

SUMMARY

Software Engineer specializing in Python API development, cloud integration, and identity and access management. Experienced in building secure, automated pipelines to integrate and centralize user and system data across distributed platforms. Skilled in Azure DevOps, REST API design, and data-driven backend development. Strong background in Java, C#, .NET, Spring Boot, and cloud-native architecture, with a focus on performance, reliability, and compliance.

PROFESSIONAL EXPERIENCE

Software Developer | Community Dreams Foundation

July 2025 - Present

Skills: Python, React, FastAPI, Supabase, Azure, SQL, Git

- Engineered backend APIs in Python to automate onboarding workflows, authentication, and data synchronization across multiple systems.
- Implemented secure authentication and row-level access control, improving compliance and data protection for sensitive user data.
- Deployed and monitored applications in Azure, leveraging DevOps pipelines for CI/CD and automated testing.
- Optimized API performance through asynchronous requests and caching strategies, improving response times by 35%.
- Strengthened application reliability and security by integrating continuous code scanning tools and implementing defensive programming standards.

Software Developer | Freshworks

November 2021 - July 2023

Skills: Python, Flask, MySQL, REST API, Kafka, Redis, AWS, Azure DevOps, SonarQube

- Developed and maintained scalable backend APIs to integrate external vendor systems (Shopify, Judge.me, Shiprocket) into the Freshsales CRM ecosystem, centralizing customer and purchase data.
- Designed and deployed microservices on AWS and Azure, integrating CI/CD pipelines for automated deployments and rollback management.
- Built an RBAC (Role-Based Access Control) module to enhance security and streamline user permission management across distributed systems.
- Implemented monitoring and logging with SonarQube and Azure Application Insights, reducing system downtime by 40%.
- Partnered with InfoSec to strengthen application security through static code analysis (SonarQube) and automated remediation pipelines.
- Developed secure payment and subscription management APIs to process recurring transactions and integrate with financial data systems.

Software Development Intern | Hubstream

March 2021 - June 2021

Skills: Python, Flask, ReactJS, Azure, MySQL

- Developed automated cataloging and classification tools for large-scale retail datasets, improving data extraction accuracy by 25%.
- Built time-series forecasting models to optimize inventory prediction across 800+ stores.
- Deployed machine learning pipelines for image recognition and sales prediction, increasing efficiency of data processing by 20%.

Data Science Intern | IPSG Systems

March 2019 - December 2019

Skills: R Programming, Python, Deep Learning, Digital Image Processing

- Orchestrated an automated fashion catalog tool, refining attribute extraction by 25% using R and CV.
- Devised sales forecasting models, boosting demand prediction accuracy by 30% for 800 stores.
- Optimized image classification algorithms for fashion products, decreasing processing time by 20%.

PROJECTS

Finance App (Next.js, React, TypeScript, JavaScript, Tailwind CSS, Hono, SQL)

Chicago Crime Data Analysis (Python, R Programming, Time Series, MySQL, ggplot2)

Stack Staging Management System (Spring Boot, Java, EmberJS, MySQL, AWS)

Flashcards App (Flutter, Dart, Hive)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, C#, R, Dart, TypeScript

Frameworks & Tools: Django, FastAPI, Flask, Spring Boot, React, Next.js, Flutter, Tailwind CSS, .NET, Kafka, REST API, HTML, CSS, YAML, JSON, JUnit, Mockito, Selenium, Redis, EmberJS, Git, GitHub, Bitbucket, Postman, Apache Tomcat, SonarQube, Vercel, Scrum, Agile

Databases & Cloud: Azure, Azure DevOps, AWS, Git, GitHub, CI/CD Pipelines, MySQL, NoSQL, Supabase, PostgreSQL

Security & IAM: RBAC, SailPoint, Delinea, OAuth2, SSO, Access Control

EDUCATION

Master's in Computer Science | Illinois Institute of Technology

August 2023 – May 2025

Bachelor's in Computer Science and Engineering | Anna University

September 2017 - August 2021
