

Sai Ram Manoj Pusala

Lee's Summit, MO 64081 | +1 9137492511 | manojpusala22@gmail.com

Summary

Around 3 years of experience in all aspects of **Software Development Life Cycle (SDLC)** including Requirement, Analysis, Design, Implementation, and Testing in both Web-based and Enterprise applications using Java technology.

3 years of experience in developing applications using **React+SpringBoot+AWS**

Experience in application development Using Methodologies include **Agile, TDD (test-driven development), and Waterfall models.**

Expertise in some of the best modern front-end frameworks such as **ReactJS, Bootstrap, Typescript, HTML5, CSS3, MongoDB, jQuery, JavaScript, and Node JS.**

Extensive experience in Coding and maintenance of **J2EE**-based applications using **Java 8** version, Java Collections, Data Structures, Multithreading, JDBC, and Servlets.

Extensive knowledge of **Data Structures** and OOPS concepts like **Inheritance, Abstraction, Polymorphism, and Encapsulation.**

Hands-on Experience in developing web applications using Spring framework modules like **Spring MVC, Spring IOC, Spring AOP, Spring JDBC, Spring Boot, and Spring Security.**

Good experience working with Amazon Web Services like **EC2, S3, Load Balancing.**

Expert in implementing Service Oriented Architecture using **SOAP** and **Restful Web Services.**

Experienced in writing **SQL scripts** in **Oracle**, MySQL, and a good understanding of NoSQL Databases like **MongoDB.**

Expert in using **JIRA** for bug tracking. Have used **Git** as a version control tool and **Docker** for continuous integration of builds.

Skills

- **Languages** : Java, JavaScript, C, C++, Python, SQL.
- **Web Technologies** : HTML5, XML, CSS, JavaScript, React.js, JQuery, Bootstrap, Redux, REST, Microservices, MongoDB, JSP, Servlets, JDBC, JavaBeans, AJAX.
- **Methodologies** : Agile, Waterfall, TDD(Test Driven Development), BDD(Behavior Driven Development),UML.
- **Frameworks**: Spring (Spring Boot, Dependency Injection, Spring MVC, Play, SpringIOC, Spring JDBC, Spring with Hibernate), Hibernate, Reactjs.
- **CI/CD Pipelines** : Maven, Docker, jenkins, AWS Spring , AWS Lambda.
- **Design/GUI Tools** : Eclipse, Netbeans, visual Studio, Micro Strategy.
- **Database** : Oracle 8 / +9i/ 10g, My-SQL , MS SQL Server 7.0 .
- **Version Control** : GIT, JIRA.
- **Testing Technologies** : JUNIT
- **Operating Systems** : Windows , Ubuntu , Linux

Experience

JAVA FULL STACK DEVELOPER | 04/2023 - Current

Zaven IT Solutions INC - Irving, TX

- Utilize **Agile** Methodologies to manage the full life-cycle development of the project.
- Involved in implementing various screens for the **front end** using **React.js** and used various predefined components

from **NPM (Node Package Manager)** and **redux library**.

- Extensively use **React-Router techniques Axios service** to retrieve data from server Synchronously and making the Single Page Applications.
- Working with the **Flux and Redux workflows** powered by the **ReactJS library**.
- Developed **RESTful APIs** using **Java, Spring Boot**, and **Hibernate**.
- Implement **Microservices** that contain the **shared functionality** that all business units inside the application may perform the same.
- Developing the application using **Spring Framework** modules like **Spring MVC, Spring IOC, Spring Security, Spring AOP, MongoDB**, and **Spring Cloud**.
- Performed **database design** activities including creating tables, stored procedures, views.
- Created **unit tests** for existing codebase using **JUnit** framework.
- Utilized **version control** system such as **Git** to manage source codes efficiently.
- Deployed applications in **cloud** environment such as **Amazon Web Services**.
- Creating **AWS SPRING BOOT, AWS LAMDA** Multi-Factor Authentication (MFA) for instance RDP/SSH login, and working with teams to lock down **security** groups.
- Collaborated with other developers on designing solutions that meet customer requirements.
- Maintained and troubleshoot existing software systems in production environment.
- Create the **continuous delivery** pipelines for deploying Microservices using **Jenkins**.

SENIOR SYSTEM ENGINEER | 05/2020 - 07/2022

Infosys Ltd. - Pune, Maharashtra

- Analyzed business requirements, and participated in technical design, development, and testing of various modules assigned.
- Responsible for Architecting, developing, and testing frontend applications built with **React**.
- Implemented **REST** Microservices using spring boot and **Junit** for unit testing.
- Used **Spring MVC** Framework to **create REST endpoints** and **maven** for project building.
- Expertise in creating Custom Reusable React Components Library Experienced in working with **Redux** architecture using complex **Object-Oriented concepts** in improving the performance of the website.
- Worked with **MS SQL** queries for saving and retrieval of Data from the database using the **Spring mongo** data repository.
- Used **Docker, Jenkins** to automate the build and deployment process.
- Using **AWS SPRING BOOT, AWS LAMDA** Microservices, and **MongoDB** services to build scalable Java applications around various technologies like Amazon **S3**, Amazon **EC2, ECS, EKS**, and more.
- Used **Spring framework, Spring Boot, Java 8 Spring Cloud, and Spring Data**, to develop applications.
- Maintaining the code documentation and tracking the issues till completion using **Confluence** and **JIRA**. Worked with GIT version control, **GitHub** as the central repository, and JIRA for bug tracking and ticketing.
- Conducted regular **maintenance** activities on **servers, storage systems** and networks.
- Diagnosed technical problems related to hardware, software, networking or other components.

Education and Training

University of Central Missouri - Warrensburg, MO | Master of Science

Computer Science, Expected in 12/2023

- The Book Shoppie, Capstone Project: Is an online book Store That allows users to buy books online. uses web technologies like HTML, CSS, Bootstrap, Javascript, python Flask, MySQL.
- Mind Map , Is a website that allows users to create a mindmap based on their requirement. Uses HTML, CSS, Bootstrap, Javascript, Reactjs, SpringBoot , AWS-Ec2, s3, RDBMS, MySQL.
- 3.66 GPA

NRI Institute of Technology - Vijayawada, AP, India | Bachelor of Science

Computer Science, 04/2020

A BAYESIAN LINK PREDICTION MODEL IN SOCIAL NETWORKS Published in International Journal for recent Developments in Science and Technology. June 2020.

- **EVENT PREDICTION** , Capstone Project: Implementation of a machine learning algorithm which is used to predict whether an event will occur or not based on the previous occurrences of the event. One of the Most popular algorithms named "Bayesian Classifiers" is implemented with **JAVA** .
- **IMPLEMENTATION OF ERROR CORRECTION TECHNIQUE IN TELE-COMMUNICATION** - Error Detection and correction technique while transmitting data between different users in network . Implemented with the help of algorithm named "Hamming Code" in **JAVA**.
- **MARVEL STORES** - An E-commerce web application developed to provide feasibility of getting groceries . The whole application is developed using flask, a python web Framework with REST API calls.**Tech Stack Used:** HTML, CSS, JavaScript, flask, MongoDB.
