting & Demand Planning
- Technical & Analytical Tools:** SQL | PostgreSQL | Advanced Excel | Google Sheets | Tableau | Power BI | Looker | BigQuery | Python | Salesforce | Data Modeling & Validation | ETL Pipelines | JIRA | Confluence | Microsoft Office Suite | PowerPoint | Zendesk | Freshdesk

PART-TIME EXPERIENCE & INDUSTRY PROJECTS

Keva Health, Market & Business Analyst

Sept 2025 – Dec 2025

- Identified **~\$12M revenue opportunity** by conducting **bottom-up market sizing, cohort segmentation**, and competitive analysis across 311K high-risk patients to surface actionable insights
- Prioritized **5 high-probability accounts from 50+** by designing a structured evaluation framework, synthesizing complex data into clear recommendations for **stakeholder decision-making**

NYU Faculty Development, Analytics Associate

Sept 2025 – Dec 2025

- Maintained and tracked **program budgets** across faculty initiatives, consolidating cost data in **Excel dashboards** and **reporting variances to leadership** to ensure accurate spend management and prevent budget overruns
- Delivered **20+ programs per semester** by defining execution frameworks, maintaining **cross-functional documentation**, and **tracking dependencies** across 5+ stakeholder groups

LEADERSHIP ACTIVITIES

- Managed a **50-member team** to coordinate Oculus Cultural Festival, delivering 20+ events for **5,000+ attendees**.
- Directed **Women in STEM Conference 2022**, securing sponsorships and managing a **\$5,000 budget** to host **1,000+ participants**.
- Increased **STEM learning access** for underprivileged students by teaching Mathematics & Physics at Ti-Ratana Orphanage.
- Mentored **15 undergraduates** through a structured peer leadership program focused on academic guidance and career planning.
